Shelf Life Supermarkets And The Changing Cultures Of Consumption:

Shelf Life Kim Humphery, 1998-07-27 Supermarkets in all their everyday mundanity embody something of the enormous complexity of living and consuming in late twentieth century western societies Shelf Life first published in 1998 explores the supermarket as a retail space and as an arena of everyday consumption in Australia It historically situates and critically discusses the everyday food products we buy the retail environments in which we do so the attitudes of the retailers who construct such environments and the diverse ways in which all of us undertake and think about supermarket shopping Yet this book is more than narrative history It engages with broader issues of the nature of Australian modernity the globalisation of retail forms the connection between consumption and self autonomy and the highly gendered nature of retailing and shopping It interrogates also the work of cultural critics and questions recent attempts to grasp what it means to consume and to be a consumer

Thackeray, Andrew Thompson, Richard Toye, 2018-04-04 Following the Brexit vote this book offers a timely historical assessment of the different ways that Britain s economic future has been imagined and how British ideas have influenced global debates about market relationships over the past two centuries The 2016 EU referendum hinged to a substantial degree on how competing visions of the UK should engage with foreign markets which in turn were shaped by competing understandings of Britain s economic past The book considers the following inter related questions What roles does economic imagination play in shaping people s behaviour and how far can insights from behavioural economics be applied to historical

issues of market selection How useful is the concept of the official mind for explaining the development of market relationships What has been the relationship between expanding communications and the development of markets How and why have certain regions or groupings e g the Commonwealth been unimagined losing their status as promising markets for the future

Feminism, Labour and Digital Media Kylie Jarrett, 2015-11-19 There is a contradiction at the heart of digital media We use commercial platforms to express our identity to build community and to engage politically At the same time our status updates tweets videos photographs and music files are free content for these sites We are also generating an almost endless supply of user data that can be mined re purposed and sold to advertisers As users of the commercial web we are socially and creatively engaged but also labourers exploited by the companies that provide our communication platforms How do we reconcile these contradictions Feminism Labour and Digital Media argues for using the work of Marxist feminist theorists about the role of domestic work in capitalism to explore these competing dynamics of consumer labour It uses the concept of the Digital Housewife to outline the relationship between the work we do online and the unpaid sphere of social reproduction It demonstrates how feminist perspectives expand our critique of consumer labour in digital media In doing so the Digital Housewife returns feminist inquiry from the margins and places it at the heart of critical digital media analysis

Food Chains Warren Belasco, Roger Horowitz, 2011-06-03 In recent years the integrity of food production and distribution has become an issue of wide social concern The media frequently report on cases of food contamination as well as on the risks of hormones and cloning Journalists documentary filmmakers and activists have had their say but until now a survey of the latest research on the history of the modern food provisioning system the network that connects farms and fields to supermarkets and the dining table has been unavailable In Food Chains Warren Belasco and Roger Horowitz present a collection of fascinating case studies that reveal the historical underpinnings and

institutional arrangements that compose this system The dozen essays in Food Chains range widely in subject from the pig poultry and seafood industries to the origins of the shopping cart The book examines what it took to put ice in nineteenth century refrigerators why Soviet citizens could buy ice cream whenever they wanted what made Mexican food popular in France and why Americans turned to commercial pet food in place of table scraps for their dogs and cats Food Chains goes behind the grocery shelves explaining why Americans in the early twentieth century preferred to buy bread rather than make it and how Southerners learned to like self serve shopping Taken together these essays demonstrate the value of a historical perspective on the modern food provisioning system

Transformations of Retailing in Europe after 1945 Lydia Langer,2016-02-17 After World War II structures practices and the culture of retailing in most West European countries went through a period of rapid change The post war economic boom the emergence of a mass consumer society and the adaptation of innovations which already had been implemented in the USA during the interwar period revolutionized the world of getting and spending But the implementation of self service and the supermarket the spread of the department store and the mail order business were not only elements of a transatlantic catch up process of Americanization of retailing National patterns of the retail trade and specific cultures of consumption remained crucial and long term processes of change starting in the 1920s or 1930s also had an impact on the transformation of retailing in post war Europe This volume presents a series of case studies looking at transformations of retailing in several European countries offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing

Consumer Australia Robert Crawford,Kim Humphery,Judith Smart,2010-06-09 Donald Horne s The Lucky Country claimed that Australia was one of the first nations to find part of the meaning of life in the purchase of consumer goods Significantly similar views had been expressed in the late 18th century where everyday life in the antipodean outpost of Empire was regarded as being pecuniary and acquisitive in nature While references to Australia as a consumer society continue to be made the question of how Australia came to be so has attracted less attention The chapters in Consumer Australia actively redress this omission by examining the ways in which the processes of selling buying and exchanging have characterised the experiences of consumption in every day Australian life Prepared by leading and emerging scholars the chapters in this unique collection critically explore the different ways that Australians have consumed products brands and even consumption itself from the 19th century and through the 20th century By charting the growth and development of consumption in Australia Consumer Australia reveals how Australia came to be a consumer society and asks where it is headed
