Shell Greenpeace And Brent Spar:

Shell, Greenpeace and the Brent Spar G. Jordan, 2001-08-14 The decision by multinational Shell not to dispose of the Brent Spar oil facility in the North Atlantic was taken after several occupations of the structure by Greenpeace and as a result of large scale pro Greenpeace protest in the UK Germany and other continental countries This case is often cited as showing the power of single issue pressure groups and is presented as leading to a pivotal reconsideration by big business of the importance of environmental dimensions However detailed research proves that Shell changed its mind on the Brent Spar issue because of the corporate structure of the company which meant that some parts were reluctant to bear the bad publicity Using this case study Grant Jordan considers the role of scientific advice in shaping governmental decisions on matters such as BSE GM foods global warming and the consequences of a divided scientific view He looks at the use of the media by groups and companies attempting to control the political agenda **Shell, Greenpeace, and Brent Spar** Stanford University. Graduate School of Business, 1996 *Decommissioning the Brent Spar* Paula Owen, Tony Rice, 1999-04-08 Decommissioning the Brent Spar chronicles the events leading up to the recent decision to recycle the offshore installation in a Norwegian fjord the Greenpeace campaign to stop it being dumped at sea the repercussions of Shell's decision to abort the decommissioning at the eleventh hour and the dialogue processes that have occurred to attempt to resolve the issue This book will give a balanced impartial account of the whole situation to its present day its key aim being to inform the reader about the facts and mechanisms of the dialogue process and the need to approach decisions in a different way Readers will benefit from an account of the mistakes made by both sides the input from government the scientific community the press and public and can apply this knowledge to future environmental issues Moralizing the Corporation Boris Holzer, 2010-01-01 Each chapter in this book by itself is a worthy contribution to the existing research on the TNC in a globalised world In *spire* Journal of Law Politics and Societies The argument of this book is so powerful and convincing because it focuses on global subpolitics the corporate responsibility the power of its critics and the consuming citizen This shift of perspectives and its sophistication makes *Moralizing the Corporation* a must read for anyone interested in the dynamics of globalization Ulrich Beck University of Munich Germany *Moralizing the Corporation* offers a multi disciplinary analysis of the conflicts between transnational corporations and transnational advocacy groups The book is theoretically sophisticated and full of interesting and nuanced empirical findings that generate new knowledge about the relationship between politics and markets It views transnational corporations as quasi public institutions and explains their vulnerability to the non state authority of political consumers and protest groups Holzer develops theory on transnational subpolitics and corporate reflexivity and should be read by scholars and activists alike Michele Micheletti University of Stockholm Sweden This insightful book examines how transnational corporations respond to the challenges of anti corporate activism and political consumerism In prominent cases involving major corporations such as Nestl Nike and Royal Dutch

Shell transnational activists have successfully mobilized public opinion and consumers against alleged corporate misdemeanours Campaigns and boycott calls can harm a corporation's image but as this book points out public scrutiny also gives corporations the opportunity to present themselves as responsible and accountable corporate citizens who subscribe to the very norms and values propagated by the activists Academics scholars and postgraduate students in international business management organization studies social movement studies and political sociology will find this book invaluable

The Three Levels of Sustainability Elena Cavagnaro, George H. Curiel, 2017-09-08 This book aims to provide the missing link in current debates around sustainability The role of business governments NGOs and multilateral institutions are widely covered and many books discuss their possible actions strategies and roles But all of these organizations are made up of individuals And it is individuals who will need to steer society and organizations toward a more just and equitable world The book takes a holistic approach to sustainable development The authors argue that this approach starts and ends with the human being They believe that the personal dimension of sustainable development has been neglected and that it is clear that sustainable societies cannot be achieved without committed individuals who are convinced of the need to be part of the sustainability project The authors frame their ideas around the Three Levels of Sustainability TLS framework which they argue addresses at least some of the weaknesses inherent in a fragmented approach to sustainability Their approach encompasses societal organizational and individual levels and by looking through the lens of how sustainability has evolved provides a roadmap for producing the kind of leaders necessary for sustainable development in all of its dimensions people planet and profit The focus on how the individual can contribute to these three dimensions is unique To arrive at this multi level and multi dimensional framework the book introduces and analyzes theories from sustainable development corporate social responsibility and personal leadership and systemically looks for linkages between them that are useful for sustainability This framework is placed firmly in its historical context The authors are highly literate about the development and interpretations of sustainability and bring us to their current position via informed discussions on the history of economics business and environment social development the corporation and the profit principle CSR and measurement and reporting The book has been designed as both a text for students as well as those already in management and leadership positions in the private public or non profit sectors and will also prove invaluable to those wishing to familiarize themselves with sustainability

is a timely contribution that matches recent trends in innovation economics suggesting that an evolutionary notion of system innovations and a sector specific industrial dynamics perspective are a suitable analytical framework for the way in which firms address sustainability challenges through innovation Marcus Wagner University of Würzburg Germany We cannot expect to solve the environmental problems we face today by narrowing our focus on single firms We need to think more

systemically In his book *Creating Ecological Value* Frank Boons takes on this challenge While his research begins by exploring the diversity of environmental strategies adopted by companies he moves his analysis next to the level of the production and consumption systems to understand how these strategies shape and alter them His work considers how the diffusion of strategies and novel approaches can be facilitated but also finds that the systems into which these strategies are imposed are resilient and at times resistant to change He offers plenty of ideas to ponder as we consider how the market system as a whole addresses environmental issues Andrew J Hoffman The University of Michigan US Humans as scientists and managers often draw on metaphors to help describe and understand the complex issues they observe or manage As human activities begin to bump up against the constraints set by natural systems there is a tendency to search for metaphors from natural science biomimicry or industrial ecology have been around for some time now In this book Frank Boons explores the power of ideas from evolutionary science as metaphor to understand economic systems This is complex work but he does it with skill remembering that a metaphor is powerful not just in what it explains but even more in what it doesn't serve to explain Nigel Roome Free University of Brussels Belgium and TiasNimbas Business School Tilburg The Netherlands Firms adopt a wide variety of ecological strategies ranging from the development of innovative products with reduced environmental impact to lobbying against governmental attempts to set standards for the way in which firms deal with the natural environment This book explores this variety and is the first to provide a coherent evolutionary approach to the ecological strategies of firms Drawing on insights from organization and management sciences and innovation studies the author outlines an evolutionary framework enabling a deeper understanding of how firms shape ecological strategies and interact to create inertia or change at the level of systems of production and consumption This framework is applied to the coffee and automobile production and consumption systems yielding insight into the complex dynamics through which such systems evolve in dealing with ecological impact The book advances theoretical insight into business strategies and the natural environment and illuminates the dynamics of production and consumption systems Scholars students and practitioners from organization and management sciences innovation studies and industrial ecology interested in the relationship between business and the natural environment will find this book invaluable *EBOOK: Management Control Systems, 2e* Frank Hartmann, Kalle Kraus, Göran Nilsson, Robert Anthony, Vijay Govindarajan, 2020-11-05 *EBOOK Management Control Systems 2e* **Methods and Materials for Teaching the Gifted** Frances A.
