Totally Implantable Venous Access Devices Isidoro Di Carlo,Roberto Biffi,2012-02-01 Since their first application in 1982 Totally Implantable Venous Access Devices TIVADs have become increasingly important in the clinical practice as more intensive chemotherapy and parenteral treatments have come into use At this time there is objective evidence that TIVADs are a safe effective strategy for long term venous access they play a significant role throughout the management of the oncology patient as they are needed in the initial phases for active treatments as well as in the last stages for palliative measures making possible repeated administration of chemotherapeutic vesicant agents nutrients antibiotics analgesics and blood products According to a number of prospective studies use of TIVADs is associated with a significant complication rate 10% to 25% of all patients Evidence based data support that most complications are directly related to inappropriate technique of placement and or nursing care sometimes leading to TIVAD loss significant morbidity increased duration of hospitalization and additional medical cost A group of world renowned experts both in the clinical and research fields contributed to this volume whose aim is to provide clinicians nurses and medical students with a multidisciplinary full update on these devices as long term central venous access can no be longer considered a routine matter and serious complications can be maintained at a very low level only if strict adherence to a well defined protocol of surgical technique and of catheter care is maintained **Artificial Nutrition and Support in Clinical Practice** Jason Payne-James,George K. Grimble,David

B. A. Silk,2012-08-09 Any healthcare professional with or developing an interest in clinical nutrition will be able to use this textbook first published in 2001 as a source of information for the formation of a clinical nutrition support service of excellence The first three parts of the book will enable a clear perspective of the metabolism and physiology of clinical nutrition to be related to the practical application of support techniques The fourth part of the book highlights the role of nutrition support in specific disease groups A number of additional chapters have been added for this second edition and modifications made to the content of chapters from the first edition to cover newer areas or areas of omission
