Richardson** Maureen Meister, 1999 Viewed this way Richardson becomes a more challenging figure an architect who in many ways was shaped by and was consistent with his era even as he dominated it In addition to shedding new light on the architect the book shows how much Richardson scholarship has changed and matured over the course of a century BOOK JACKET *The Seven Lamps of Architecture* John Ruskin, 1907 *Ruskin's Artists* Robert Hewison, 2017-11-22 This was first published in 2000 A study of John Ruskin s engagement with art and architecture as a critic a patron and a teacher It offers insights into both his writings and the visual economy of the Victorian world Each essay examines Ruskin s relationship with an individual artist or a distinct aspect of art practice J M W Turner D G Rossetti W Holman Hunt and E Burne Jones are among those artists discussed whose personal relationships with Ruskin affected his critical writing Ruskin s attitude to women artists and his approach to the teaching of art are given special attention *The Sympathy of Things* Lars Spuybroek, 2016-04-21 If there is one thing we can learn from John Ruskin it is that each age must find its own way to beauty writes Lars Spuybroek in *The Sympathy of Things* his ground breaking work which proposes a radical new aesthetics for the digital era Spuybroek argues that we must undo the twentieth century and learn to understand the aesthetic insights of the nineteenth century art critic John Ruskin from which he distils pointers for the contemporary age Linking philosophy design and the digital with art history architecture and craft Spuybroek explores the romantic notion of sympathy a core concept in Ruskin s aesthetics re evaluating it as the driving force of the twenty first century aesthetic experience For Ruskin beauty always comprises variation imperfection and fragility three concepts that wholly disappeared from our mindsets during the twentieth century but which Spuybroek argues to be central to contemporary aesthetics and design Revised throughout and a new foreword by philosopher Brian Massumi this is a new edition of a seminal work which has drawn praise from fields as diverse as digital architecture and speculative realism and will continue to be influential as it wrests Ruskin s ideas out of the Victorian era and reconstructs them for the modern age **Utopias and Architecture** Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re invention of what is Through a detailed and innovative re assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and

Louis H. Sullivan and a 19th-Century Poetics of

Naturalized Architecture Lauren S. Weingarden, 2017-07-05 For most of the twentieth century modernist viewers dismissed the architectural ornament of Louis H. Sullivan 1856-1924 and the majority of his theoretical writings as emotional outbursts of an outmoded romanticism. In this study, Lauren Weingarden reveals Sullivan's eloquent articulation of nineteenth-century romantic practices: literary, linguistic, aesthetic, spiritual, and nationalistic, and thus rescues Sullivan and his legacy from the narrow role imposed on him as a pioneer of twentieth-century modernism. Using three interpretive models—discourse theory, poststructuralist semiotic analysis, and a pragmatic concept of sign functions—she restores the integrity of Sullivan's artistic choices and his historical position as a culminating figure within nineteenth-century romanticism. By giving equal weight to Louis Sullivan's writings and designs, Weingarden shows how he translated both Ruskin's tenets of Gothic naturalism and Whitman's poetry of the American landscape into elemental structural forms and organic ornamentation. Viewed as a site where various romantic discourses converged, Sullivan's oeuvre demands a cross-disciplinary exploration of each discursive practice and its rules of accumulation, exclusion, and reactivation. The overarching theme of this study is the interrogation and restitution of those Foucauldian rules that enabled Sullivan to articulate architecture as a pictorial mode of landscape art, which he considered co-equal with the spiritual and didactic functions of landscape poetry.

Living

Ruins, Value Conflicts Argyro Loukaki, 2016-12-05 Using monuments and ruins by way of illustration, this fascinating book examines the symbolic, ideological, geographical, and aesthetic importance of Greek classical iconography for the Western world. It examines how classical Greek monuments are simultaneously perceived as sublime national symbols and as a mythological and archetypal reference against which Western modernism is measured. The book investigates the dialogue this double identity leads to, as well as frequent clashes between ancient but also later monuments and their modern urban or regional environment. *Living Ruins: Value Conflicts* examines the complex historical process of monument restoration and enhancement and analyses the nexus of changing perceptions, aesthetic visions, and formal principles over the past two centuries. The book shows the ways in which archaeology and monumentality affect modern life, the modern aesthetic, our notions of nationhood, of place of self, and the limits to and possibilities for national development imposed by the need to ensure ruins are kept alive.

Reading Ruskin's Cultural Heritage

Gill Chitty, 2023-04-28 John Ruskin's critical commentary on culture and society transformative in his own time established him as a leading critic of the 19th century. His prescient thinking resonates powerfully with today's issues in cultural heritage conservation. This volume presents his ideas in context: key extracts from his works and future directions for his foundational ideas. Ruskin's passionate responses to the environmental and social changes of his day chime with contemporary ideas on themes like sustainability, ethical production, and environmentalism. Though widely recognised as a key figure in preservation history, his heritage work is rarely

appreciated in full context and breadth This volume presents six stimulating essays on Ruskin s readership and reception his transformative perceptions of heritage futures and provocative writing on cultural landscapes and the arts and crafts Extracts from both well known and lesser known works accompany each chapter to reflect the distinctive vocality of his texts from his writing on architecture and buildings to landscape and cultural heritage The volume offers a richer description of cultural context and meaning than usually afforded to Ruskin s work in conservation and critical heritage studies finding its resonance and relevance Written for an academic and professional audience in heritage studies and historic building conservation and particularly relevant for cultural heritage management this is a core text and reference work for undergraduate and postgraduate students in history of art and architecture heritage studies and architectural building conservation also central to interests of cultural historians and scholars of nineteenth century Victorian history and literature
