Against Sortition? **The Politics of Democratic Representation** Benjamin Boudou,Marcus Carlsen Häggrot,2025-05-16 The book discusses boundaries of electoral inclusion and mechanisms of electoral representation in contemporary democracies While the ancient Athenians took the idea of rule by the people to require direct popular participation in public decision making and the appointment of officials by lottery mechanisms democracy is nowadays interpreted electorally We partake in government mostly by electing the legislative and sometimes executive officials who in turn make the substantive decisions Yet who we is and how electoral representation should function remains hotly contested Controversies abound about the proper configuration of the demos the body of persons who are enfranchised the ways it is to exercise electoral choice and agency This book takes up several carefully selected questions from these theoretical and political debates Looking at the disenfranchisement of children cognitively disabled persons and refugees and discussing the forms of representation that might be afforded to external voters future generations and non citizens the contributions develop innovative arguments applying the basic principles of electoral democracy to the complexities of specific real world cases Doing so the contributions offer timely yet unorthodox perspectives on the theory and practice of electoral democracy This book was originally published as a special issue of Critical Review of International Social and Political Philosophy

**Young People's Human Rights and the Politics of Voting Age** Sonja C. Grover, 2010-10-05 Young People's Human Rights and The Politics of Voting Age explores the broader societal implications of voting age eligibility requirements and the legislative bar against youth voting in North America and in Commonwealth countries where youth is defined as persons 16 and over but under age 18 The issue is raised as to whether the denial of the youth vote undermines democratic principles and values and ultimately the human dignity of youth This is the first book to address the topic of the youth vote in depth as a fundamental human rights concern relating to the entitlement in a democracy to societal participation and inclusion in influencing policy and law which profoundly affects one's life Also examined are international perspectives on the issue of voting age eligibility The book would be extremely valuable for instructional purposes as one of the primary texts in undergraduate or graduate courses on children's human rights political psychology political science sociology of law or society and as a supplementary text for courses on human rights or constitutional law and would be of interest also to members of the general public concerned with children's human rights issues

showing that the same duty of assistance that would compel us to help a stranger in need also obligates us to vote to save our fellow citizens from injustice at the hands of bad or even evil leaders The book further explores issues of voter incompetence and how citizens ignorance can be partly overcome through political reform Although uninformed voting may lead to bad governance voting judiciously can be an effective path to justice In a time of polarization and political turmoil The Duty to Vote offers a stirring reminder that voting is fundamentally a collective endeavor to protect our communities and that we all must vote in order to preserve the free societies within which we live The Privatized State Chiara Cordelli,2020-11-24

Why government outsourcing of public powers is making us less free Many governmental functions today from the management of prisons and welfare offices to warfare and financial regulation are outsourced to private entities Education and health care are funded in part through private philanthropy rather than taxation Can a privatized government rule legitimately The Privatized State argues that it cannot In this boldly provocative book Chiara Cordelli argues that privatization constitutes a regression to a precivil condition what philosophers centuries ago called a state of nature Developing a compelling case for the democratic state and its administrative apparatus she shows how privatization reproduces the very same defects that Enlightenment thinkers attributed to the precivil condition and which only properly constituted political institutions can overcome defects such as provisional justice undue dependence and unfreedom Cordelli advocates for constitutional limits on privatization and a more democratic system of public administration and lays out the central responsibilities of private actors in contexts where governance is already extensively privatized Charting a way forward she presents a new conceptual account of political representation and novel philosophical theories of democratic authority and legitimate lawmaking The Privatized State shows how privatization undermines the very reason political institutions exist in the first place and advocates for a new way of administering public affairs that is more democratic and just

**The Ethics of Exile** Ashwini Vasanthakumar, 2021-11-04 Exiles have long been transformative actors in their homelands they foment revolution sustain dissent and work to create renewed political institutions and identities back home Ongoing waves of migration ensure that they will continue to play these vital roles Rather than focus on what exiles mean for the countries they enter a perspective that often treats them as passive victims The Ethics of Exile recognises their political and moral agency and explores their rich and vital relationship to the communities they have left It offers a rare view of the other side of the migration story Engaging with a series of case studies this book identifies the responsibilities and rights exiles have and the important roles they play in homeland politics It argues that exile politics performs two functions it can correct defective political institutions back home and it can counter asymmetries of voice and power abroad In short exiles can act both as a linchpin and a buffer between political communities in crisis and the international actors who seek to variously aid and exploit them When we think about the duties we owe to those forced to leave their homes we should consider how to enable rather than thwart these roles
