Los Angeles And The Future Of Urban Cultures A Special Issue Of American Quarterly:

Los Angeles and the Future of Urban Cultures Raúl Homero Villa, George J. Sánchez, 2005-02-21 This special issue of American Quarterly focuses on Los Angeles as an emblematic site through which the scholarship of American studies can be examined As a city shaped by eighteenth century European colonization nineteenth century U S territorial expansion and twentieth century migration Los Angeles has come to embody both the hopes and fears of Americans looking to the future It is a city in which the local is deployed in complex practices of identity and community formation within the broader networks of globalization that continue to define and redefine what constitutes America The articles in this volume address the complexities of the city s social geography across time particularly since World War II The collection reflects an exciting variety of cultural studies perspectives and reveals the synergistic possibilities of current Los Angeles studies and American studies in general American Quarterly includes interdisciplinary scholarship that engages key issues in American studies Publishing essays that examine American societies and cultures in global and local contexts the journal contributes to the understanding of the United States its diversity and its impact on world politics and culture *T.C. Boyle's "The Tortilla Curtain": Urban Conditions, Racism, and Ecological Disaster in Fortress Los Angeles* Laura Schomaker, 2015-02-01 Los Angeles is famous for its sunny weather for the Hollywood film studios and for being the residence of the rich and beautiful And although or precisely because all this is more illusion than reality the city frequently serves as setting for various pieces of fiction However Los Angeles does not only play a huge role in the media but since lately also in the realm of urban studies Having long been a kind of outsider in the field it is now regarded as a prototypical example for urban development by the L A School In this context its image is less sunny and positive but reveals a deep rooted racism against Latin American immigrants in combination with a fortress mentality on the part of its white population as well as a unique urban ecology in which natural catastrophes seem to be regular occurrences This paper intends to outline the significance of Los Angeles in urban studies and trace the thereby acquired findings in a fictional representation of the city T C Boyle s novel *The Tortilla Curtain* In the process it is shown how urban conditions racism and nature especially in the form of ecological disasters intersect and influence each other **Art and the City** Sarah Schrank, 2011-01-01 Art and the City explores the contentious relationship between civic politics and visual culture in Los Angeles Struggles between civic leaders and modernist artists to define civic identity and control public space highlight the significance of the arts as a site of political contest in the twentieth century *Reinventing Citizenship* Kazuyo Tsuchiya, 2014-04-15 In the 1960s and 1970s the United States and Japan went through massive welfare expansions that sparked debates about citizenship At the heart of these disputes stood African Americans and Koreans Reinventing Citizenship offers a comparative study of African American welfare activism in Los Angeles and Koreans campaigns for welfare rights in Kawasaki In working class and poor neighborhoods in both locations African Americans and Koreans sought not only to be recognized as citizens but also to become legitimate

constituting members of communities Local activists in Los Angeles and Kawasaki ardently challenged the welfare institutions By creating opposition movements and voicing alternative visions of citizenship African American leaders Tsuchiya argues turned Lyndon B Johnson s War on Poverty into a battle for equality Koreans countered the city s and the nation s exclusionary policies and asserted their welfare rights Tsuchiya s work exemplifies transnational antiracist networking showing how black religious leaders traveled to Japan to meet Christian Korean activists and to provide counsel for their own struggles Reinventing Citizenship reveals how race and citizenship transform as they cross countries and continents By documenting the interconnected histories of African Americans and Koreans in Japan Tsuchiya enables us to rethink present ideas of community and belonging

Postcolonial Grief Jinah Kim, 2019-01-17 In *Postcolonial Grief* Jinah Kim explores the relationship of mourning to transpacific subjectivities aesthetics and decolonial politics since World War II Kim argues that Asian diasporic subjectivity exists in relation to afterlives because the deaths of those killed by U S imperialism and militarism in the Pacific remain unresolved and unaddressed Kim shows how primarily U S based Korean and Japanese diasporic writers artists and filmmakers negotiate the necropolitics of Asia and how their creative refusal to heal from imperial violence may generate transformative antiracist and decolonial politics She contests prevalent interpretations of melancholia by engaging with

Frantz Fanon's and Hisaye Yamamoto's decolonial writings uncovering the noir genre's relationship to the U.S. war in Korea discussing the emergence of silenced colonial histories during the 1992 Los Angeles riots and analyzing the 1996 hostage takeover of the Japanese ambassador's home in Peru Kim highlights how the aesthetic and creative work of the Japanese and Korean diasporas offers new insights into twenty-first century concerns surrounding the state's erasure of military violence and colonialism and the difficult work of remembering histories of war across the transpacific

In Search of the Mexican Beverly Hills Jerry González, 2017-11-15 Residential and industrial sprawl changed more than the political landscape of postwar Los Angeles. It expanded the employment and living opportunities for millions of Angelinos into new suburbs. In *In Search of the Mexican Beverly Hills*, examines the struggle for inclusion into this exclusive world, a multilayered process by which Mexican Americans moved out of the barrios and emerged as a majority population in the San Gabriel Valley and the impact that movement had on collective racial and class identity. Contrary to the assimilation processes experienced by most Euro Americans, Mexican Americans did not graduate to whiteness on the basis of their suburban residence. Rather, *In Search of the Mexican Beverly Hills* illuminates how Mexican American racial and class identity were both reinforced by and took on added metropolitan and transnational dimensions in the city during the second half of the twentieth century.

New World Cities John Tutino, Martin V. Melosi, 2019-02-20 For millennia, urban centers were pivots of power and trade that ruled and linked rural majorities. After 1950, explosive urbanization led to unprecedented urban majorities around the world. That transformation, inextricably tied to rising globalization, changed almost everything for nearly everybody: production, politics, and daily lives. In this book, seven eminent scholars look at the similar but nevertheless divergent courses taken by Mexico City, Rio de Janeiro, Buenos Aires, Montreal, Los Angeles, and Houston in the twentieth century, attending to the challenges of rapid growth, the gains and limits of popular politics, and the profound local effects of a swiftly modernizing, globalizing economy. By exploring the rise of these six cities across five nations, *New World Cities* investigates the complexities of power and prosperity, difficulty and desperation, while reckoning with the social, cultural, and ethnic dynamics that mark all metropolitan areas.

The Invention of Brownstone Brooklyn Suleiman Osman, 2012-11-29 An original and captivating history of gentrification, this book challenges the conventional wisdom that New York City began a comeback in the 1990s, locating the roots of Brooklyn's revival in the social upheavals of the 1960s and 1970s. Osman examines the emergence of a progressive coalition as young, well-educated brownstoners joined with poorer residents to battle city planners and local machine politicians. Deftly mixing architectural, cultural, and political history, this book offers an eye-opening perspective on the post-industrial city.
