Resistance and Survival Ann González, 2022-08-23 In her analysis of some of the most interesting and important children's literature from Central America and the Caribbean Ann González uses postcolonial narrative theory to expose and decode what marginalized peoples say when they tell stories to their children and how the interpretations children give these stories today differ from the ways they have read them in the past González reads against the grain deconstructing and critiquing dominant discourses to reveal consistent narrative patterns throughout the region that have helped children maneuver in a world dominated by powerful figures from parents to agents of social control political repression and global takeover Many of these stories are in some way lessons in resistance and survival in a world where the toughest kid on the block often an outsider demands that a group of children play or pay on his terms González demonstrates that where traditional strategies have proposed the model of the trickster or the paradoxically astute fool to mock the pretensions of the would be oppressor new trends indicate that the region's children and those who write for them show increasing interest in playing the game on their own terms getting to know the Other embracing difference and redefining their identity and role within the new global culture Resistance and Survival emphasizes the hope underlying this contemporary children's literature for a world in which all voices can be heard and valued the hope of an authentic happy ending [El Hierro Island](#) Pablo J. González, 2023-07-27 This book presents an in depth review of El Hierro Island the youngest and most southwesterly

volcano of the Canary Islands In October 2011 a submarine eruption started offshore El Hierro Island The 2011 2012 El Hierro eruption has probably been the best monitored and studied submarine eruption to date and has sparked interest in the study of this young ocean island volcano During the last decade multidisciplinary investigations e g on the geological and volcanological character of its past and latest onshore and offshore eruptions the geophysical and geochemical signatures of its magmatic plumbing system structure and dynamics as well as the bio geophysical interactions and consequences of submarine eruptions in the ocean have been conducted This book provides an authoritative review of many of these scientific advances as well as multiple remaining unknowns for the study of El Hierro Island and its 2011 2012 submarine eruption Such knowledge should be of great interest to specialists not only in the Canary Islands volcanism but also in similar ocean island intraplate volcanoes
