Engendered Death Joseph W. Laythe, 2011-12-16 Engendered Death Pennsylvania Women Who Kill is an historical and interdisciplinary study of women who kill in Pennsylvania from the 18th century to the present It is not an examination of what motivates women to kill although the reader may deduce that from the case studies included Instead it is an examination of how society perceives women who kill and how the gender lens is applied to them throughout the legal process in the media and in the courtroom What makes this work particularly unique is its combination of both scholarly analysis and narrative case studies As such it will appeal to both the scholar and the reader of true crime non fiction If we are to recognize the complex variables at play in all criminal offenses we will need to understand that the laws of a community its social values its politics economics and even geography play a factor in what laws are enforced and against whom they are enforced The decision to define and label certain behaviors and certain people was based on social political and economic considerations of each community Thus the commission of murder by a woman in Arizona may have a variety of factors associated with it that are not present in the case of a woman who murdered her husband in Maine This study in part because of the volume of cases and in part to limit the variables affecting the cases has limited its scope of women killers to the state of Pennsylvania Pennsylvania is the ideal state to study because of its long and stable legal and political traditions its historically diverse population and the large number of newspapers that will help us gauge the public's view of women and women who kill By limiting our scope to one state we know that the legal definitions are fairly consistent for all of the

women during a certain period and we can more easily identify the shifts in social values regarding women and homicide

Infanticide in Early Modern England Mary Della Heckmann, 2002 **Parents Killing Children** Janice

Sim, 2018-10-04 *Parents Killing Children Crossing the Invisible Line* explores hidden forms of violence within the family This socio legal study addresses the interactions between the family and the state focusing on six parent perpetrators and the ways in which child endangerment is concealed within society Drawing on symbolic interactionism mythology and a modelling of case study data this book puts forward a unique conceptualisation of representation and risk both on familial and state levels The failure of the state to intervene and neutralise volatile perpetrators also sheds light on the socio legal status of children society s most vulnerable and the book concludes by discussing means by which the underlying social conditions and maladies symptomatic of child abuse and killing should be addressed **Killing Infants** Brigitte

Bechtold, Donna Cooper Graves, 2006 Contains a collection of twelve essays about the practice of infanticide in different parts of the world This book includes a multidisciplinary bibliography of the infanticide literature Innocence and the Death

Penalty United States. Congress. Senate. Committee on the Judiciary, 1994 **Criminal Profiling** Richard N.

Kocsis, 2007-11-03 *Criminal Profiling Principles and Practice* provides a compendium of original scientific research on constructing a criminal profile for crimes that are not readily resolvable by conventional police investigative methods Leading profiling expert Richard N Kocsis PhD utilizes a distinct approach referred to as Crime Action Profiling CAP a technique that has its foundations in the disciplinary knowledge of forensic psychology The initial four chapters examine the skills accuracy components and processes surrounding the construction of a criminal profile The next two chapters focus on CAP research the methods developed for the profiling of violent crimes and describing a systematic method for the interpretation and use of the CAP models The subsequent three chapters canvass the respective CAP studies undertaken for crimes of serial rape serial sexual murder and serial arson An explanation for how each of the models is developed is also given The final chapters of the book are devoted to the geographical analysis of crime patterns and to a discussion of the format conventions and procedural guidelines for developing a criminal profile Offering a scientifically grounded method for the construction of a criminal profile *Criminal Profiling Principles and Practice* provides law enforcement personnel forensic psychologists and psychiatrists criminologists and forensic investigators with a step by step practical guide for understanding and applying CAP techniques for the construction of a criminal profile in a systematic and replicable manner *Lost Innocence* Levi Thompson, *Lost Innocence The Harrowing Stories of Juvenile Murderers* delves into the chilling realities of child killers offering a powerful and unsettling exploration of the factors that drive young people to commit acts of unspeakable violence From the tragic cases of Columbine and Lionel Tate to the devastating impact of school shootings bullying and gang violence this book unveils the dark underbelly of a society grappling with the shadows of youth crime With chilling detail and insightful analysis this book examines the psychological and sociological factors that contribute to the rise

of juvenile murderers including the impact of abuse neglect mental illness and social pressures It delves into the struggles of the juvenile justice system exploring the ethical complexities of sentencing the challenges of rehabilitation and the long term consequences of these crimes Prepare to confront the unsettling truth about the dark side of innocence and the enduring impact of violence on young lives This book is a must read for anyone seeking to understand the complexities of youth crime and the urgent need for effective prevention and intervention strategies The Death of Innocents Richard Firstman, Jamie Talan, 2011-07-13 Unraveling a twenty five year tale of multiple murder and medical deception The Death of Innocents is a work of first rate journalism told with the compelling narrative drive of a mystery novel More than just a true crime story it is the stunning expose of spurious science that sent medical researchers in the wrong direction and nearly allowed a murderer to go unpunished On July 28 1971 a two and a half month old baby named Noah Hoyt died in his trailer home in a rural hamlet of upstate New York He was the fifth child of Waneta and Tim Hoyt to die suddenly in the space of seven years People certainly talked but Waneta spoke vaguely of crib death and over time the talk faded Nearly two decades later a district attorney in Syracuse New York was alerted to a landmark paper in the literature on Sudden Infant Death Syndrome SIDS that had been published in a prestigious medical journal back in 1972 Written by a prominent researcher at a Syracuse medical center the article described a family in which five children had died suddenly without explanation The D A was convinced that something about this account was very wrong An intensive quest by a team of investigators came to a climax in the spring of 1995 in a dramatic multiple murder trial that made headlines nationwide But this book is not only a vivid account of infanticide revealed it is also a riveting medical detective story That journal article had legitimized the deaths of the last two babies by theorizing a cause for the mystery of SIDS suggesting it could be predicted and prevented and fostering the presumption that SIDS runs in families More than two decades of multimillion dollar studies have failed to confirm any of these widely accepted premises How all this happened could have happened is a compelling story of high stakes medical research in action And the enigma of familial SIDS has given rise to a special and terrible irony There is today a maxim in forensic pathology One unexplained infant death in a family is SIDS Two is very suspicious Three is homicide

All Kinds of Scary Jonina Anderson-Lopez, 2023-06-15 Horror fiction in literature film and television display a wealth of potential and appeal to diverse audiences The trope of the black man always dies first still however haunts the genre This book focuses on the latest cycle of diversity in horror fiction starting with the release of *Get Out* in 2017 which inspired a new speculative turn for the genre Using various critical frameworks like feminism and colonialism the book also assesses diversity gaps in horror fictions with an emphasis on marketing and storytelling methodology Reviewing the canon and definitions of horror may point to influences for future implications of diversity which has cyclically manifested in horror fictions throughout history This book studies works from literature film and television while acknowledging that each of the formats are distinct artforms that complement each other The author compares diverse representation in novels like The

Castle of Otranto Frankenstein Fledgling Broken Monsters and Mexican Gothic Horror films like Bride of Frankenstein It Comes at Night Us and Get Out are also examined Lastly the author emphasizes the diverse horror fictions in television like The Exorcist Fear the Walking Dead The Twilight Zone and Castle Rock *The Biopolitics of Childhood in the Long American 19th Century* Lucia Hodgson, Allison Giffen, 2025-02-28 This edited collection contends that the figure of the child is foundational to the workings of biopolitical power yet remains undertheorized The study of nineteenth century biopolitics offers a theoretical framework that promises to increase our understanding of how modern democracies manage their subjects Recent scholarship has invigorated interrogations into forms of state governance that operate at the level of population a biological phenomenon defined as a group of individuals linked by racialized fictions of biological commonality This collection seeks to recognize and position critical childhood studies as essential to these interrogations The essays theorize the role of representations of children and childhood as tools of biopolitical governance in America in the long nineteenth century They variously explore how the interrelated and overlapping qualities integral to our understandings of the child and childhood are readily deployed by biopolitical power The collection is organized into three sections that illustrate how these qualities enable the sorting of human beings into populations targeted for reform exploitation and disposal The Introduction and Chapter Six of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Murder, Medicine and Motherhood Emma Cunliffe, 2011-05-27 Since the early 1990s unexplained infant death has been reformulated as a criminal justice problem within many western societies This shift has produced wrongful convictions in more than one jurisdiction This book uses a detailed case study of the murder trial and appeals of Kathleen Folbigg to examine the pragmatics of proof beyond a reasonable doubt It explores how legal process medical knowledge and expectations of motherhood work together when a mother is charged with killing infants who have died in mysterious circumstances The author argues that Folbigg who remains in prison was wrongly convicted The book also employs Folbigg's trial and appeals to consider what lessons courts have learned from prior wrongful convictions such as those of Sally Clark and Angela Cannings The author's research demonstrates that the Folbigg court was misled about the state of medical knowledge regarding infant death and that the case proceeded on the incorrect assumption that behavioural and scientific evidence provided independent proofs of guilt Individual chapters critically assess the relationships between medical research and expert testimony the operation of unexamined cultural assumptions about good mothering and the manner in which contested cases are reported by the press as overwhelming
