Émile Biémont, 2024-07-12 This book introduces readers to the astonishing civilisation of the Incas. Its novelty lies in its general but highly informative synthesis of their history and astronomy through the accounts of contemporary chronicles and recent archaeological findings. Richly illustrated with the author's own photographs, it will attract the attention of seasoned travellers interested in ancient civilisations and keen to discover what people were capable of achieving so long ago, but also any reader interested in the history and prehistory of South American peoples, including students or university researchers wanting to know more about the pre-Columbian civilizations of Peru. The Inca civilisation was in fact the culmination of cultural contributions from a dozen or so complex pre-Columbian civilizations such as those of Chavín, Nazca, Wari or Tiwanaku. Intensely spiritual, the Inca people attributed metaphysical powers to all manner of objects and places they considered sacred, but at the same time the numerous alignments in their buildings show that they result from careful observations of the Sun, the Moon and the stars at different times of the year. Indeed, the Incas were an essentially agrarian people, so time measurement and calendar devices were essential for the purely pragmatic problem of planning agricultural tasks during the tropical year. The book sets out to describe the Incas in their historical and geographical context, avoiding specialization or excessive technicality, but retaining a certain scientific rigor and including a detailed consideration of their interest in the sky and astronomy.

The White Rock Hugh Thomson, 2003-12-30 An explorer searches the Peruvian Andes for a lost ruin in a gem of a book that transcends the travel writing genre with fascinating Inca history. Los Angeles Times. A New York Times Notable Book. With the backdrop of the ever-intriguing Andes mountains, Hugh Thomson explores the intoxicating history of the Inca people and their heartland. The author, an acclaimed documentary filmmaker and explorer, expertly weaves accounts of his own discoveries and brushes with danger with the history of those who preceded him, including the explorer Hiram Bingham who discovered Machu Picchu, the twentieth-century South American photographer Martín Chambi, the poet Pablo Neruda, and the Spanish conquistadores who destroyed the Inca civilization and the eccentric characters he meets on his travels. Following in the footsteps of the explorers Gene Savoy and Hiram Bingham, Thomson set off into the jungle to find the lost city of Llactapat. This is the story of his journey to discover it via the interconnecting paths the Incas laid across the Andes.

The Destruction of the Inca Civilization Alexis Burling, 2017-12-15 At its peak in the early fifteenth century, the Inca Empire consisted of approximately twelve million people and stretched from the northern border of Ecuador to central Chile. In 1532, the Spanish arrived and invaded Inca territory, setting off a genocide. By 1535, the empire was destroyed. In this book, readers can learn about the accomplishments of the Inca people, their network of roads, irrigation systems, and hidden city of Machu Picchu, and their brutal slaughter. Assets include an illuminating main text and sidebars, a timeline featuring key dates, and a special feature highlighting ways readers can fight against hate.
