The Mystery of Doggerland Graham Phillips, 2023-07-25 A scientific exploration of the advanced ancient civilization known as Doggerland or Fairland that

disappeared 5 000 years ago Looks at the latest archaeological and scientific evidence preserved beneath the North Sea and on the tiny island of Fair Isle Examines Doggerland s sophisticated technology including how its people were able to melt solid rock to create vitrified structures far stronger than concrete Shows how the survivors of the destruction of Doggerland sailed to the British Isles and established the megalithic culture that built Stonehenge New marine archaeological evidence has revealed the remains of a large landmass to the north of Britain that hosted an advanced civilization 1 000 years before the recognized first civilizations of ancient Egypt Mesopotamia or India Remembered in Celtic legends as Tu lay and referred to by geologists as Doggerland or Fairland this civilization began at least as early as 4000 BCE but was ultimately destroyed by rising sea levels huge tsunamis and a terrible viral epidemic released from melting permafrost during a cataclysmic period of global warming Exploring the latest archaeological findings and recent scientific analysis of Doggerland s underwater remains Graham Phillips shows that this ancient culture had sophisticated technology and advanced medical knowledge He looks at evidence detected with remote sensing and seismic profiling of many artificial structures complex settlements gigantic earthworks epic monoliths and huge stone circles dated to more than 5 500 years ago preserved beneath the ground and on the ocean floor He also looks at the small part of the Fairland landmass that still exists Fair Isle a tiny island some 45 miles north of the Orkney Islands of Scotland Phillips shows how when Fairland sank beneath the waves around 3100 BCE its last survivors traveled by boat to settle in the British Isles where they established the megalithic culture that built Stonehenge Revealing the vast archaeological evidence in support of the existence of Doggerland as well as its threads of influence in early cultures around the world Phillips also shows how the fate of this sophisticated ancient culture is a warning from history the cataclysmic events that happened to the first civilizations could happen again as the world heats up **The Sundisk** Gail Logan,2005-11 There is a legend that if one gazes at the horizon from the summit of the mountain he will glimpse the land from whence we came The writings of Colonel James Churchward and his lifetime search for the lost land of Mu were the inspiration for *The Sundisk* In her debut novel Gail Logan takes her characters on an emotional and spiritual quest for this lost world where Eden like splendor melds with the grandeur of a golden age Through their quest for the forgotten island a remnant of the fabulous continent of Mu the characters reach deep within themselves to make a spiritual discovery of the place Logan s work suggests that the fabulous lost continent may emerge again when men mend their differences live in peace with themselves and respect the beauty of the natural world *Contesting Earth's History in Transatlantic Literary Culture, 1860-1935* Richard Fallon,2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth s deep history from the planet s molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience s unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected

scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurors of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes

The Great Flood Edward Platt,2019-10-31 A BBC Radio 4 Book of the Week Flooding has always threatened the rainy wind swept islands of the United Kingdom but it is becoming more frequent and more severe Combining travel writing and reportage with readings of history literature and myth Edward Platt explores the way floods have shaped the physical landscape of Britain and left their mark on its inhabitants During the course of two years which coincided with the record breaking floods of the winter of 2013 14 Platt travelled around the country visiting places that had flooded and meeting the people affected He visited flooded villages and towns and expanses of marsh and Fen threatened by the winter storms and

travelled along the edge of the drowned plain that used to connect Britain to continental Europe He met people struggling to stop their houses falling into the sea and others whose homes had been engulfed He investigated disasters natural and man made and heard about the conflicting attitudes towards those charged with preventing them The Great Flood dramatizes the experience of being flooded and considers what will happen as the planet warms and the waters rise illuminating the reality behind the statistics and headlines that we all too often ignore
