Luftwaffe Secret Projects Fighters 1939-1945:

Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945 Dan Sharp, 2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion. Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them. As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor. And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft. Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen. They proposed rotating wing ramjet fighters, arrowhead shaped ramjets, rocket firing bat winged gun platforms, sleek speed machines, tailless flying wings, tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors. *Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945* by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs, illustrations and period documentation from archives around the world. *Luftwaffe Secret Projects* Walter Schick, Ingolf Meyer, 1997

Designs from Germany's aerodynamics engineers detail proposed military aircraft including wing span and area, aspect ratio, length, height, weight, speed and armament. *Luftwaffe Emergency Fighters* Robert Forsyth, 2017-06-29 In late 1944 the German Air Ministry organised what it called an Emergency Fighter Competition intended to produce designs for quick to build yet technically and tactically effective jet fighter aircraft capable of tackling the anticipated arrival of the B 29 Superfortress over Europe as well as the British Mosquito and US P 38 Lightning which were appearing in ever greater numbers. Thus was born a cutting edge highly sophisticated series of aircraft including the futuristic and elegant Focke Wulf Ta 183, the extraordinary Blohm und Voss P 212 and the state of the art Messerschmitt P 1101 series. Armed with heavy cannon and the latest air to air rockets and missiles, these were designed to inflict carnage on American bomber formations at high speed. Using stunning three view illustrations of each prototype along with full colour artwork, aviation expert Robert Forsyth traces the history of the extraordinary aircraft of the Emergency Fighter Competition. Hitler's last throw of the dice in the air war against the Allies. **British Special Projects** Bill Rose, 2021-01-28 An insight into British ambitious and often unrealistic aspirations to stay at the forefront of advanced technology such as the development of the atomic powered warplane. The world's first military flying wing was a British design that saw operational service during the First World War. A manned rocket ship launched from a converted V bomber was proposed capable of reaching the edge of space. Beautifully illustrated with many rare and unpublished photographs. Of interest to aviation and military historians, modellers, gamers and

flight simulator enthusiasts Flying wings deltas and tailless aircraft continue to generate enormous interest within the aviation community and many of the older designs still look surprisingly futuristic British Special Projects Flying Wings Deltas and Tailless Designs examines the lesser known and frequently secret British projects undertaken for research or military purposes during the last century and also covers those aircraft that were built and in some cases entered service The first commercially successful British flying wing biplane designed by John Dunne undertook limited military reconnaissance duties during the First World War Various flying wings followed but the German development of the delta would prove massively influential with post war British aerodynamicists immediately recognising the potential for a new generation of high performance designs Parallel research into advanced flying wings would produce plans for the superb looking Barnes Wallace supersonic swing wing bomber although his design was too far ahead of its time to progress any further There were also dead end projects for bombers powered by atomic propulsion vertical take off concepts and over ambitious ideas for British spacecraft that utilised delta and blended wing bodies but were too technically challenging and costly to develop further Nevertheless many of these designs that stemmed from the simple flying wing remain influential today **Luftwaffe Secret Projects** Dieter Herwig, Heinz Rode, 2000 This eagerly awaited companion volume to the enormously popular volume on fighters looks at the might have been strategic German bombers Filled with transatlantic jets and projects that were on the drawing board or in prototype form at the war s end Full color action illustrations in contemporary markings and performance data tables show vividly what might have been achieved had the war continued beyond 1945 *Germany and the Second World War* Horst Boog, Gerhard Krebs, Detlef Vogel, 2006-05-04 By the spring of 1943 after the defeat at Stalingrad the writing was on the wall But while commanders close to the troops on Germany s various fronts were beginning to read it those at the top were resolutely looking the other way This seventh volume in the magisterial 10 volume series from the Milit rgeschichtliches Forschungsamt Research Institute for Military History shows both Germany and her Japanese ally on the defensive from 1943 into early 1945 It looks in depth at the strategic air war over the Reich and the mounting toll taken in the Battles of the Ruhr Hamburg and Berlin and at the Battle of the Radar Sets so central to them all The collapse of the Luftwaffe in its retaliatory role led to hopes being pinned on the revolutionary V weapons whose dramatic but ultimately fruitless achievements are chronicled The Luftwaffe s weakness in defence is seen during the Normandy invasion Operation overlord an account of the planning preparation and execution of which form the central part of this volume together with the landings in the south of France the setback suffered at Arnhem and the German counter offensive in the Ardennes The final part follows the fortunes of Germany s ally fighting in the Pacific Burma Thailand and China with American forces capturing islands ever closer to Japan s homeland and culminates in her capitulation and the creation of a new postwar order in the Far East The struggle between internal factions in the Japanese high command and imperial court is studied in detail and highlights an interesting contrast with the intolerance of all dissent that typified the Nazi power structure Based on

meticulous research by MGFA's team of historians at Potsdam this analysis of events is illustrated by a wealth of tables and maps covering aspects ranging from Germany's radar defence system and the targets of RAF Bomber Command and the US 8th Air Force through the break out from the Normandy beachhead to the battles for Iwo Jima and Okinawa **Secret**

Projects of the Luftwaffe - Vol 2 Dan Sharp, 2024-06-03 The story of Germany's WW2 bomber development programmes

Germany and the Second World War, 1990 Volume VII of the Germany and the Second World War series looks at Germany and her Japanese ally on the defensive after the tide of war turned in 1943 An exhaustive study of the air war over the Reich and the Luftwaffe's growing impotence is followed by an account of the invasion of occupied France and the Allies advance to Germany's borders A final section examines Japan's defeat and capitulation and the creation of a new order in the Far East **Old Lessons New Thoughts...**, **Arado Ar 234 A** J. Richard Smith, Eddie J. Creek, 2006 The Arado Ar 234 was the first purpose built jet bomber Although the prototypes were completed largely by the end of 1941 delays in the supply of the engines meant that it was not until July 1943 that the type first flew By the end of the war more than 220 of the type had been constructed although only a small proportion of these had actually entered service The first of Midland Publishing's new Military Aircraft in Detail series provides a detailed history of the development and operation of the Ar 234 supported by many photos line drawings and specially commissioned artworks The camouflage schemes applied to the aircraft are also examined many of the illustrations are previously unpublished making the book an essential addition to the limited range of publications available on this important aircraft type Aimed specifically at the aviation modeler and those interested in the history of the Luftwaffe this first volume gets the new Military Aircraft in Detail series off to a good start and adds greatly to our knowledge of one of the most advanced aircraft which saw service during World War II
