Capano,Maria Ines Pascariello,Massimo Visone,2018-10 This volume proposes a rich corpus of papers about the Other City a subject only few times dealt with but worthy of all our attention it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality Throughout history the city has always had to deal with social otherness i.e. with class privileges and consequently with discrimination and marginalization of minorities of the less well off of foreigners in short with the differences in status culture religion So that the urban fabric has ended up structuring itself also in function of those inequalities as well as of the strategic places for the exercise of power of the political military or social control of the spaces for imprisonment for the sanitary isolation or for the temporary remedy to the catastrophes From the first portraits of cities made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes which often through increasingly refined graphic techniques distort or even deny the true urban image we reach at the dawn of contemporary history the new meaning given by scientific

topography and new methods of representation these latter aimed at revealing the structure and the urban landscape in their objectivity often unexpected for who had known the city through the filter of regime iconography The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities other times rejects them showing the unease of a difficult integration
