Macaca Mulatta Enzyme Histochemistry Of The Nervous System:

Macaca mulatta Sohan Manocha, 2012-12-02 *Macaca mulatta Enzyme Histochemistry of the Nervous System* focuses on the enzyme architecture of the rhesus monkey *Macaca mulatta* brain both at the gross and the microscopic levels. Composed of 12 chapters, this book provides a complete topographical map of the distribution of several enzymes with respect to the neuroanatomical structures. It provides measurement and comparison of the relative sites and concentrations of enzymes in different cytoarchitectural areas in the brain: cerebellum, spinal cord, dorsal root ganglia, olfactory bulb, and eyes. Particular attention is placed on the distribution of a few hydrolytic and oxidative enzymes. This reference material will be valuable to students, teachers, and research workers in neuroanatomy, histochemistry, neurophysiology, neuropathology, animal behavior, and other related fields.

Methods in Neurobiology Robert Lahue, 2013-11-21 Rapid advances in knowledge have led to an increasing interest in neurobiology over the last several years. These advances have been made possible at least in part by the use of increasingly sophisticated methodology. Furthermore, research in the most rapidly advancing areas is essentially multidisciplinary and is characterized by contributions from many investigators employing a variety of techniques. While a grasp of fundamental neurobiological concepts is an obvious prerequisite for those who wish to follow or participate in this field, critical awareness and evaluation of neurobiological research also requires an understanding of sophisticated methodologies. The objective of *Methods in Neurobiology* is the development of such critical abilities. The reader is exposed to the basic concepts, principles, and instrumentation of key methodologies, and the application of each methodology is placed in the special context of neurobiological research. The reader will gain familiarity with the terminology and procedures of each method and the ability to evaluate results in light of the particular features of neurobiological preparations and applications.

Diese Hüllen sind aber immer zellgewebeartiger Natur." 1836 p. 162. In some illustrations of the above-mentioned paper, the nuclei of the satellite cells adjacent to the surface of the nerve cell body both in the trigeminal ganglion and in the ganglia of the vegetative nervous system are clearly shown. Fig. 1A. The author, however, misinterpreted these nuclei as pigment granules (Pigmentkörperchen). A little later, Remak (1838) denied the existence of the

perineuronal cell sheath This prompted a ready reply from Valentin 1839 who offered a more detailed description of the perineuronal cell sheath illustrated it with new drawings Fig IB and gave a correct interpretation of the nuclei In fact he wrote Fig IA B Nerve cell bodies of sympathetic ganglia with the nuclei of the satellite cells on the neuronal surface Redrawn from Valentin A 1836 B 1839 *Research Grants Index* National Institutes of Health (U.S.).
