Foundations of Public Law Martin Loughlin, 2012-09-27 Foundations of Public Law offers an account of the formation of the discipline of public law with a view to identifying its essential character explaining its particular modes of operation and specifying its unique task Building on the framework first outlined in The Idea of Public Law OUP 2003 the book conceives public law broadly as a type of law that comes into existence as a consequence of the secularization rationalization and positivization of the medieval idea of fundamental law Formed as a result of the changes that give birth to the modern state public law establishes the authority and legitimacy of modern governmental ordering Public law today is a universal phenomenon but its origins are European Part I of the book examines the conditions of its formation showing how much the concept borrowed from the refined debates of medieval jurists Part II then examines the nature of public law Drawing on a line of juristic inquiry that developed from the late sixteenth to the early nineteenth centuries extending from Bodin Althusius Lipsius Grotius Hobbes Spinoza Locke and Pufendorf to the later works of Montesquieu Rousseau Kant Fichte Smith and Hegel it presents an account of public law as a special type of political reason The remaining three Parts unpack the core elements of this concept state constitution and government By taking this broad approach to the subject Professor Loughlin shows how rather than being viewed as a limitation on power law is better conceived as a means by which public power is generated And by explaining the way that these core elements of state constitution and government were shaped respectively by the technological bourgeois and disciplinary revolutions of the sixteenth century through to the nineteenth century he reveals a concept of public law of considerable ambiguity complexity and resilience

Neumann, 1999 The field of international relations has recently witnessed a tremendous growth of interest in the theme of identity and its formation construction and deconstruction In *Uses of the Other* Iver B. Neumann demonstrates how thinking about identity in terms of the self and other may prove highly useful in the study of world politics Neumann begins by tracing

the four different paths along which this thinking has developed during this century ethnographic psychological Continental philosophical and Eastern excursion and he shows how these blended at the margins of the discipline of international relations at the end of the 1980s There follow several incisive readings of European identity formations on the all European regional and national levels The theme that draws these readings together is how the East is used as a sign of otherness at all three levels Whereas previous studies framed this process as part of colonial and postcolonial developments this book suggests that Easternness is also present as a marker in contemporary discourses about Russia Turkey Central Europe and Bashkortostan among others
