Machine Politics In Transition:

Machine Politics in Transition Thomas M. Guterbock, 1980-03-01 Since 1932 elections and decision making in Chicago have been dominated by the Regular Democratic Organization of Cook County led for a quarter of a century by the late Mayor Richard J. Daley. The extraordinary longevity of this Democratic machine provides the basis for this penetrating investigation into the nature of machine politics and grassroots party organization. For three years Thomas M. Guterbock participated in the daily activities of the Regular Democratic Organization in one North Side Chicago ward in order to discover how political machines win the support of the urban electorate. Guterbock's participant observation data, supplemented by a sample survey of ward residents' attitudes toward and contacts with the machine, provide convincing evidence that the most widely accepted notions of how political machines work are no longer correct. Contrary to conventional wisdom about the machine, Guterbock finds that the party does not secure votes by doing favors for people nor do services rendered determine actual voting behavior. Instead, party loyalty is governed by such factors as social status, educational achievement, and bureaucratic competence. Guterbock finds that Democratic loyalists are drawn disproportionately from the ward's lowest strata. Ironically, the characteristics of these loyal Democrats contrast sharply with the characteristics of those most likely to use party services. What keeps the machine going, then? To answer this question, Guterbock takes us behind the scenes for a unique look inside the ward club. He shows how members develop loyalty and motivation beyond concern for their own pocketbooks. And he analyzes the public involvement of machine politicians in neighborhood affairs, describing the skillful, sometimes devious ways in which they appeal to their constituents' sense of community. By focusing on the interplay of party loyalty and community attachments, Guterbock is able to explain the continued hegemony of Chicago's political machine and its enduring image of legitimacy.

City Politics, Pearson eText
Dennis R. Judd, 2015-09-16 This text provides a foundation for understanding the politics of America's cities and urban regions. Praised for the clarity of its writing, careful research, and distinctive theme that urban politics in the United States has evolved as a dynamic interaction among governmental power, private actors, and a politics of identity, *City Politics* remains a classic study of urban politics.

Electoral Politics and Africa's Urban Transition Noah L. Nathan, 2019-02-28 Two aspects of contemporary urban life in Africa are often described as sources of political change: the emergence of a large urban middle class and high levels of ethnic diversity and inter-ethnic social contact. Many expected that these factors would help spark a transition away from ethnic competition and clientelism toward more programmatic elections. Focusing on urban Ghana, this book shows that the growing middle class and high levels of ethnic diversity are not having the anticipated political effects. Instead, urban Ghana is stuck in a trap: clientelism and ethnic voting persist in many urban neighborhoods despite changes to the socio-economic characteristics and policy preferences of voters. Through a unique examination of intra-urban variation in patterns of electoral competition, Nathan explains why this trap exists, demonstrates its effects on political

behavior and explores how new democracies like Ghana can move past it **Handbook on Urban Social Movements** Anna Domaradzka, Pierre Hamel, 2024-01-18 Providing an overview of urban social movements from a diverse range of both empirical and theoretical perspectives this Handbook includes not only a critical analysis of the transformations that have occurred in the urban landscape recently but also sheds light on the strategies implemented by social actors in various socio political and cultural contexts It focuses on understanding better how and to what extent collective action around urban issues remains relevant in our modern world This title contains one or more Open Access chapters **Migrants and Machine Politics** Adam Michael Auerbach, Tariq Thachil, 2023-01-03 How poor migrants shape city politics during urbanization As the Global South rapidly urbanizes millions of people have migrated from the countryside to urban slums which now house one billion people worldwide The transformative potential of urbanization hinges on whether and how poor migrants are integrated into city politics Popular and scholarly accounts paint migrant slums as exhausted by dispossession subdued by local dons bought off by wily politicians or polarized by ethnic appeals Migrants and Machine Politics shows how slum residents in India routinely defy such portrayals actively constructing and wielding political machine networks to demand important albeit imperfect representation and responsiveness within the country s expanding cities Drawing on years of pioneering fieldwork in India s slums including ethnographic observation interviews surveys and experiments Adam Michael Auerbach and Tariq Thachil reveal how migrants harness forces of political competition as residents voters community leaders and party workers to sow unexpected seeds of accountability within city politics This multifaceted agency provokes new questions about how political networks form during urbanization In answering these questions this book overturns longstanding assumptions about how political machines exploit the urban poor to stifle competition foster ethnic favoritism and entrench vote buying By documenting how poor migrants actively shape urban politics in counterintuitive ways Migrants and Machine Politics sheds new light on the political consequences of urbanization across India and the Global South **Rainbow's End** Steven P. Erie, 1990-08-09 Unprecedented in its scope Rainbow s End provides a bold new analysis of the emergence growth and decline of six classic Irish American political machines in New York Jersey City Chicago San Francisco Pittsburgh and Albany Combining the approaches of political economy and historical sociology Erie examines a wide range of issues including the relationship between city and state politics the manner in which machines shaped ethnic and working class politics and the reasons why centralized party organizations failed to emerge in Boston and Philadelphia despite their large Irish populations The book ends with a thorough discussion of the significance of machine politics for today s urban minorities Class and Space (RLE Social Theory) Nigel Thrift, Peter Williams, 2014-09-04 This book is about the place of space in the study of class formation It consists of a set of papers that fix on different aspects of the human geography of class formation at different points in the history of Britain and the United States over the course of the last 200 years The book shows that the geography of class formation is a valuable and cross disciplinary tool in the study of

modern societies integrating the work of human geographers with that of social historians sociologists social anthropologists and other social scientists in an enterprise which emphasises the essential unity of social science Political Science
