"A Curious Machine" Arseny Ermakov,Glen O'Brien,2023-09-28 In his sermon What Is Man John Wesley spoke of the human being as a curious machine reflecting the eighteenth century view of the person as a set of complex mechanisms animated by the soul The rapid rate of technological development in recent decades is opening toward a future in which the centrality and uniqueness of human beings is undergoing a shift Developments in robotics artificial intelligence surveillance autonomous weapons human enhancement and genetic modification raise an array of questions for the Christian tradition The awareness of the negative impact of human activity on the natural environment is challenging the traditional view of humanity as having a uniquely privileged role at the heart of creation This collection of essays addresses Wesleyan and broadly Christian voices that explore the theological philosophical biblical ethical and practical implications of emerging technologies their impact upon different aspects of human life and the possibilities that are opening up toward a posthuman future

The Mental Health of Gifted Intelligent Machines John Senior,Éva Gyarmathy,2024-02-13 The Mental Health of Gifted Intelligent Machines explores the increasingly sophisticated behaviours of developing AI and how we can ensure it will have emotional resilience ethical strength and an ability to think in a new and enhanced way Its primary aim is to change how we understand the world by investigating humanity as an intelligent being examining and contrasting human and artificial intelligence The book considers what we can learn from the likely mental health issues that will occur with increasingly sophisticated aspects of machine intelligence and how they will reflect the human condition It asks questions about our identity in a deeply uncertain and disruptive ever changing world how we will improve and enhance our psychological intelligence to meet the increasing complications and demands of the future and what we need to do now to be psychologically intelligent enough to live a full meaningful life in a new world evolving around us The book argues that changes in our understanding of mental health psychology and our view of intelligence will challenge huge aspects of our fundamental beliefs and assumptions and that it is essential we explore new arenas to further understand both our own human psychological issues and mental health as we develop gifted intelligent machines It is a must read for all students researchers and professionals involved with AI gifted education consciousness and mental health
