Making And Selling Of Post Mao Beijing:

The Making and Selling of Post-Mao Beijing Anne-Marie Broudehoux, 2004 Describes the changing life of the city and its inhabitants during the final decades of the twentieth century and examines the complex forces at play in the search for modernity The author presents us with four case studies of how the city is marketing and selling itself including its refurbishment for the 2008 Olympic bid and concludes that Beijing's urban image construction may provide an avenue for opposition groups to challenge the hegemony of those in power

Handbook on Urban Development in China Ray Yep, June Wang, Thomas Johnson, 2019 The trajectory and logic of urban development in post Mao China have been shaped and defined by the contention between domestic and global capital central and local state and social actors of different class status and endowment This urban transformation process of historic proportion entails new rules for distribution and negotiation novel perceptions of citizenship as well as room for unprecedented spontaneity and creativity Based on original research by leading experts this book offers an updated and nuanced analysis of the new logic of urban governance and its implications

Olympic Cities John Gold, Margaret M Gold, 2016-07-11 The first edition of Olympic Cities published in 2007 provided a pioneering overview of the changing relationship between cities and the modern Olympic Games This substantially revised and enlarged third edition builds on the success of its predecessors The first of its three parts provides overviews of the urban legacy of the four component Olympic festivals the Summer Games Winter Games Cultural Olympiads and the Paralympics The second part comprises systematic surveys of seven key aspects of activity involved in staging the Olympics finance place promotion the creation of Olympic Villages security urban regeneration tourism and transport The final part consists of nine chronologically arranged portraits of host cities from 1936 to 2020 with particular emphasis on the six Summer Olympic and Paralympic Games of the twenty first century As controversy over the growing size and expense of the Olympics with associated issues of accountability and legacy continues unabated this book's incisive and timely assessment of the Games development and the complex agendas that host cities attach to the event will be essential reading for a wide audience This will include not just urban and sports historians urban geographers event managers and planners but also anyone with an interest in the staging of mega events and concerned with building a better understanding of the relationship between cities sport and culture

[The Routledge Research Companion to Planning and Culture](#) Greg Young, 2016-03-23 It has become increasingly evident that effective planning for sustainable communities environments and economies pivots on the ability of

planners to see the possibilities for culture in comprehensive social historical and environmental terms and to more fully engage with the cultural practices processes and theorisation that comprise a social formation More broadly an approach to planning theory and practice that is itself formed through a close engagement with culture is required This Research Companion brings together leading experts from around the world to map the contours of the relationship between planning and culture and to present these inextricably linked concepts and issues together in one place By examining significant trends in varying national and international contexts the contributors scrutinise the theories and practices of both planning and culture and explore not only their interface but significant divergences and tensions In doing so this collection provides the first comprehensive overview and analysis of planning and culture interdisciplinary and international in scope It is comprised of six parts organised around the themes of global and historical contexts key dimensions of planning and cultural theory and practice and cultural and planning dynamics Each section includes a final chapter that provides a case study lens which pulls the themes of the section together with reference to a significant planning issue or initiative

Building Globalization Xuefei Ren, 2011-04-15 From the years 2004 to 2008 Beijing and Shanghai witnessed the construction of an extraordinary number of new buildings many of which were designed by architectural firms overseas Combining ethnographic fieldwork historical research and network analysis *Building Globalization* closely scrutinizes the growing phenomenon of transnational architecture and its profound effect on the development of urban space Roaming from construction sites in Shanghai to architects offices in Paris Xuefei Ren interviews hundreds of architects developers politicians residents and activists to explore this issue She finds that in the rapidly transforming cities of modern China iconic designs from prestigious international architects help private developers to distinguish their projects government officials to advance their careers and the Chinese state to announce the arrival of modern China on the world stage China leads the way in the globalization of architecture a process whose ramifications can be felt from Beijing to Dubai to Basel Connecting the dots between real estate speculation megaproject construction residential displacement historical preservation housing rights and urban activism *Building Globalization* reveals the contradictions and consequences of this new global urban frontier

Planet of Slums Mike Davis, 2007-09-17 According to the united nations more than one billion people now live in the slums of the cities of the South In this brilliant and ambitious book Mike Davis explores the future of a radically unequal and explosively unstable urban world From the sprawling barricadas of Lima to the garbage hills of Manila urbanization has been disconnected from industrialization and even from economic growth Davis portrays a vast humanity warehoused in shantytowns and exiled from the formal world economy He argues that the rise of this informal urban proletariat is a wholly unforeseen development and asks whether the great slums as a terrified Victorian middle class once imagined are volcanoes waiting to erupt

Modernization, Urbanization and Development in Latin America, 1900s - 2000s Arturo Almandoz, 2014-10-10 In this book Arturo Almandoz places the major episodes of Latin America s twentieth and early twenty

first century urban history within the changing relationship between industrialization and urbanization modernization and development This relationship began in the early twentieth century when industrialization and urbanization became significant in the region and ends at the beginning of the twenty first century when new tensions between liberal globalization and populist nationalism challenge development in the subcontinent much of which is still poverty stricken Latin America s twentieth century modernization and development are closely related to nineteenth century ideals of progress and civilization and for this reason Almandoz opens with a brief review of that legacy for the different countries that are the focus of his book Mexico Chile Brazil Argentina and Venezuela but with references to others He then explores the regional distortions which resulted from the interaction between industrialization and urbanization and how the imbalance between urbanization and the productive system helps to explain why take off was not followed by the drive to maturity in Latin American countries He suggests that the close yet troublesome relationship with the United States the recurrence of dictatorships and autocratic regimes and Marxist influences in many domains are all factors that explain Latin America s stagnation and underdevelopment up to the so called lost decade of 1980s He shows how Latin America s fate changed in the late twentieth and early twenty first century when neoliberal programmes political compromise and constitutional reform dismantled the traditional model of the corporate state and centralized planning He reveals how economic growth and social improvements have been attained by politically left wing yet economically open market countries while others have resumed populism and state intervention All these trends make up the complex scenario for the new century especially when considered against the background of vibrant metropolises that are the main actors in the book

Homeland Yael Allweil, 2016-09-19 As Yael Allweil reveals in her fascinating book housing has played a pivotal role in the history of nationalism and nation building in Israel Palestine She adopts the concept of homeland to highlight how land and housing are central to both Zionism and Palestinian nationalism and how the history of Zionist and Palestinian national housing have been inseparably intertwined from the introduction of the Ottoman Land Code in 1858 to the present day

Remaking the San Francisco-Oakland Bay Bridge Karen Trapenberg Frick, 2015-08-14 Winner of TransportiCA s September Book Club Award 2018 On 17 October 1989 one the largest earthquakes to occur in California since the San Francisco earthquake of April 1906 struck Northern California Damage was extensive none more so than the partial collapse of the San Francisco Oakland Bay Bridge s eastern span a vital link used by hundreds of thousands of Californians every day The bridge was closed for a month for repairs and then reopened to traffic But what ensued over the next 25 years is the extraordinary story that Karen Trapenberg Frick tells here It is a cautionary tale to which any governing authority embarking on a megaproject should pay heed She describes the process by which the bridge was eventually replaced as an exercise in shadowboxing which pitted the combined talents and shortcomings partnerships and jealousies ingenuity and obtuseness generosity and parsimony of the State s and the region s leading elected officials engineers architects and other members of the governing

elites against a collectively imagined future catastrophe of unknown proportions In so doing she highlights three key questions If safety was the reason to replace the bridge why did it take almost 25 years to do so How did an original estimate of 250 million in 1995 soar to 6.5 billion by 2014 And why was such a complex design chosen Her final chapter part epilogue part reflection provides recommendations to improve megaproject delivery and design
