The SAGE Handbook of the Philosophy of Social Sciences Ian C Jarvie, Jesus Zamora-Bonilla, 2011-02-17 what is the relationship between the social sciences and the natural sciences where do today s dominant approaches to doing social science come from what are the main fissures and debates in contemporary social scientific thought how are we to make sense of seemingly contrasting approaches to how social scientists find out about the world and justify their claims to have knowledge of it In this exciting handbook Ian Jarvie and Jes s Zamora Bonilla have put together a wide ranging and authoritative overview of the main philosophical currents and traditions at work in the social sciences today Starting with the history of social scientific thought this handbook sets out to explore that core fundamentals of social science practice from issues of ontology and epistemology to issues of practical method Along the way it investigates such notions as paradigm empiricism postmodernism naturalism language agency power culture and causality Bringing together in one volume leading authorities in the field from around the world this book will be a must have for any serious scholar or student of the social sciences

Magic, Science and Society Alex Dennis, 2024-06-14 Magic Science and Society investigates the way the rationality debate has developed over the last century from E E Evans Pritchard s study of Azande magic through Peter Winch s argument that there can be no such thing as a social science across the arguments about the proper status of science in the 1970s and 1980s to the epistemological and ontological turns of the early twenty first century Different people have different understandings of what is rational some practise magic some orientate to legal convention and tradition and others defer to science and logic Starting with anthropological studies of witchcraft and working through to contemporary debates about epistemology and ontology in social science this book systematically examines the ways key questions about these issues have been framed and answered These include Can magic be real either for members of the cultures that practise it or more generally How can we arbitrate between different types of rationality Is science a benchmark for studying other forms of rationality or just a cultural practice like any other What are the implications of these issues for the social sciences themselves This book will be of interest to anthropologists sociologists philosophers of the social sciences and science studies practitioners

Contingency Planning for Animal Diseases , 2014-03-17 Outbreaks of infectious animal diseases within the last 10 15 years in areas with intensive livestock production have shown how vulnerable the production systems can be when confronted with an outbreak of a highly infectious disease such as avian influenza foot and mouth disease or classical swine fever The veterinary administrations of the Nordic and Baltic countries have established contingency plans the objectives of the plans include to protect animal and human health to minimize economic loss for the

livestock sector and the society as a whole to minimize damage to the environment This publication provides information on measures to be considered in contingency planning the measures take into account the pre epidemic period disease prevention the epidemic period disease eradication the post epidemic period regaining of animal health status **Systems**

Theory and the Sociology of Health and Illness Morten Knudsen, Werner Vogd, 2014-10-30 Modern societies and organizations are characterized by multiple kinds of observations systems or rationalities rather than singular identities and clear hierarchies This holds true for healthcare where we find a range of different perspectives from medicine to education from science to law from religion to politics brought together in different types of arrangements This innovative volume explores how this polycontextuality plays out in the healthcare arena Drawing on systems theory and Luhmann's theory of social systems as communicative systems in particular the contributors investigate how things drugs for example and bodies are observed and constructed in different ways under polycontextual conditions They explore how the different types of communication and observation are brought into workable arrangements without becoming identical or reconciled and discuss how health care organizations observe their own polycontextuality Providing an analysis of healthcare structures that is up to speed with the complexity of healthcare today this book shows how society and its organizations simultaneously manage contexts that do not fit together It is an important work for those with an interest in health and illness social theory Niklas Luhmann organizations and systems theory from a range of backgrounds including sociology health studies political science and management **Handbook of the Sociology of Mental Health** Carol S. Aneshensel, Jo C. Phelan, Alex

Bierman, 2012-07-16 This second edition of the Handbook of the Sociology of Mental Health features theory driven reviews of recent research with a comprehensive approach to the investigation of the ways in which society shapes the mental health of its members and the lives of those who have been diagnosed as having a mental illness The award winning Handbook is distinctive in its focus on how the organization and functioning of society influences the occurrence of mental disorder and its consequences A core issue that runs throughout the text concerns the differential distribution of mental illness across various social strata defined by status characteristics such as gender race ethnicity socioeconomic status and age The contributions to this volume shed light on the social cultural and economic factors that explain why some social groups have an elevated risk of disorder They also address the social repercussions of mental disorder for individuals including stigmatization within the larger society and for their families and social networks The second edition of this seminal volume includes substantial updates to previous chapters as well as seven new chapters on The Individual's Experience of Mental Illness The Medicalization of Mental Illness Age Aging and Mental Health Religion and Mental Health Neighborhoods and Mental Health Mental Health and the Law and Public Beliefs about Mental Illness Systems Research in Health Care, Biocybernetics and Ecology G.E.
