Nietzsches Reclamation Of Philosophy:

Nietzsche's Reclamation of Philosophy Kathleen J. Wininger, 2022-02-22 Nietzsche is famous for rejecting a great many standard philosophical methods. He does this on the basis of critical assessments of these methods. Nietzsche's historical critiques are justly famous, but the question of what his new philosophy is often not explored. The important issue is what Nietzsche believed were some of the possibilities left for philosophy if his criticisms of previous philosophies were correct. This book is called *The Reclamation of Philosophy* because Nietzsche is engaged in a task of reappropriating certain characteristics of past philosophies into his work. He reclaims philosophical reflection as practiced by French moralists, some Presocratic philosophers, and some German thinkers. As a mature writer, he is no longer interested in philosophy simply as a place to display skill in analytic or logical reasoning. He is interested in a philosophy which can address the cultural and personal issues of people constructing themselves in their world. He is particularly interested in using philosophical talents to help to discover the values implicit in practices and assumptions which people hold. These values are not just moral and aesthetic; they are also epistemologically relevant. Nietzsche's *Reclamation of Philosophy* elucidates what Nietzsche has to say about value, particularly what he has to say about moral value, by looking at his views of aesthetic value. **Friedrich**

Nietzsche and the Reclamation of Philosophy Kathleen J. Wininger, 1988 *Nietzsche's Zarathustra* Kathleen Marie Higgins, 2010-04-27 Nietzsche's *Zarathustra* takes an interdisciplinary approach to Nietzsche's *Thus Spoke Zarathustra*, focusing on the philosophical function of its literary techniques and its fictional mode of presentation. It argues that the fictional format is essential to Nietzsche's philosophical message in his work. Part of that message is Nietzsche's alternative to the Western worldview as developed by Plato's dialogues and the Christian Gospel, which he presents through the teachings of his hero Zarathustra. Another part of that message is that any doctrine, including those of Zarathustra himself, has an ambivalent nature. Although doctrinal formulations are designed to preserve and communicate philosophical insights, they can become dead formulas, out of touch with the live philosophical discoveries that they aimed to capture. *Thus Spoke Zarathustra* explores Zarathustra's own vulnerability to this risk and his way of regaining real connection with living wisdom. The doctrine of eternal recurrence, which is particularly prominent in *Zarathustra*, is a case in point. The doctrine is offered in opposition to the worldview that Nietzsche associates with the Christian doctrine of sin, which in his view promotes a view of this life as devoid of intrinsic value. However, certain ways of adhering to this doctrine themselves rob life of its value. The book also defends the importance of Part IV of *Thus Spoke Zarathustra*, which many scholars have seen as unimportant by comparison with the first three parts. Nietzsche's *Zarathustra* argues that Part III would not have been a culmination for the work and that Part IV is essential to Nietzsche's project. Part IV's allusions to Apuleius' *The Golden Ass*, an ancient Menippean satire, suggest that it should be read as a satire in which Zarathustra falls into and recovers from folly. It is thus the culminating statement of the point that there is always a discrepancy between the living philosophical insight and any

attempt to articulate it Introductions to Nietzsche Robert B. Pippin, 2012-02-09 A comprehensive and unusual introduction to Nietzsche providing a separate introductory essay for each of his major works **Thomas Mann and Friedrich Nietzsche** Caroline Joan Picart, 1999 Traditional interpretations of Thomas Mann's relation to Nietzsche's writings plot out a simple relation of earlier adulation and later rejection The book argues that Mann's disavowal of Nietzsche's influence was in the words of T J Reed a necessary political act when the repudiation of Nietzsche's more hysterical doctrines required such a response Using a genealogical method the book traces how Mann labors ambivalently under the shadow of Nietzsche's writings on his own political artistry through a detailed analysis of Mann's *Death in Venice* *Dr Faustus* the *Joseph tetralogy* and *Confessions of Felix Krull* Confidence Man Using the recurring Nietzschean themes of eroticism death music and laughter as a guide it arrives at a rough picture of how Mann both takes up and discontinues Nietzsche's poetic heritage The book derives the vision of the interrelationships binding these four leitmotiv elements from Derrida's magic square as depicted in *Melancholia I* The link with Derrida is far from arbitrary because Mann directly aligned Nietzschean insight with Derrida's world of passion sympathy with suffering the macabre stench of rotting flesh and Faustian melancholy **The Existentialists** Charles Guignon, 2004-10-26 This volume brings together for the first time some of the most helpful and insightful essays on the four most influential and discussed philosophers in the history of existentialism Kierkegaard Nietzsche Heidegger and Sartre The contributors write on such topics as Kierkegaard's knight of faith and his diagnosis of the present age Nietzsche's view of morality and self creation Heidegger's accounts of worldhood and authenticity and Sartre's ontology ethics and conception of the cogito The essays have been selected for their higher level of scholarship and for their ability to illuminate various aspects of their subject's work The volume is enhanced by the editor's introduction and extensive bibliography to aid further study **In the World of Signs**, 2022-04-25 The book covers almost the whole range of semiotics the conceptions of meaning the appearance of meaning units in semiosis the dichotomy analyticity syntheticity the formal condition of good translation the metaphorical change in fine arts the figurativeness in modern literary theories the metaphor in computer translation the conditionals with egocentric predicates the evolution of the notion of cause the temporal relation in conditionals the structure of passive voice the semantics of to think the reasoning and rationality the non formalized reasoning the operation of acceptance the principle of non contradiction the relation semiotics logic philosophy the interdisciplinarity and exactness the notion of imprecision the interpretation of some semiotic notions in a semantic field of terms in terms of mathematics the description of categorial grammars in terms of model theory the human knowledge as moral problem the conceptualization of the development of knowledge by means of the notion of meme the cultural relations between some European countries the typology of scientists the semiotic studies of some Spanish Irish Czech Polish and Norwegian works of literature the semiotic aspects of music television and the whole sphere of artifacts the history of semiotics Plato Gongsung Long Descartes Fu Yen Peirce Brwal Lotman Langer The Ontology of

Prejudice Jon Mills, Janusz A. Polanowski, 2021-11-01 This book offers a bold and controversial new thesis regarding the nature of prejudice. The authors' central claim is that prejudice is not simply learned; rather, it is predisposed in all human beings and is thus the foundation for ethical valuation. They aim to destroy the illusion that prejudice is merely the result of learned beliefs, socially conditioned attitudes, or pathological states of development. Contrary to traditional accounts, prejudice itself is not a negative attribute of human nature; rather, it is the necessary precondition for the self and civilization to emerge. Defined as the preferential self-expression of valuation, prejudice gives rise to greater existential complexities and novelties that elevate selfhood and society to higher states of ethical realization. Rather than offer another contribution that highlights the destructive nature of prejudice, Mills and Polanowski address the ontological, psychological, and dialectical origins of prejudice as it manifests itself in the process of selfhood and culture. They provide an original conceptualization of the phenomenology of prejudice and its dialectical instantiation in the ontology of the individual worldhood and the very structures of subjectivity. As a unique synthesis of psychoanalysis, Hegelian idealism, Heideggerian existential ontology, and Whiteheadian process philosophy, prejudice is the indispensable ground for humanity to actualize its highest potentiality for Being. The striking result is 1) a revolutionary theory of human nature, 2) a new ethical system, and 3) the elevation of dialectical ethics to the domain of metaphysics.

The Aesthetics of Ruins Robert Ginsberg, 2021-08-04 This book constructs a theory of ruins that celebrates their vitality and unity in aesthetic experience. Its argument draws upon over 100 illustrations prepared in 40 countries. Ruins flourish as matter, form, function, incongruity, site, and symbol. Ruin underlies cultural values in cinema, literature, and philosophy. Finally, ruin guides meditations upon our mortality and endangered world.

Defining Personhood Sarah Bishop Merrill, 2021-11-15 Many debates in biomedical ethics today involve inconsistencies in defining the key term person. Both sides of the abortion debate, for instance, beg the question about what constitutes personhood. This book explores the arguments concerning definitions of personhood in the history of modern philosophy and then constructs a superior model defined in terms of distinctive features, a theoretical concept borrowed from linguistics. This model is shown to have distinct advantages over the necessary and sufficient condition models of personhood launched by essentialists. Philosophers historically have been correct about what some of the pivotal distinctive features of personhood are: e.g., rationality, communications, and self-consciousness, but they have been wrong about the methods of recognizing and asserting personhood and about the relative importance of feelings. In clinical care, complaints often surface that care is not personal. This book aims to improve care through providing a method of attending to patients as people. Charts in the Appendices show that where physicians attended to personal features important to their patients, sometimes the patients rated the care even higher than the physician did. The book will be useful to health care providers whose goals include improving quality of care, listening to patients, and preventing malpractice.
