Nigel Coates Rick Poynor, Nigel Coates, 1990 One of a small group of designers and architects who are redefining the landscape of international design is discussed here It places his development and impact within the broader currents of international design and culture in the 80s and examines the notion of architecture as Fashion The Situationist City Simon Sadler, 1999-08-18 Simon Sadler searches for the Situationist City among the detritus of tracts manifestos and works of art that the Situationist International left behind From 1957 to 1972 the artistic and political movement known as the Situationist International SI worked aggressively to subvert the conservative ideology of the Western world The movement's broadside attack on establishment institutions and values left its mark upon the libertarian left the counterculture the revolutionary events of 1968 and more recent phenomena from punk to postmodernism But over time it tended to obscure Situationism's own founding principles In this book Simon Sadler investigates the artistic architectural and cultural theories that were once the foundations of Situationist thought particularly as they applied to the form of the modern city According to the Situationists the benign professionalism of architecture and design had led to a sterilization of the world that threatened to wipe out any sense of spontaneity or playfulness The Situationists hankered after the pioneer spirit of the modernist period when new ideas such as those of Marx Freud and Nietzsche still felt fresh and vital By the late fifties movements such as British and American Pop Art and French Nouveau Ralisme had become intensely interested in everyday life space and mass culture The SI aimed to convert this interest into a revolution at the level of the city itself Their principle for the reorganization of cities was simple and seductive let the citizens themselves decide what spaces and architecture they want to live in and how they wish to live in them This would instantly undermine the powers of state bureaucracy capital and imperialism thereby revolutionizing people's everyday lives Simon Sadler searches for the Situationist City among the detritus of tracts manifestos and works of art that the SI left behind The book is divided into three parts The first *The Naked City* outlines the Situationist critique of the urban environment as it then existed The second *Formulary for a New Urbanism* examines Situationist principles for the city and for city living The third *A New Babylon* describes actual designs proposed for a Situationist City **NATØ: Narrative Architecture in Postmodern London** Claire Jamieson, 2017-01-20 Chronicling the last radical architectural group of the twentieth century NAT Narrative Architecture Today who emerged from the Architectural Association at the start of the 1980s this book explores the group's work which echoed a wider artistic and literary culture that drew on the specific political social and physical condition of 1980s London It traces NAT's identification with a particular stream of post punk postmodern expression a celebration of the abject an aesthetic of entropy and a do it

yourself provisionality NAT has most often been documented in reference to Nigel Coates the instigator of NAT which has led to a one sided one dimensional record of NAT's place in architectural history This book sets out a more detailed contextual history of NAT told through photographs drawings and ephemera restoring a truer polyvocal narrative of the group's ethos and development

Narrative Architecture Nigel Coates, 2012-03-26 The first book to look architectural narrative in the eye Since the early eighties many architects have used the term narrative to describe their work To architects the enduring attraction of narrative is that it offers a way of engaging with the way a city feels and works Rather than reducing architecture to mere style or an overt emphasis on technology it foregrounds the experiential dimension of architecture Narrative Architecture explores the potential for narrative as a way of interpreting buildings from ancient history through to the present deals with architectural background analysis and practice as well as its future development Authored by Nigel Coates a foremost figure in the field of narrative architecture the book is one of the first to address this subject directly Features architects as diverse as William Kent Antoni Gaud Eero Saarinen Ettore Sottsass Superstudio Rem Koolhaas and FAT to provide an overview of the work of NATO and Coates as well as chapters on other contemporary designers Includes over 120 colour photographs Signposting narrative's significance as a design approach that can aid architecture to remain relevant in this complex multi disciplinary and multi everything age Narrative Architecture is a must read for anyone with an interest in architectural history and theory

Nigel Coates Jonathan Glancey, 1999 This series profiles the designers who mattered in the 90s those who have already changed our perceptions and those poised to define the next century Concise text and a wealth of illustration will excite anyone interested in visual culture This influential architect has designed high profile restaurants in Japan and Turkey the British Pavilion for Lisbon Expo 98 and Hanover Expo 2000 and many other major commissions

Guide to Ecstacity Nigel Coates, 2003 In this encyclopedic book British architectural visionary Nigel Coates asks us to reimagine the city as a dynamic hybrid of inventive design and cross cultural political empowerment His innovative view of the contemporary metropolis is presented in the form of Ecstacity a hypothetical place that collapses the real into the imaginary with fragments of cities from around the world woven together into one multifaceted urban fabric With streetscapes buildings and plans appropriated from Tokyo Cairo London New York Rome Mumbai and Rio de Janeiro Ecstacity constructs an urban kaleidoscope marked by cultural diversity and suggests that pluralism and not uniformity is the best response to the multiplication of modern lifestyles and revolutions in global communication Bookjacket

Making Better Places Richard Hayward, 2013-10-22 Making Better Places Urban Design Now discusses how to make better places how monotonous or rich urban development can be how appropriate to traffic requirements urban improvements are or how sustainable an urban design approach can be to existing and future urban dispersal The book reviews the gap existing between the various environmental disciplines leading to the emergence of urban design as well as the gap between the rhetoric and practical achievements of urban design The practice of urban design entails the premise that environments are to be created and transformed to provide the most opportunities for the largest number of people By using an urban tissue plan the urban developmental planner can produce and evaluate site development appraisal and design proposals The book also provides an abstract perspective that considers built forms as a set of signs to provide a mechanism which shows the modification of urban space The text also addresses the issue of urban change in established centers the urban fringe and beyond as well as cites four examples of exploration by intervention The book can prove beneficial to urban planners sociologists and policy makers involved in urban and social development
