Perspectives On Northern Northwest Coast Prehistory:

Perspectives on Northern Northwest Coast Prehistory Jerome S. Cybulski, 2001-01-01 Thirteen scientists provide insight into the archaeology of the north coast of British Columbia in celebration of fieldwork begun by George F MacDonald for the National Museum of Canada in 1966 This book investigates paleoenvironmental influences on human settlement theoretical concepts involved in northern Northwest Coast research and the interplay of aboriginal oral traditions and archaeological findings Published in English

Household Archaeology on the Northwest Coast Elizabeth A. Sobel, D. Ann Trieu Gahr, Kenneth A. Ames, 2006-07-01 Since the late 1970s household archaeology has become a key theoretical and methodological framework for research on the development of permanent social inequality and complexity as well as for understanding the social political and economic organization of chiefdoms and states This volume is the cumulative result of more than a decade of research focusing on household archaeology as a means to gain understanding of the evolution of social complexity regardless of underlying economy

The Oxford Handbook of North American Archaeology Timothy R. Pauketat, 2012-02-23 The Oxford Handbook of North American Archaeology reviews the continent's first and last foragers farmers and great pre Columbian civic and ceremonial centers from Chaco Canyon to Moundville and beyond

[The Routledge Handbook of the Bioarchaeology of Human Conflict](#) Christopher Knüsel, Martin Smith, 2013-12-17 If human burials were our only window onto the past what story would they tell Skeletal injuries constitute the most direct and unambiguous evidence for violence in the past Whereas weapons or defenses may simply be statements of prestige or status and written sources are characteristically biased and incomplete human remains offer clear and unequivocal evidence of physical aggression reaching as far back as we have burials to examine Warfare is often described as senseless and as having no place in society Consequently its place in social relations and societal change remains obscure The studies in The Routledge Handbook of the Bioarchaeology of Human Conflict present an overview of the nature and development of human conflict from prehistory to recent times as evidenced by the remains of past people themselves in order to explore the social contexts in which such injuries were inflicted A broadly chronological approach is taken from prehistory through to recent conflicts however this book is not

simply a catalogue of injuries illustrating weapon development or a narrative detailing progress in warfare but rather provides a framework in which to explore both continuity and change based on a range of important themes which hold continuing relevance throughout human development

The Archaeology of North Pacific Fisheries Madonna L. Moss, Aubrey Cannon, 2011-11-15 For thousands of years fisheries were crucial to the sustenance of the First Peoples of the Pacific Coast Yet human impact has left us with a woefully incomplete understanding of their histories prior to the industrial era Covering Alaska British Columbia and Puget Sound The Archaeology of North Pacific Fisheries illustrates how the archaeological record reveals new information about ancient ways of life and the histories of key species Individual chapters cover salmon as well as a number of lesser known species abundant in archaeological sites including pacific cod herring rockfish eulachon and hake In turn this ecological history informs suggestions for sustainable fishing in today's rapidly changing environment

Handbook of Archaeological Theories R. Alexander Bentley, Herbert D. G. Maschner, Christopher Chippindale, 2009-09-16 This handbook a companion to the authoritative Handbook of Archaeological Methods gathers original authoritative articles from leading archaeologists on all aspects of the latest thinking about archaeological theory It is the definitive resource for understanding how to think about archaeology

[The Oxford Handbook of Wetland Archaeology](#) Francesco Menotti, Aidan O'Sullivan, 2013 This Handbook sets out the key issues and debates in the theory and practice of wetland archaeology which has played a crucial role in studies of our past Due to the high quantity of preserved organic materials found in humid environments the study of wetlands has allowed archaeologists to reconstruct people's everyday lives in great detail

Haida Gwaii Daryl W. Fedje, Rolf Mathewes, 2011-11-01 The most isolated archipelago on the west coast of the Americas inhabited for at least 10 500 years Haida Gwaii has fascinated scientists social scientists historians and inquisitive travellers for decades This book brings together the results of extensive and varied field research by both federal agencies and independent researchers and carefully integrates them with earlier archaeological ethnohistorical and paleoenvironmental work in the region It imparts significant new information about the natural history of Haida Gwaii also known as the Queen Charlotte Islands and the adjacent areas of Hecate Strait Chapters analyze new data on ice retreat shoreline and sea level change faunal communities and culture history providing a more comprehensive picture of the history of the islands from the late glacial through the prehistoric period to the time of European contact known to the Haida as the time of the Iron People Much of the archaeological work was conducted with the direct participation of members of the Haida Nation As a complement to the scientific approach of the research two chapters provide a Haida perspective explaining the value of traditional oral records and recounting several oral histories including that of Taadl the loon which takes us back to the beginning of time This volume is a veritable compendium of knowledge out of which emerges the human and environmental history of Haida Gwaii and its dynamic landscape Haida Gwaii will be of interest to scholars and students in archaeology and anthropology and those with an interest in the environmental and

cultural history of Haida Gwaii The North Coast Prehistory Project Excavations in Prince Rupert Harbour, British Columbia Kenneth M. Ames, 2005 This work describes more than 9000 artifacts recovered from nine sites in Prince Rupert Harbour within the traditional territories of the Coast Tsimshian excavated between 1968 and 1972 They include large complex shell middens and several were major villages or towns at some time during their history Material culture was remarkably stable over at least the past 4000 years While subsistence data are limited faunal remains and artifacts suggest an emphasis on hunting deer and sea mammals and intensive exploitation of shallow littoral habitats Evidence suggests that logistical patterns of mobility some requiring large canoes were established by AD 1 at the latest Boardwalk appears to have been a two row village by ca 500 BC and perhaps very much earlier Finally artifacts associated with the human burials excavated by the project suggest the existence of social ranking by c 1000 BC as well as some degree of occupational specialization Violence and Warfare among Hunter-Gatherers Mark W Allen, Terry L Jones, 2016-07-01 How did warfare originate Was it human genetics Social competition The rise of complexity Intensive study of the long term hunter gatherer past brings us closer to an answer The original chapters in this volume examine cultural areas on five continents where there is archaeological ethnographic and historical evidence for hunter gatherer conflict despite high degrees of mobility small populations and relatively egalitarian social structures Their controversial conclusions will elicit interest among anthropologists archaeologists and those in conflict studies *North American Indigenous Warfare and Ritual Violence* Richard J. Chacon, Rubén G. Mendoza, 2013-02 This groundbreaking book presents clear evidence from multiple academic disciplines that indigenous populations engaged in warfare and ritual violence long before European contact **The Prehistory of the Northwest Coast** R. G. Matson, Gary Coupland, 1994-11 This volume provides a descriptive overview of the cultural complexity on the northwest coast that stretches from northern California to Alaska Topics covered range from the earliest settlements to the subsequent cultural diversities in Native American populations Maps charts and illustrations further enhance the book's interest and appeal **Anthropologica**, 2001 A Resonant Ecology Max Ritts, 2024-08-30 In *A Resonant Ecology* Max Ritts traces how sound's integration into the environmental politics of Canada's North Coast has paved the way for massive industrial expansion While conservationists hope that the dissemination of whale songs and other nature sounds will showcase the beauty of local wildlife for people around the world Ritts reveals how colonial capitalism can co-opt sonic efforts to protect the coast He demonstrates how digital technologies allow industry to sonically map new shipping lanes and facilitate new ways of experiencing sound premised not on listening but on sound's exploitable status as a data resource By outlining how sound can both perpetuate and refuse capitalist colonialism Ritts challenges the idea that the sonic realm is inherently liberatory and reveals sound to be a powerfully uncertain object Through a situated geographical approach he makes the case that only a decolonial and multigenerational environmental politics can counter the false promise of sustainable marine development held up by industry and the state *Emerging from the Mist* Quentin

Mackie, Gary Coupland, R.G. Matson, 2011-11-01 Our understanding of the precontact nature of the Northwest Coast has changed dramatically over the last twenty years This book brings together the most recent research on the culture history and archaeology of a region of longstanding anthropological importance whose complex societies represent the most prominent examples of hunters and gatherers Combining archaeology ethnohistory and ethnography this collection investigates several aspects of this cultural complexity carrying on the intellectual traditions of Donald H Mitchell and Wayne Suttles Its interdisciplinary approach creates a broader context in which to interpret the past The generously illustrated chapters address a wide range of topics and include original and penetrating analyses of the fur trade migration household structures and precontact metallurgy and architecture Emerging from the Mist updates and expands our understanding of the nature and evolution of precontact Northwest Coast society to reveal the vibrant rich cultures that existed there Scholars and students of archaeology and anthropology and those with an interest in Northwest Coast history will find this volume especially rewarding Social-Ecological Diversity and Traditional Food Systems Ranjay Kumar Singh, Nancy J.

Turner, Victoria Reyes-Garcia, Jules Pretty, 2021-11-29 This book draws on world wide experiences and valuable lessons to highlight community ecosystem interactions and the role of traditional knowledge in sustaining biocultural resources through community based adaptations The book targets different audiences including researchers working on human environment interactions and climate adaptation practices biodiversity conservators non government organizations and policy makers involved in revitalizing traditional foods and community based conservation and adaptation in diverse ecosystems This volume is also a source book for educators advocating for and collaborating with indigenous and local peoples to promote location specific adaptations to overcome the impacts of multiple biotic and abiotic stresses Note T F does not sell or distribute the hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka This title is co published with NIPA

Between Consenting Peoples Jeremy Webber, Colin M. Macleod, 2010-10-28 Consent has long been used to establish the legitimacy of society But when one asks who consented how to what type of community consent becomes very elusive more myth than reality This is particularly true when focusing on the relationship between indigenous and nonindigenous peoples In *Between Consenting Peoples* leading scholars in legal and political theory look at the various meanings that have been attached to consent as the foundation for political community and law especially in indigenous contexts From historical examples to political and legal theory the authors examine the language of consent and how consent has ordered indigenous societies and shaped their relationships with governments They also explore the kind of consent the kind of attachment that might ground political community and establish a fair relationship between indigenous and nonindigenous peoples In doing so they draw perspectives from indigenous relations into the heart of political theory **California Prehistory** Terry L.

Jones, Kathryn A. Klar, 2007-07-16 Some forty scholars examine California s prehistory and archaeology looking at marine and terrestrial palaeoenvironments initial human colonization linguistic prehistory early forms of exchange mitochondrial DNA

studies and rock art This work is the most extensive study of California s prehistory undertaken in the past 20 years An essential resource for any scholar of California prehistory and archaeology Submerged Prehistory in the Americas John M. O'Shea, 2023-05-08 This book presents an overview of the exciting new developments in underwater research in North America ranging from new approaches for discovering submerged sites to an assessment of how these findings challenge the understanding of the North American past Archaeological sites preserved on the world s continental shelves are relevant to a wide range of major research questions and their importance increases with the heightened awareness of climate change and rising modern sea levels Once thought lost forever these sites survive underwater preserved from the ravages of modern farming and development To investigate the submerged landscapes archaeologists use many of the same technologies developed for discovery of shipwrecks but couple them with anthropological and environmental models to identify and study the way of life of people residing in these ancient lands In this book leading figures associated with submerged site exploration share an emphasis on the conduct and results of underwater research It will be a fascinating read for advanced students of Archaeology History and Environmental Studies This volume was originally published as a special issue of The Journal of Island and Coastal Archaeology
