Linguistics for Singers Gregory Camp, 2023-08-22. *Linguistics for Singers: An Introduction* is a textbook and manual that provides singers with a foundation in linguistic features of four major singing languages: English, Italian, French, and German, and shows how these features can be used to inform vocal performance and interpretation. Going beyond the basics of lyric diction, a grounding in linguistics enables student musicians to understand language holistically and more fully comprehend the music they are learning. The comparative approach to four common languages allows readers to readily grasp similarities and apply principles across vocal repertoire. Beginning with the sounds of a language and gradually moving up through larger levels of linguistic structure from words to full texts, the chapters illustrate concepts using real examples from art songs and opera. The clear explanations enable readers new to linguistics to connect these concepts with their own musical practice. Designed for flexible use in courses on language and singing, lyric diction, repertoire studies, and collaborative piano, this book provides a vital resource for singers, vocal instructors, and conductors.

The Oxford Reference Guide to Lexical Functional Grammar Mary Dalrymple, John J. Lowe, Louise Mycock, 2019. The authors provide detailed and extensive coverage of the analysis of syntax, semantics, morphology, prosody, and information structure, and how these aspects of linguistic structure interact in the nontransformational framework of LFG. The volume will be a reference for graduate and advanced undergraduate students and researchers in a wide range of linguistic subfields, including syntax, morphology, semantics, information structure, and prosody, as well as those working in language documentation and description.

Historical Linguistics 2001 Barry J. Blake, Kate Burridge, 2003-07-17. This is a selection of papers from the 15th International Conference on Historical Linguistics held in Melbourne, 13-17 August 2001, hosted by the Linguistics Program at La Trobe University. The papers range from the general theoretical to the study of particular languages and embrace most areas of linguistics, particularly morpho-syntax.

The Prosody of Dubbed Speech Sofía Sánchez-Mompeán, 2019-12-17. This book offers a descriptive and practical analysis of prosody in dubbed speech, examining the most distinctive traits that typify dubbed dialogue at the prosodic level. The author's unique perspective as both a translation studies researcher and a voice-over professional helps to bring these two aspects of the dubbing process together into a coherent study for the first time. Supported by corpus analysis of English and Spanish episodes of the US TV show *How I Met Your Mother*, she examines aspects of prosody in source and target languages, including features such as intonation, loudness, tempo, rhythm, and tension. This book will be of interest to students and scholars of translation and interpreting, media studies, television, and film production, as well as dubbing professionals.

Models of Brain and Mind Rahul Banerjee, Bikas K. Chakrabarti, 2008-02-14. The phenomenon of consciousness has always been a central question for

philosophers and scientists Emerging in the past decade are new approaches to the understanding of consciousness in a scientific light This book presents a series of essays by leading thinkers giving an account of the current ideas prevalent in the scientific study of consciousness The value of the book lies in the discussion of this interesting though complex subject from different points of view ranging from physics and computer science to the cognitive sciences Reviews of controversial ideas related to the philosophy of mind from western and eastern sources including classical Indian first person methodologies provide a breadth of coverage that has seldom been attempted in a book before Additionally chapters relating to the new approaches in computational modeling of higher order cognitive function and consciousness are included The book is of great value for established as well as young researchers from a wide cross section of interdisciplinary scientific backgrounds aiming to pursue research in this field as well as an informed public Presents the latest developments in the scientific study of consciousness Critically reviews different theoretical and philosophical explanations related to the subject An important book for both students and researchers in designing research projects on consciousness *Rhyme over Reason* Réka Benczes, 2019-01-31 We are fascinated by what words sound like This fascination also drives us to search for meaning in sound thereby contradicting the principle of the arbitrariness of the linguistic sign Phonesthemes onomatopoeia or rhyming compounds all share the property of carrying meaning by virtue of what they sound like simply because language users establish an association between form and meaning By drawing on a wide array of examples ranging from conventionalized words and expressions to brand names and slogans this book offers a comprehensive account of the role that sound symbolism and rhyme alliteration plays in English and by doing so advocates a more relaxed view of the category morpheme that is able to incorporate less regular word formation processes **Sound perception and production in a foreign language** Nimz, Katharina, 2016-04-13 The present study addresses the question of how German vowels are perceived and produced by Polish learners of German as a Foreign Language It comprises three main experiments a discrimination experiment a production experiment and an identification experiment With the exception of the discrimination task the experiments further investigated the influence of orthographic marking on the perception and production of German vowel length It was assumed that explicit markings such as the Dehnungs h lengthening h could help Polish GFL learners in perceiving and producing German words more correctly The discrimination experiment with manipulated nonce words showed that Polish GFL learners detect pure length differences in German vowels less accurately than German native speakers while this was not the case for pure quality differences The results of the identification experiment contrast with the results of the discrimination task in that Polish GFL learners were better at judging incorrect vowel length than incorrect vowel quality in manipulated real words However orthographic marking did not turn out to be the driving factor and it is suggested that metalinguistic awareness can explain the asymmetry between the two perception experiments The production experiment supported the results of the identification task in that lengthening h did not help Polish learners in producing

German vowel length more correctly Yet as far as vowel quality productions are concerned it is argued that orthography does influence L2 sound productions because Polish learners seem to be negatively influenced by their native grapheme to phoneme correspondences It is concluded that it is important to differentiate between the influence of the L1 and L2 orthographic system On the one hand the investigation of the influence of orthographic vowel length markers in German suggests that Polish GFL learners do not make use of length information provided by the L2 orthographic system On the other hand the vowel quality data suggest that the L1 orthographic system plays a crucial role in the acquisition of a foreign language It is therefore proposed that orthography influences the acquisition of foreign sounds but not in the way it was originally assumed

Tones in Zhangzhou Yishan Huang, 2020-01-16 This book explores the nature of tones in Zhangzhou an under described Southern Min variety based on quantitative analyses of data from 21 native speakers It will interest students and linguists studying tone in languages of China and elsewhere in the world in particular as an exemplar in the use of statistical methods to test and establish phonological categories in language The study finds that realisations of Zhangzhou tones are multidimensional and that Zhangzhou has eight tones overturning previous studies of seven tones based on the preservation of Middle Chinese tonal categories The results presented here also suggest that the nature of Zhangzhou tones is morphological The relationship between sandhi and citation tones is shown to be morphophonemic while the relationship between phrase final and citation tones is allophonic

Multimodal Signals: Cognitive and Algorithmic Issues Anna Esposito, Amir Hussain, Maria Marinaro, Raffaele Martone, 2009-02-17 This book constitutes the thoroughly refereed post conference proceedings of the COST Action 2102 and euCognition supported international school on Multimodal Signals Cognitive and Algorithmic Issues held in Vietri sul Mare Italy in April 2008 The 34 revised full papers presented were carefully reviewed and selected from participants contributions and invited lectures given at the workshop The volume is organized in two parts the first on Interactive and Unsupervised Multimodal Systems contains 14 papers The papers deal with the theoretical and computational issue of defining algorithms programming languages and determinist models to recognize and synthesize multimodal signals These are facial and vocal expressions of emotions tones of voice gestures eye contact spatial arrangements patterns of touch expressive movements writing patterns and cultural differences in anticipation of the implementation of intelligent avatars and interactive dialogue systems that could be exploited to improve user access to future telecommunication services The second part of the volume on Verbal and Nonverbal Communication Signals presents 20 original studies devoted to the modeling of timing synchronisation between speech production gestures facial and head movements in human communicative expressions and on their mutual contribution for an effective communication

Nasal Vowel Evolution in Romance Rodney Sampson,1999 This book provides a complete comparative nongallocentric account of nasality in all the Romance languages It demonstrates the central role of nasality in the history of sound changes in the languages of southern Europe In doing so it assembles a large amount of important philological and linguistic data previously dispersed and difficult to access and organizes it in a way that allows the author and will allow the reader to analyse it systematically Two introductory chapters discuss general principles of nasality and Romance nasalization Subsequent chapters are then devoted to each language The author considers all the standard varieties and a substantial range of non standard varieties and identifies broad characteristics of vowel nasalization in Romance In the the final chapter he makes a clear bridge between the data rich discussion of individual languages and the isolation of language universals This is will be the standard work in its field for many years It will be of central interest to linguists and philologists of Romance as well as to those concerned more generally to understand the causes patterns and processes of sound change

The Routledge Companion to Design Research Paul Rodgers,Joyce Yee,2014-10-17 The Routledge Companion to Design Research offers a comprehensive examination of design research celebrating the plurality of design research and the wide range of conceptual methodological technological and theoretical approaches evident in contemporary design research This volume comprises 39 original and high quality design research chapters from contributors around the world with offerings from the vast array of disciplines in and around modern design praxis including areas such as industrial and product design visual communication interaction design fashion design service design engineering and architecture The Companion is divided into five distinct sections with chapters that examine the nature and process of design research the purpose of design research and how one might embark on design research They also explore how leading design researchers conduct their design research through formulating and asking questions in novel ways and

the creative methods and tools they use to collect and analyse data The Companion also includes a number of case studies that illustrate how one might best communicate and disseminate design research through contributions that offer techniques for writing and publicising research The Routledge Companion to Design Research will have wide appeal to researchers and educators in design and design related disciplines such as engineering business marketing computing and will make an invaluable contribution to state of the art design research at postgraduate doctoral and post doctoral levels and teaching across a wide range of different disciplines

Shakespeare and the Versification of English Drama, 1561-1642

Marina Tarlinskaja, 2016-12-05 Surveying the development and varieties of blank verse in the English playhouses this book is a natural history of iambic pentameter in English The main aim of the book is to analyze the evolution of Renaissance dramatic poetry Shakespeare is the central figure of the research but his predecessors contemporaries and followers are also important Shakespeare the author argues can be fully understood and appreciated only against the background of the whole period Tarlinskaja surveys English plays by Elizabethan Jacobean and Caroline playwrights from Norton and Sackville's Gorboduc to Shirley's The Cardinal Her analysis takes in such topics as what poets treated as a syllable in the 16th 17th century metrical verse the particulars of stressing in iambic pentameter texts word boundary and syntactic segmentation of verse lines their morphological and syntactic composition syllabic accentual and syntactic features of line endings and the way Elizabethan poets learned to use verse form to enhance meaning She uses statistics to explore the attribution of questionable Elizabethan and Jacobean plays and to examine several still enigmatic texts and collaborations Among these are the poem A Lover's Complaint the anonymous tragedy Arden of Faversham the challenging Sir Thomas More the later Jacobean comedy The Spanish Gypsy as well as a number of Shakespeare's co-authored plays Her analysis of versification offers new ways to think about the dating of plays attribution of anonymous texts and how collaborators divided their task in co-authored dramas

Bilingual First Language Acquisition Annick De Houwer, 2009-02-17 Increasingly children grow up hearing two languages from birth This comprehensive textbook explains how children learn to understand and speak those languages It brings together both established knowledge and the latest findings about different areas of bilingual language development It also includes new analyses of previously published materials The book describes how bilingually raised children learn to understand and use sounds words and sentences in two languages A recurrent theme is the large degree of variation between bilingual children This variation in how children develop bilingually reflects the variation in their language learning environments Positive attitudes from the people in bilingual children's language learning environments and their recognition that child bilingualism is not monolingualism times two are the main ingredients ensuring that children grow up to be happy and expert speakers of two languages

Agglutinative Information Shinji Ido, 2003 This book analyses incomplete sentences in languages that utilise distinctively agglutinative components in their morphology In the grammars of the languages dealt with in this book there are certain types of sentences which are variously referred to as elliptical

sentences Turkish eksilti cümleler incomplete sentences Uzbek to liqsiz gaplar cutoff sentences Turkish kesik cümleler etc for which the grammarians provide elaborated semantic and syntactic analyses The current work attempts to present an alternative approach for the analysis of such sentences The distribution of morphemes in incomplete sentences is examined closely based on which a system of analysis that can handle a variety of incomplete sentences in an integrated manner is proposed from a morphological point of view The linguistic data are taken from Turkish Uzbek Japanese and Bukharan Tajik
