**Corpora in Interpreting Studies** Andrew K.F. Cheung, Kanglong Liu, Riccardo Moratto, 2023-12-01 Cheung Liu Moratto and their contributors examine how corpora can be effectively harnessed to benefit interpreting practice and research in East Asian settings In comparison to the achievements made in the field of corpus based translation studies the use of corpora in interpreting is not comparable in terms of scope methods and agenda One of the predicaments that

hampers this line of inquiry is the lack of systematic corpora to document spoken language. This issue is even more pronounced when dealing with East Asian languages such as Chinese, Japanese and Korean which are typologically different from European languages. As language plays a pivotal role in interpreting research, the use of corpora in interpreting within East Asian contexts has its own distinct characteristics as well as methodological constraints and concerns. However, it also generates new insights and findings that can significantly advance this research field. A valuable resource for scholars of scholars focusing on corpus interpreting, particularly those dealing with East Asian languages.

***Clinical Applications of Linguistics to Speech-Language Pathology*** Naomi Gurevich, Christopher Grindrod, 2022-11-09. *Clinical Applications of Linguistics to Speech Language Pathology* is a practical guide that provides linguistically grounded approaches to clinical practice. It introduces key linguistic disciplines and discusses how they form a basis for assessment and treatment of individuals with communication differences or disorders. Written by experts in linguistics and communication disorders, each chapter provides clinicians with a foundational understanding of linguistics as it applies to spoken and signed languages and underscores the importance of integrating linguistic theories into clinical decision making. The book is divided into two parts that focus on the applications of linguistics to speech and language differences and disorders in both children and adults. The chapters cover the full range of linguistic domains including phonetics, phonology, morphology, syntax, semantics, pragmatics and sociolinguistics. Applications to a wide range of populations including childhood apraxia of speech, aphasia, dysarthria, traumatic brain injury and accent modification clients are also discussed. Many chapters include assessment and treatment resources that can be used by practicing clinicians. This highly accessible and comprehensive book is an indispensable resource for practicing speech language pathologists and other members of the profession including instructors with minimal exposure to linguistics. It will also be beneficial for students of Linguistics, Speech and Hearing Sciences and Audiology and Speech Language Pathology who are seeking practical knowledge of the fields.

**Psychiatric Consequences of Brain Disease in the Elderly: A Focus on Management** D. Conn, 2012-12-06. Alzheimer's disease, stroke and Parkinson's disease are the most prevalent brain diseases in the elderly. The psychiatric and behavioural consequences of these and other brain disorders contribute greatly to the decline in function of these patients, often leading to greater suffering and a decreased quality of life, placement in institutions and increased stress on the family and other caregivers. The authors in this book discuss the psychiatric consequences of brain disease in the elderly with a particular focus on the management of these disorders. We have tried to keep the content of this book clinically relevant throughout by using a series of case examples and by emphasizing the various treatment strategies and forms of management available to the health care professional. In attempting to understand these disorders, it is important to place

equal emphasis on biological psychological and social factors Because of the complexity and chronicity of these conditions multidisciplinary intervention is crucial We believe that this book will be helpful to all those working with the elderly whether in the community or in the institution This includes physicians nurses social workers occupational therapists psychologists and all those working with this patient population *Diverse Voices in Chinese Translation and Interpreting* Riccardo Moratto, Martin Woesler, 2021-02-02 This book presents a thoughtful and thorough account of diverse studies on Chinese translation and interpreting TI It introduces readers to a plurality of scholarly voices focusing on different aspects of Chinese TI from an interdisciplinary and international perspective The book brings together eighteen essays by scholars at different stages of their careers with different relationships to translation and interpreting studies Readers will approach Chinese TI studies from different standpoints namely socio historical literary policy related interpreting and contemporary translation practice Given its focus the book benefits researchers and students who are interested in a global scholarly approach to Chinese TI The book offers a unique window on topical issues in Chinese TI theory and practice It is hoped that this book encourages a multilateral dynamic and international approach in a scholarly discussion where more often than not approaches tend to get dichotomized This book aims at bringing together international leading scholars with the same passion that is delving into the theoretical and practical aspects of Chinese TI **Introduction to Neurogenic**
