Recent Social Trends in France, 1960-1990 Michel Forsé,Jean-Pierre Jaslin,1993-04-29 A prominent feature of the social revolution in France has been the decline of the great national institutions the Republic the Army the church and the schools which are losing their symbolic value and are no longer the targets of ideological disputes As a result there is a growing basic consensus among the French people At the same time the French have developed a new interest in managing local problems due to the decentralization law which has led to the establishment of many voluntary associations Changes in family life following the revolution of 1968 have led to greater instability among couples but at the same time have strengthened the kinship system resulting in

increased life expectancy The customs of the French have also changed The French education system originally based on authority and regulations is now making increasing use of experimentation and negotiation As a result the attitude of the French towards authority has totally changed and the French have learned to negotiate and cooperate among themselves All these changes can be interpreted as progressive moves toward liberty equality and individualism There is little danger of social instability since French society remains in remarkably robust health

Daughters of 1968 Lisa Greenwald, 2019 Daughters of 1968 is the story of French feminism between 1944 and 1981 when feminism played a central political role in the history of France The key women during this epoch were often leftists committed to a materialist critique of society and were part of a postwar tradition that produced widespread social change revamping the workplace and laws governing everything from abortion to marriage The May 1968 events with their embrace of radical individualism and antiauthoritarianism triggered a break from the past and the women s movement split into two strands One became universalist and intensely activist the other particularist and less activist distancing itself from contemporary feminism This theoretical debate manifested itself in battles between women and organizations on the streets and in the courts The history of French feminism is the history of women s claims to individualism and citizenship that had been granted their male counterparts at least in principle in 1789 Yet French women have more often donned the mantle of particularism advancing their contributions as mothers to prove their worth as citizens than they have thrown it off claiming absolute equality The few exceptions such as Simone de Beauvoir or the 1970s activists illustrate the diversity and tensions within French feminism as France moved from a corporatist and tradition minded country to one marked by individualism and modernity
