Imitation Nation Jason Richards, 2017-12-26 How did early Americans define themselves The American exceptionalist perspective tells us that the young republic rejected Europeans Native Americans and African Americans in order to isolate a national culture and a white national identity Imitativeness at this time was often seen as antithetical to self and national creation but Jason Richards argues that imitation was in fact central to such creation Imitation Nation shows how whites simultaneously imitated and therefore absorbed the cultures they so readily disavowed as well as how Indians and blacks emulated the power and privilege of whiteness while they mocked and resisted white authority By examining the republic's foundational literature including works by Washington Irving James Fenimore Cooper Harriet Beecher Stowe Herman Melville and Martin Delany Richards argues that the national desire for cultural uniqueness and racial purity was in constant conflict with the national need to imitate the racial and cultural other for self definition The book offers a new model for understanding the ways in which the nation's identity and literature took shape during the early phases of the American republic

From Wounded Knee to Checkpoint Charlie György Ferenc Tóth, 2016-04-22 A historical analysis of the transatlantic relations of the American Indian radical sovereignty movement of the late Cold War From Wounded Knee to Checkpoint Charlie examines the history of the transatlantic alliance between American Indian sovereignty activists and Central European solidarity groups and their entry into the United Nations in the 1970s and 1980s In the late Cold War Native American activists engaged in transnational diplomacy for nation building by putting outside pressure on the US government for a more progressive Indian policy that reached for the full decolonization of Native American communities into independence By using extensive multinational archival research complemented by interviews György Ferenc Tóth investigates how older transatlantic images of American Indians influenced the alliance between Native activists and Central European groups how this coalition developed and functioned and how the US government and the regimes of the Eastern Bloc responded to this transatlantic alliance This book not only places the American Indian radical sovereignty movement in an international context but also recasts it as a transnational struggle thus connecting domestic US social and political history to the history of Cold War transatlantic relations and global movements

The Properties of Violence Sandy Alexandre, 2012-11-09 *The Properties of Violence* focuses on two connected issues representations of lynching in late nineteenth and twentieth century American photographs poetry and fiction and the effects of those representations Alexandre compellingly shows how putting

representations of lynching in dialogue with the history of lynching uncovers the profound investment of African American literature as an enterprise that continually seeks to create conceptual spaces for the disenfranchised culture it represents in matters of property and territory Through studies ranging from lynching photographs to Toni Morrison s Pulitzer Prize winning novel *Beloved* the book demonstrates how representations of lynching demand that we engage and discuss various forms of possession and dispossession The multiple meanings of the word representation are familiar to literary critics but Alexandre s book insists that its other key term effects also needs to be understood in both of its primary senses On the one hand it indicates the social and cultural repercussions of how lynching was portrayed namely what effects its representations had On the other hand the word signals too the possessions or what we might call the personal effects conjured up by these representations These possessions were not only material as for example property in land or the things one owned The effects of representation also included diverse less tangible but no less real possessions shared by individuals and groups the aura of a lynching site the ideological construction of white womanhood or the seemingly default capacity of lynching iconography to encapsulate the history of ostensibly all forms of violence against black people
