**IQ and the Wealth of Nations** Richard Lynn, Tatu Vanhanen, 2002-02-28 Lynn and Vanhanen test the hypothesis on the causal relationship between the average national intelligence IQ and the gap between rich and poor countries by empirical evidence Based on an extensive survey of national IQ tests the results of their work challenge the previous theories of economic development and provide a new basis to evaluate the prospects of economic development throughout the world They begin by reviewing and evaluating some major previous theories The concept of intelligence is then described and intelligence quotient IQ introduced Next they show that intelligence is a significant determinant of earnings within nations and they connect intelligence with various economic and social phenomena The sociology of intelligence at the level of sub populations in nations is examined and the independent national IQ and dependent various measures of per capita income and economic growth rates variables are defined and described They then provide empirical analyses starting from the 81 countries for which direct evidence of national IQs is available the analysis is then extended to the world group of 185 countries The hypothesis is tested by the methods of correlation and regression analyses The results of statistical analyses support the hypothesis strongly The results of the analyses and various means to reduce the gap between rich and poor countries are discussed A provocative analysis that all scholars students and researchers involved with economic development need to confront

inquiry     Mixed Methods in Comparative Politics D. Berg-Schlosser, 2012-09-26 This book approaches current controversies concerning qualitative and quantitative procedures in the social sciences and incorporates new methods showing how they can supplement each other. It is based on a comprehensive international research project that readers can apply to their findings through the data set provided on the author's home page     Why Elections Fail Pippa Norris, 2015-07-08 This volume compares international and institutional accounts as alternative perspectives to explain why elections fail to meet international standards     **Comparative Historical Analysis in the Social Sciences** James Mahoney, Dietrich Rueschmeyer, 2003-02-10 This book systematically investigates the past accomplishments and future agendas of contemporary comparative historical analysis. Its core essays explore three major issues: the accumulation of knowledge in the field over the past three decades; the analytic tools used to study temporal process and historical patterns; and the methodologies available for making inferences and for building theories. The introductory and concluding essays situate the field as a whole by comparing it to alternative approaches within the social sciences. *Comparative Historical Analysis in the Social Sciences* will serve as an invaluable resource for scholars in the field and it will represent a challenge to many other social scientists, especially those who have raised skeptical concerns about comparative historical analysis in the past.

Reflections on Uneven Democracies Daniel Brinks, Marcelo Leiras, Scott Mainwaring, 2014-09-22 A tour de force analysis of the current state of democracy studies as seen through the scholarly legacy of Guillermo O'Donnell. Winner of the CHOICE Outstanding Academic Title of the Choice ACRL. The third wave of democratization produced a wealth of enduring social science. Beginning in the 1970s it prompted scholars to develop important theories on authoritarian breakdowns and transitions to democracy. No one in the field was more influential than Guillermo O'Donnell. 1936-2011, whose pathbreaking work shaped the scholarship of generations of social scientists. *Reflections on Uneven Democracies* honors the legacy of O'Donnell's research by advancing debates related to his work on democracy. Drawing together a veritable Who's Who of eminent scholars, including two of O'Donnell's closest collaborators, Philippe Schmitter and Laurence Whitehead, the volume examines issues related to democratic breakdowns and stability, the nature and quality of new democracies, institutional strength, the rule of law, and delegative democracy. This reexamination of some of the most influential arguments about democracy of the past forty years leads to original approaches and insights for a new era of democracy studies. Students of democracy and institutional performance, both Latin Americanists and comparativists, more generally will find this essential reading.     **Perspectives on Political Communication in Africa** Bruce Mutsaers, Beschara Karam, 2018-02-27 This edited collection is a cutting edge volume that reframes political communication from an African perspective. Focusing on sub-Saharan Africa and occasionally drawing comparisons with other regions of the world, this book critically addresses the development of the field, focusing on the current opportunities and challenges within the African context. By using a wide variety of case studies that include Mozambique, Zambia, Rwanda, Zimbabwe, Ghana, Kenya, Uganda, South Africa, Ivory Coast,

and Nigeria the collection gives space to previously understudied regions of sub Saharan Africa and challenges the over reliance of western scholarship on political communication on the continent

#### *Conflict Sociology* Randall Collins,Stephen K. Sanderson,2015-12-03

This new edition is a substantial abridgment and update of Randall Collins s 1975 classic Conflict Sociology The first edition represented the most powerful and comprehensive statement of conflict theory in its time Here Sanderson has retained the core chapters and added discussions on Collins s and others work in recent years An afterword summarizes Collins s latest forays into microsociological theorizing and attempts to demonstrate how his newer microsociology and older macrosociology are connected

#### *Political Mobilizations and Democratization in Sub-Saharan Africa* Wolfgang Stuppert,2019-06-14

This book explores why democratization processes in Sub Saharan Africa have made so little progress despite more than two decades of multi party politics on the subcontinent By applying multiple linear regression analyses to a new data set on multi party elections in Sub Saharan Africa the study investigates the relationship between political mobilizations and electoral competitiveness It finds that the more societal groups engage in political mobilizations such as protests and strikes the more competitive elections become Based on these results the author argues for a change in the policies of international democracy assistance programs The study s findings suggest that efforts to promote democracy would likely be more successful if international donors focused their support on organizations that have active constituencies and are willing to use their mobilization capacity to address ruling elites with political or socio economic grievances

**Together?** Bertelsmann Stiftung, 2017-12-11 Social cohesion has become an important public goal in many countries across the globe not only in the Western hemisphere but also in Asia Despite the growing political and academic interest in the concept there is no generally accepted definition of social cohesion As a result empirical insights are lacking Against this backdrop the Bertelsmann Stiftung has initiated the Social Cohesion Radar which now for the first time presents empirical findings on South Southeast and East Asia The study provides an analysis and review of social cohesion in 22 Asian countries in a comparative perspective It presents a valid and reliable measurement of current and past levels of social cohesion and explores its most important determinants and outcomes As an extension of the Social Cohesion Radar series the study will be of interest and value to policy makers academics think tanks and civil society organizations Cosmopolitan

Communications Pippa Norris, Ronald Inglehart, 2009-08-31 Societies around the world have experienced a flood of information from diverse channels originating beyond local communities and even national borders transmitted through the rapid expansion of cosmopolitan communications For more than half a century conventional interpretations Norris and Inglehart argue have commonly exaggerated the potential threats arising from this process A series of firewalls protect national cultures This book develops a new theoretical framework for understanding cosmopolitan communications and uses it to identify the conditions under which global communications are most likely to endanger cultural diversity The authors analyze empirical evidence from both the societal level and the individual level examining the outlook and beliefs of people in a wide range of societies The study draws on evidence from the World Values Survey covering 90 societies in all major regions worldwide from 1981 to 2007 The conclusion considers the implications of their findings for cultural policies

Democratization Laurence Whitehead, 2002-07-04 Democratization has swept the globe over the past generation and analysts and policy makers have been struggling to keep up Bookshelves have been filled with case studies and assessments of this kaleidoscope of experiences and a related scholarly community has developed seeking to systematize all this material in accordance with well defined schemas and causal models But experience keeps wrong footing the country analysts so in this fresh interpretation the author goes back to foundational issues He argues that democratization is best understood as a complex long term dynamic and open ended process extending over generations Standard models of causal explanation need to be supplemented by more interpretative approaches Basic questions of citizen security the nature of public accountability and the role of money as a source of political power need reconsideration The delicate balance between monetary authority

and democratic consent is also examined in the light of the financial crises that have afflicted so many new democracies This book proposes a range of new perspectives on the complex linkages between democratization and state formation on the logic of paired comparisons and comparisons between large regions of the world and on the relationship between democratic ideals and really existing democratic outcomes It aims to equip those caught up in democratization and democracy promotion with a more realistic understanding of the tensions and turbulence involved

**Political Turbulence** Helen Margetts, Peter John, Scott Hale, Taha Yasserli, 2017-09-05 How social media is giving rise to a chaotic new form of politics As people spend increasing proportions of their daily lives using social media such as Twitter and Facebook they are being invited to support myriad political causes by sharing liking endorsing or downloading Chain reactions caused by these tiny acts of participation form a growing part of collective action today from neighborhood campaigns to global political movements Political Turbulence reveals that in fact most attempts at collective action online do not succeed but some give rise to huge mobilizations even revolutions Drawing on large scale data generated from the Internet and real world events this book shows how mobilizations that succeed are unpredictable unstable and often unsustainable To better understand this unruly new force in the political world the authors use experiments that test how social media influence citizens deciding whether or not to participate They show how different personality types react to social influences and identify which types of people are willing to participate at an early stage in a mobilization when there are few supporters or signals of viability The authors argue that pluralism is the model of democracy that is emerging in the social media age not the ordered organized vision of early pluralists but a chaotic turbulent form of politics This book demonstrates how data science and experimentation with social data can provide a methodological toolkit for understanding shaping and perhaps even predicting the outcomes of this democratic turbulence

Migration, Security, and Citizenship in the Middle East P. Seeberg, Z.
