Teichler, John Brennan, 2016-06-01 The book draws on the 2007 Changing Academic Profession international survey in order  
to document the personal characteristics career trajectories sense of identity commitment and job satisfaction of academics

book is the most up to date and far reaching in the area With major changes taking place both in the local and global  
contexts of higher education and in the working conditions within individual universities as exemplified by increasing  
managerialism and performance based funding it is important to consider the impact of these changes on the profiles and  
working lives of the academic profession across different countries But it is also important to look at the ways in which the  
faculty s changing profile impacts on the organisation and management of universities and on the delivery of their central  
functions Although not always obvious in the short term academic work and its conditions attract incorporate and promote  
different types of individuals who in turn exert considerable influence on the nature of academic work higher education

of higher education it is important to understand their personal characteristics career trajectories sense of identity and  
commitment and job satisfaction These are central for understanding the academic profession in general and in particular  
the factors affecting their involvement and productivity in the work of their institutions These are a complex result of a  
mixture of contextual factors e g the status and regulatory framework of the higher education system the features and

atmosphere of the particular institution and personal factors e g gender educational attainment family background attitudes to work and broader social values This book examines the different situations facing the academic profession in individual countries and provides comparative studies of country differences      Film Propaganda and American Politics James Combs,Sara T.
