State-Building and Democratization in Bosnia and Herzegovina Soeren Keil,Valery Perry,2016-03-03 State Building and Democratization in Bosnia and Herzegovina details the post Dayton evolution of the country over the last two decades Carefully evaluating the successes and failures the book explores the slow progress of the democratization process and how key elites initially took hold of the state and its institutions and have successfully retained their grip on power despite heavy international presence and reform attempts to counter balance this trend Bosnia and Herzegovina offers a useful lens through which to view international state building and democratization efforts International engagement here incorporated significant civilian and military investment and has been ongoing for many years In each chapter international scholars and field based practitioners examine the link between post war events and a structure that effectively embeds ethno national politics and tensions into the fabric of the country These contributors offer lessons to be learned and practices to be avoided whilst considering whether as state building and democratization efforts have struggled in this relatively advanced European country they can succeed in other fragile states **Albania and the European Union** Mirela

Bogdani,John Loughlin,2007-02-23 When will Albania join the EU Will accession help Albania to achieve prosperity stability and prosperity And what factors are helping it towards this end and what factors are holding it back An original study of Albania and its relations with the EU this is the first book to identify and analyse the problems of the country as it moves towards membership of the Union It explores the political economic and social transformations needed to make Albanian membership possible The authors highlight the enormous democratic changes that have occurred in post communist Albania as well as the many obstacles that still remain This balanced and objective assessment will be an essential resource for everyone interested in the history and future of the Balkans and the EU **Burrs - Analysis, Control and Removal** Jan C.

Aurich,David A. Dornfeld,2009-12-01 In many machining operations burrs cannot be avoided They can affect the functionality and the safe handling of the workpiece in the subsequent processing and have to be removed by a special deburring process Toleration of burrs which are not part of functional edges depends on their respective shape and size High inspection effort is necessary to guarantee the workpiece quality Therefore the research results on burrs with a focus on burr analysis and control as well as on cleanability and burr removal based on the presentations held at the conference are valuable for researchers and engineers in manufacturing development Sociological Abstracts Leo P.
