**Abstract:** Tuberculosis (TB), caused by *Mycobacterium tuberculosis* (MTB), is a prevalent global infectious disease and a leading cause of mortality worldwide. Currently, the only available vaccine for TB prevention is Bacillus Calmette–Guérin (BCG). However, BCG demonstrates limited efficacy, particularly in adults. Efforts to develop effective TB vaccines have been ongoing for nearly a century. In this review, we have examined the current obstacles in TB vaccine research and emphasized the significance of understanding the interaction mechanism between MTB and hosts in order to provide new avenues for research and establish a solid foundation for the development of novel vaccines. We have also assessed various TB vaccine candidates, including inactivated vaccines, attenuated live vaccines, subunit vaccines, viral vector vaccines, DNA vaccines, and the emerging mRNA vaccines as well as virus-like particle (VLP)-based vaccines, which are currently in preclinical stages or clinical trials. Furthermore, we have discussed the challenges and opportunities associated with developing different types of TB vaccines and outlined future directions for TB vaccine research, aiming to expedite the development of effective vaccines. This comprehensive review offers a summary of the progress made in the field of novel TB vaccines.

## 1. Introduction

Tuberculosis (TB) is an ancient disease widely distributed across the world and is the leading cause of death from bacterial infections [1]. In 17–18th century Europe, TB was known as the “white plague”, with almost 100% of Europeans infected and 25% of them dying from the disease [2]. In 1882, Robert Koch, a German microbiologist, deciphered *Mycobacterium tuberculosis* (MTB) as the etiological factor responsible for TB, thereby opening a new chapter in the prevention, diagnosis, and treatment of TB [3]. With the continuous development of anti-TB drugs and improvements in sanitation and living conditions, the incidence and mortality of TB decreased significantly. However, since the 1990s, the global TB epidemic has worsened due to factors such as the emergence of drug-resistant strains of MTB, the use of immunosuppressive agents, drug addiction, poverty, and population movements [4]. TB has become a leading re-emerging infectious disease and a serious global health problem, especially in developing countries.

Despite the effectiveness of anti-TB drugs, eradicating TB still faces many challenges. On 27 October 2022, the World Health Organization (WHO) Global TB Report showed that approximately one-quarter of the world’s population is infected with MTB [4]. In 2021, the estimated global number of new TB cases was 10.6 million, a 4.5% increase from 2020, and the number of deaths from TB was 1.6 million, a 6.7% increase from 2020 [5]. China is one of the countries with a high burden of TB, with an estimated number of TB cases only second to India and Indonesia, accounting for 7.4% of the global TB incidence [5]. In 2015, the WHO introduced the “End TB Strategy”, a comprehensive plan that outlines ambitious targets for the period of 2020–2035. These objectives include a significant reduction of 90% in the

Reading,1997-12-08 Colin Sparks provides a challenging reassessment of the impact of the collapse of communism on the media systems of Eastern Europe He analyzes both the changes themselves and their implications for the ways in which we think about the mass media while also demonstrating that most of the orthodox accounts of the end of communism are seriously flawed There are much greater continuities between the old system and the new than are captured by the theories that argue that there has been a radical and fundamental change Instead of marking the end of critical inquiry or the end of history as some have suggested Sparks argues that the collapse of the communist systems demonstrates how very limited

and frequently incorrect the main ways of discussing the mass media are He concludes with a provocative discussion of the ways in which we need to modify our thinking in the light of these developments      **Hitler's Foreign Policy 1933-1939**

Gerhard L. Weinberg, 2010-03-01 Hitler's path to war consisted of two different stages that paralleled the internal development of Germany From 1933 to the end of 1936 he created a diplomatic revolution in Europe From a barely accepted equal Germany became the dominant power on the continent With the remilitarization of the Rhineland the stalemate in the Spanish Civil War the forming of the Axis and the signing of the Anti Comintern Pact the first phase was completed In the second phase the diplomatic initiative in the world belonged to Germany and its partners Germany's march toward war therefore became the central issue in world diplomacy      **Slovak Pittsburgh** Lisa A. *Salvation* Vladimir Tismaneanu, 2009-06-08 Eastern Europe has become an ideological battleground since the collapse of the Soviet Union with liberals and authoritarians struggling to seize the ground lost by Marxism In *Fantasies of Salvation* Vladimir Tismaneanu traces the intellectual history of this struggle and warns that authoritarian nationalists pose a serious threat to democratic forces A leading observer of the often baffling world of post Communist Europe Tismaneanu shows that extreme nationalistic and authoritarian thought has been influential in Eastern Europe for much of this century while liberalism has only shallow historical roots Despite democratic successes in places such as the Czech Republic and Poland he argues it would be a mistake for the West to assume that liberalism will always triumph He backs this argument by showing how nationalist intellectuals have encouraged ethnic hatred in such countries as Russia Romania and the former Yugoslavia by reviving patriotic myths of heroes scapegoats and historical injustices And he shows how enthusiastically these myths have been welcomed by people desperate for some form of salvation from political and economic uncertainty On a theoretical level Tismaneanu challenges the common ideas that the ideological struggle is between right and left or between nationalists and internationalists In a careful analysis of the conflict's ideological roots he argues that it is more useful and historically accurate to view the struggle as between those who embrace the individualist traditions of the Enlightenment and those who reject them Tismaneanu himself has been active in the intellectual battles he describes particularly in his native Romania and

makes insightful use of interviews with key members of the dissident movements of the 1970s and 1980s He offers original observations of countries from the Baltic to the Black Sea and expresses his ideas in a vivid and forceful style *Fantasies of Salvation* is an indispensable book for both academic and nonacademic readers who wish to understand the forces shaping one of the world's most important and unpredictable regions *The Spectator*, 1917
