Bates, 2001 Prosperity and Violence considers the history of human civilization and explains the origins of the modern state focusing on the evolution of capitalism as cultures move from dispersed agrarian clans to the dense modern metropolis Informed by firsthand experience with the political and economic development of many diverse cultures Bates demonstrates how successful modern states harness ethnic diversity for prosperity rather than for violence and political power Brief and compelling Prosperity and Violence is certain to be an excellent supplement in any comparative politics course

Crisis of the State Bruce Kapferer, Bjørn Enge Bertelsen, 2009 Analyzing both historical contexts and geographical locations this volume explores the continuous reformation of state power and its potential in situations of violent conflict The state otherwise understood as an abstract and transcendent concept in many works on globalization in political philosophy is instead located and analyzed here as an embedded part of lived reality This relationship to the state is exposed as an integral factor to the formation of the social whether in Africa the Middle East South America or the United States Through the examination of these particular empirical settings of war or war like situations the book further argues for the continued importance of the state in shifting social and political circumstances In doing so the authors provide a critical contribution to debates within a broad spectrum of fields that are concerned with the future of the state the nature of sovereignty and globalization

The Political Economy of the Great Lakes Region in Africa Stefaan Marysse, 2005-10-21 This book examines the international factors such as enforced democracy and globalization that have affected the Great Lakes region of Africa The horrendous consequences in terms of violence and human suffering of the events in this area have been exhibited in the media however news coverage after 1994 was at times unreliable This book takes a look at life since then adopting an independent and on occasion controversial perspective

The Political Economy of Aid and Accountability Helen Tilley, 2016-02-24 The provision of aid is increasingly under scrutiny with increasing demands for results This raises the question what are our expectations from aid and are they realistic Too often accountability is argued for without questioning if what is understood by the term is relevant or applicable The Political Economy of Aid and Accountability The Rise and Fall of Budget Support in Tanzania explores the real meaning of accountability and argues for a new approach to aid more relevant to recipient countries Offering fresh insightful ideas Helen Tilley presents a contemporary theory of accountability through a case study of the delivery of general budget support in Tanzania By considering the wider system of often

contradictory political and social relations that influence and in turn constrain donor government relations she questions the traditional understanding of accountability and deconstructs its epistemological assumptions Engaging in an interdisciplinary discussion drawing upon economics sociology political science anthropology psychology and philosophy the book constructs a modern and nuanced understanding of accountability and foreign aid

A Tributary Model of State Formation Berhanu Abegaz, 2018-06-09 A Tributary Model of State Formation Ethiopia 1600 2015 addresses the perplexing question of why a pedigreed Ethiopian state failed to transform itself into a nation state Using a comparative institutionalist framework this book explores why Ethiopia an Afroasian civilizational state has yet to build a modern political order comprising a sturdy state the rule of law and accountability to the ruled The book provides a theoretical framework that contrasts the European and the Afroasian modes of state formation and explores the three major variants of the Ethiopian state since 1600 Gondar Shewa and Revolutionary It does this by employing the conceptual entry point of tributarism and teases out the implications of this perspective for refashioning the embattled postcolonial African political institutions The primary contribution of the book is the novel framing of state formation through the lens of a landed Afroasiatic peasantry in giving rise to a fragile state whose redistributive preoccupation preempted the emergence of a productive economy to serve as a buoyant revenue base Unlike feudal Europe the dependence of the Afroasian state on arm's length overlordship rather than on tightly managed landlordship incentivized endemic extractive contests among elites with the capacity for violence for the non fixed tribute from independent wealth producers Tributarism I argue here stymied the transition from a resilient statehood to a robust nation statehood that befits an open order society This book will be of interest to scholars in economics political science political economics and African Studies Berhanu Abegaz is Professor of Economics College of William Mary USA

Political Economy in the Middle East and North Africa Rachid Mira, 2024-12-20 Many countries in the Middle East and North Africa continue to face major economic and political challenges including volatile economic growth low economic diversification high unemployment levels and in some cases pervasive authoritarian regimes These economic and political challenges are interdependent and reform is needed in both spheres if structural long lasting change is going to be achieved This book combines the World Bank's concept of good governance with other analytical tools of political economy including rent seeking theory political settlements approach the resource curse and Dutch Disease to explore how government institutions in the region affect economic reforms and vice versa The book also examines the role of institutions and performance of governance on rent distribution evaluating how governments manage their sometimes abundant natural resources In some rentier states governments are clearly utilizing these resources for their own political ends even at the cost of negatively impacting economic growth job creation and social service provision Economic growth is also constrained by low flows of both private and public investment toward productive sectors that need it The book analyzes the differences between

countries in the Middle East and North Africa in their economic and political structures to show how sustainable economic growth and a level of political democratization can be achieved through enhancing governance institutions This book will be invaluable reading for researchers on the political economy of the Middle East and institutional economics

Pillars of Prosperity Timothy Besley, Torsten Persson, 2011-08-08 How nations can promote peace prosperity and stability through cohesive political institutions Little else is required to carry a state to the highest degree of opulence from the lowest barbarism but peace easy taxes and a tolerable administration of justice all the rest being brought about by the natural course of things So wrote Adam Smith a quarter of a millennium ago Using the tools of modern political economics and combining economic theory with a bird s eye view of the data this book reinterprets Smith s pillars of prosperity to explain the existence of development clusters places that tend to combine effective state institutions the absence of political violence and high per capita incomes To achieve peace the authors stress the avoidance of repressive government and civil conflict Easy taxes they argue refers not to low taxes but a tax system with widespread compliance that collects taxes at a reasonable cost from a broad base like income And a tolerable administration of justice is about legal infrastructure that can support the enforcement of contracts and property rights in line with the rule of law The authors show that countries tend to enjoy all three pillars of prosperity when they have evolved cohesive political institutions that promote common interests guaranteeing the provision of public goods In line with much historical research international conflict has also been an important force behind effective states by fostering common interests The absence of common interests and or cohesive political institutions can explain the existence of very different development clusters in fragile states that are plagued by poverty violence and weak state capacity

State-Building Aidan Hehir, Neil Robinson, 2007-03-06 This study brings together internationally renowned academics to provide a detailed insight into the theory and practice of state building State building is one of the dominant themes in contemporary international relations This text addresses both the theoretical logic behind

state building and key practical manifestations of this phenomenon Unlike how to manuals that seek to identify best practice this book interrogates the normative assumptions inherent in this practice and the manner in which state building impacts on contemporary international relations The logic of state building is explored and analyzed providing insight into the historical context that catalyzed this process the relationship between international law and the practice of international administration and the political ramifications and implications of external governance Case studies on Bosnia Kosovo and East Timor provide practical examples of key contradictions within the state building process highlighting the lack of accountability democracy and vision manifest in these operations Offering a coherent critical analysis of an increasingly important international issue State Building will appeal to students and scholars of international relations comparative politics and political theory
