Prosperity For All:

Prosperity for All Roger E.A. Farmer, 2016-09-09 In the aftermath of the 2008 financial crisis economists around the world have advanced theories to explain the persistence of high unemployment and low growth rates According to Roger E A Farmer these theories can be divided into two leading schools of thought the ideas of pre Keynesian scholars who blame the recession on bad economic policy and the suggestions of New Keynesian scholars who propose standard modifications to select assumptions of Keynes General Theory But Farmer eschews both these schools of thought arguing instead that in order to mitigate current financial crises and prevent future ones macroeconomic theory must become attuned to present day conditions Governments need to intervene in asset markets in a manner similar to the recent behavior of central banks and principal actors in the international economy need to pursue financial stability The primary mechanism for securing such stability would be for sovereign nations to create sovereign wealth funds backed by the present value of future tax revenues These funds would function along the lines in which exchange traded funds currently operate and in time they would become the backbone for stabilizing financial markets Written in clear accessible language by a prominent macroeconomic theorist Prosperity for All proposes a paradigm shift and policy changes that could successfully raise employment rates keep inflation at bay and stimulate growth

GIs and Frèauleins Maria H. Höhn, 2002 Hohn explores the encounter between Germans and the American troops stationed in the Rhineland Palatinate a state in southwest Germany during the 1950s Hohn shows that German anxieties over widespread Americanization were also debates about proper gender norms and racial boundaries and that while the American military brought democracy with them to Germany they also brought Jim Crow

and the employment aspirations of young less educated black men and consider their implications for the design of employment services welfare to work policies workforce development policy and child support enforcement Two chapters comprehensively review policy opportunities to assist less educated young black fathers and discuss how to overcome political resistance to initiatives serving less educated black men This book makes a compelling case for greater public attention to a serious domestic problem *American Apocalypse* M.G. Hinkelammert, 2008-02-29 The issue of private property and the rights it confers remain almost undiscussed in critiques of globalization and free market economics Yet property lies at the heart of an economic system geared to profit maximization The authors describe the historically specific and self consciously explicit manner in which it emerged They trace this history from earliest historical times and show how in the hands of Thomas Hobbes and John Locke in particular the notion of private property took on its absolutist nature and most extreme form a form which neoliberal economics is now imposing on humanity worldwide through the pressures of globalization They argue that avoiding the destruction of people s ways of living and of Nature requires reshaping our notions of private property They look at practical ways for social and ecumenical movements to press for alternatives *A Few Thousand Dollars* Robert E.
