Protecting Children from Abuse and Neglect James Garbarino, S. Holly Stocking, 1980 Preventing Child Maltreatment Kenneth A. Dodge, Doriane Lambelet Coleman, 2009-06-18 Many child abuse prevention programs have targeted factors within the family such as parenting skills This book describes the next wave of prevention the promotion of safer healthier childrearing environments in entire communities The contributors are leading authorities who illuminate how contextual factors including poverty chaotic neighborhoods and lack of social supports combine with family factors to place children at risk for maltreatment They present a range of exemplary programs designed to strengthen communities while also helping individual parents to meet their children s needs Real world evaluation approaches quality control strategies and policy implications are discussed in depth **America's Family Support Programs** Sharon Lynn Kagan, 1987-01-01 Essays discuss the prevention of child abuse day care family education program funding and staffing family research and program evaluation **Understanding Child Abuse and Neglect** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel on Research on Child Abuse and Neglect, 1993-02-01 The tragedy of child abuse and neglect is in the forefront of public attention Yet without a conceptual framework research in this area has been highly fragmented Understanding the broad dimensions of this crisis has suffered as a result This new volume provides a comprehensive integrated child oriented research agenda for the nation The committee presents an overview of three major areas Definitions and scope exploring standardized classifications analysis of incidence and prevalence trends and more Etiology consequences treatment and prevention analyzing relationships between cause and effect reviewing prevention research with a unique systems approach looking at short and long term consequences of abuse and evaluating interventions Infrastructure and ethics including a review of current research efforts ways to strengthen human resources and research tools and guidance on sensitive ethical and legal issues This volume will be useful to organizations involved in research social service agencies child advocacy groups and researchers Child Abuse and Neglect John T. Pardeck, 2021-12-23 First Published in 1989 Child Abuse and Neglect attempts to focus on the problem of child maltreatment by using a multidisciplinary approach It presents findings from the fields of psychiatry psychology education sociology and social work from a broad theoretical perspective Both micro and macro approaches are stressed in the work with particular emphasis on social factors related to child abuse and neglect characteristics of adults and families likely to abuse and neglect and interesting strategies of treatment including family therapy Professionals actively involved in research and theory building as well as those who work directly with abused and neglected children will find this book a useful form of reference Child Abuse and Neglect Jill Korbin, 2024-07-26 One understanding of child maltreatment is limited in that it is based almost entirely on research and clinical experience in Western nations The cross cultural record a natural laboratory of human behavior allows a consideration of child abuse and neglect from the perspective of a wider range

of social and environmental conditions Each of the nine original essays in this volume examines child rearing practices and child maltreatment in the context of a culture very different from our own There is no universal standard for optimal child rearing nor for child abuse and neglect Seeking culturally appropriate definitions of child abuse the authors stress the socialization goals of the particular cultural group the intentions and beliefs of adults in the group and the interpretations children place on their treatment The authors differentiate practices such as harsh initiation rites severe punishment or conversely many Western practices viewed as abusive by other cultures from idiosyncratic mistreatment by individuals They further distinguish idiosyncratic child abuse and neglect from the suffering caused children and their families by circumstances such as poverty food scarcity and disease Though several of the essays focus on the socioeconomic factors implicated in the etiology of child abuse particularly rapid socioeconomic change they indicate that cultural factors determine how a society will respond to negative socioeconomic conditions The authors concur that while children may be exposed to considerable hardship in these non Western societies harm at the hands of individual caretakers is rare They consider factors in the cultural context that may act either to increase or to decrease the likelihood of child abuse and neglect Among these factors are the value that a culture places on children in general categories of children that are more vulnerable to mistreatment beliefs about the developmental age capabilities of children and most important the embeddedness of child rearing in a network of kin and community that extends beyond individual biological parents

closely allied with many other fields *Handbook of Social Support and the Family* Gregory R. Pierce, I.G. Sarason, 2013-06-29 While insights sometimes are slow in coming they often seem obvious when they finally arrive This handbook is an outcome of the insight that the topics of social support and the family are very closely linked Obvious as this might seem the fact remains that the literatures dealing with social support and the family have been deceptively separate and distinct For example work on social support began in the 1970s with the accumulation of evidence that social ties and social integration play important roles in health and personal adjustment Even though family members are often the key social supporters of individuals relatively little research of social support was targeted on family interactions as a path to specifying supporter processes It is now recognized that one of the most important features of the family is its role in providing the individual with a source of support and acceptance Fortunately in recent years the distinctness and separateness of the fields of social support and the family have blurred This handbook provides the first collation and integration of social support and family research This integration calls for specifying processes such as the cognitions associated with poor support availability and unrewarding family constellations and factors such as cultural differences in family life and support provision that are pertinent to integration *Child Maltreatment* Dante Cicchetti, Vicki
