THE ULTIMATE INTERPRETATION XING FOO, This book deciphers the three ultimate questions in human philosophy from a new and simplified perspective It opens up the underlying logical relationship between life the universe and human society It completely overturns the traditional scientific perception and understanding of happiness The book

redefines the nature of organisms and the essence of life by peeling back the layers of contradictions in the evolution of organisms and the evolution of human civilization This book proposes the hypothesis of female and male particles basexon and baseyon that can reach the upper bound of human imagination to reinterpret the natural significance of several existing scientific cognitions The analysis of the complexity trap of current scientific cognition is also included The book proposes two major visions for transforming human society forgetting about learning and the trust revolution These visions serve as a guide for the reader s thoughts and actions on how to achieve a true sense of freedom and happiness The book contains numerous interesting and subversive ideas which are discussed at length throughout the text Due to space limitations only a few examples can be listed here Biological nature is a strategic choice for survival reproduction security and connection in terms of energy balance intake and lock in Voluntary mutation is a strategy for trial and error and preparation for the next evolutionary leap Biological inheritance and passive variation are determined by four stratified genes which are sequentially influenced by the environment The physical form of life is characterized by a boundary that separates the inside from the outside The crucial phases of the birth of life forms both biotic and abiotic involve material combination and aggregation The use of language and thinking by humans has advantages during the connections among humans but it also brings the disadvantage of complexity and reliance on shifting trust mechanisms Organisms follow a biological constitution in the pursuit of bioactivity their origin similar to the law of abiogenesis in the cosmos

Seaweeds as Plant Fertilizer, Agricultural Biostimulants and Animal Fodder Leonel Pereira, Kiril Bahcevandziev, Nilesh H. Joshi, 2019-10-18 The main effects of Seaweed extracts *Ascophyllum* *Fucus* *Sargassum* *Saccorhiza* *Laminaria* *Gelidium* and others when used as agricultural fertilizers are better seed germination and higher quality fruit production with longer shelf life, better use of soil nutrients, more productive crops and plants with greater resistance to unfavorable environmental conditions. Algae also have a long history of use as animal feed. They have a highly variable composition depending on the species, collection season and habitat and on external conditions such as water temperature, light intensity and nutrient concentration in water. In relation to ruminal fermentation, a high variability of the digestibility values was found among seaweed species and cannot be attributed only to the composition of different nutrients of the algae. The role of marine algae for reduction of methane production is discussed with particular emphasis on novel algae-based feed strategies that target minimal methane emissions without affecting the functionality of the microbiota and overall animal productivity. **Key Features:** Sustainable Agriculture, Natural Feeding, Nutrients, Liquid Seaweed, Agricultural Biostimulants, Natural Pesticides. *EBOOK: Biology* Peter Raven, George Johnson, Kenneth Mason, Jonathan Losos, Susan Singer, 2013-02-16 Committed to Excellence in the Landmark Tenth Edition.
