Childs, 2004 Shaping the Wolf Within Your Dog is a comparison study of wolf and dog behavior It is also a comprehensive guide for living in harmony with dogs We know dogs are genetically related to the wolf and both exhibit identical instincts behaviors temperaments and dispositions and both abide to the law of nature that contends for any animal grouping to survive there must be social order and communication between its members Knowing this we should learn all we can about wolf behavior and incorporate that knowledge with our dogs By learning how pack animals establish social order and communicate with one another we can use this information to shape our dogs natural instincts without having to use food bribes or violence When we communicate in our dogs language we will be able to communicate our leadership The outcome will be predictable for we will be using the same methods of an alpha wolf when he establishes and maintains social order with a pack of wolves We will be shaping the same wolf instincts that are intact and engaged in each of our dogs Shaping the

have made a good choice Herd protection dogs are something very special and that in every respect They impress not only with their imposing size but also by their external appearance This can be very striking depending on the breed While some come up with a beautiful long and white coat others have shaggy hair that looks like dreadlocks Many of these guard dogs have in common that they are descended from Asian dogs which came to Europe many thousands of years ago through the migrations These dogs already possessed the important qualities of natural protection and guarding instincts and also the gift of acting independently and making decisions without human interference The contents of the book are Difference guard dog and herding dog A portrait of guard dogs Which breeds are there Education of the dogs Herding dogs at home FCI Standards Summary Even the diet of the guard dogs which is still unusual today can be traced back to this time They are not fed like conventional domestic dogs but much lower in protein Furthermore these dogs are also able to digest dairy products which is not the case with normal dogs and can lead to digestive disorders Now the future owner of such a dog should be aware however that likewise the attitude and education can lead to considerable problems Such a large dog needs a lot of space and it is not enough to have a small garden The demands of a guard dog are somewhat higher and you must be able to fulfill them so that your companion can lead a species appropriate life As you can see from these few lines a guard dog is not a dog for everyone It belongs in absolutely experienced hands If you belong to these experienced hands inform yourself in this guide about the different breeds of guard dogs Learn what belongs to their strengths and weaknesses and whether such a special dog is also suitable as a family dog Have fun reading and learn
