Plant Genetic Resources of Legumes in the Mediterranean Nigel Maxted, Sarita Jane Bennett, 2013-03-14 Genetic erosion that is the loss of native plant and genetic diversity has been exponential from the Mediterranean Basin through the Twentieth century This careless eradication of species and genetic diversity as a result of human activities from a hot spot of diversity threatens sustainable agriculture and food security for the temperate regions of the world Since the early 1900s there has been a largely ad hoc movement to halt the loss of plant diversity and enhance its utilisation The Convention on Biological Diversity and Food and Agriculture Organisation of the United Nations International Undertaking on Plant Genetic Resources both highlight the need to improve conservation methodologies and enhance utilisation techniques It has been argued that the most important component of biodiversity is the genetic diversity of crop and forage species used to feed humans and livestock These cultivated and related wild species provides the raw material for further selection and improvement Leguminosae species are of major economic importance peas chickpeas lentils and faba beans as well as numerous forage species and provide a particularly rich source of protein for human and animal foods Their distribution is concentrated in the Mediterranean region and therefore the improvement of their conservation and use in the region is critical This text is designed to help ensure an adequate breadth of legume diversity is conserved and to help maximise the use of that conserved diversity The subjects of conservation and use of legume diversity the Mediterranean ecosystem and taxonomy of legumes are introduced Generic reviews of the taxonomy centre of diversity ecogeographic distribution genetic diversity distribution conservation status conservation gaps and future research needs are provided along with a discussion of the importance of rhizobia to the maintenance of legume diversity Current ex situ and in situ conservation activities as well current legume uses are reviewed In conclusion future priorities for ex situ and in situ plant genetic conservation and use of Mediterranean legumes are highlighted All contributors look forward rather than simply reviewing past and current activities and therefore it is hoped that the identification of genetic erosion location of taxonomic and genetic diversity and promotion of more efficient utilisation of conserved material will be enhanced Renegotiating Community William D. Coleman, Diana Brydon, 2009-01-01 Both as a concept and a set of social relationships community is central to contemporary debates about globalization Faced with finding a livable response to globalization many communities are renegotiating their

identities and functions and in some instances entirely new communities are being formed Yet there is no clear consensus on why community matters or on how globalization affects particular communities Renegotiating Community asks what happens to the autonomy of individuals and communities under the influence of globalization Original case studies show how a range of communities are renegotiating the meanings of community and autonomy while living with and sometimes challenging the processes of globalization By addressing the coercive and comforting dimensions of community as well as the need to reconcile conflicting claims to autonomy this book redraws the conceptual maps through which community globalization and autonomy are understood Biological Diversity Louise E. Buck, Charles C. Geisler, John Schelhas, Eva Wollenberg, 2001-06-21 We live in a world of wide pendulum swings regarding management policies for protected areas particularly as they affect the involvement of local people in management Such swings can be polarizing and halt on the ground progress There is a need to find ways to protect biodiversity while creating common ground and building management capacity thr Routledge Handbook of International Environmental Law Shawkat Alam, 2013 This handbook is an advanced level reference guide which provides a comprehensive and contemporary overview of the corpus of international environmental law IEL Hottest of the Hotspots Benjamin Neimark, 2023-11-28 Continually recognized as one of the hottest of all the world's biodiversity hotspots the island of Madagascar has become ground zero for the most intensive market based conservation interventions on Earth This book details the rollout of market conservation programs including the finding drugs from nature or bioprospecting biodiversity offsetting and the selling of blue carbon credits from mangroves It documents the tensions that exist at the local level and provides a voice for community workers many times left out of environmental policy discussions ultimately in the hope of offering critiques that build better conservation interventions with perspectives of the locals **Development, Trade, and the WTO** Bernard M. Hoekman, Aaditya Mattoo, Philip English.2002 Publisher's description Developing countries are increasingly confronted with the need to address trade policy related issues in international agreements most prominently the World Trade Organization WTO New WTO negotiations on a broad range of subjects were launched in November 2001 Determining whether and how international trade agreements can support economic development is a major challenge Stakeholders in developing countries must be informed on the issues and understand how their interests can be pursued through international cooperation. This handbook offers guidance on the design of trade policy reform surveys key disciplines and the functioning of the World Trade Organization WTO and discusses numerous issues and options that confront developing countries in using international cooperation to improve domestic policy and obtain access to export markets Many of the issues discussed are also relevant in the context of regional integration agreements Separate sections of the handbook summarize what constitutes sound trade policy the major aspects of the WTO from a development perspective policy issues in the area of merchandise trade and the liberalization of international transactions in services protection of intellectual property rights and economic development new regulatory

subjects that are emerging in the agenda of trade talks and enhancing participation of developing countries in the global Forest Certification Daniel J Vogt, Bruce C Larson, John C Gordon, Anna Fanzeres, 1999-11-29 Forest trading system Certification examines the historical roots of forest certification the factors that guide the development of protocols the players involved the factors determining the customers to be certified and the benefits of certification It covers terminology and issues that direct the structure of standards the similarities between indicators of different human disturbances within the ecosystem landscape and certification standards It documents the roles of human values in the development of assessment protocols and demonstrates how elements should be used to produce non value based standards **Movements in India** Raka Ray, Mary Fainsod Katzenstein, 2005-03-25 Social movements have played a vital role in Indian politics since well before the inception of India as a new nation in 1947 During the Nehruvian era from Independence to Nehru's death in 1964 poverty alleviation was a foundational standard against which policy proposals and political claims were measured at this time movement activism was directly accountable to this state discourse However the role of social movements in India has shifted during the last several decades to accompany a changed political focus from state to market and from reigning ideologies of secularism to credos of religious nationalism In the first volume to focus on poverty and class in its analysis of social movements a group of leading India scholars shows how social movements have had to change because poverty reduction no longer serves its earlier role as a political template Nonetheless particular sectors of social movement politics remain the holding vessels for India's egalitarian conscience With distinctive chapters on gender lower castes environment the Hindu Right Kerala labor farmers and biotechnology Social Movements in India will be attractive to students and researchers in many different disciplines Contributions by Amita Baviskar Anuradha Chakravarty Vivek Chibber Gopal Guru Patrick Heller Ron Herring Mary John Mary Fainsod Katzenstein Neema Kudva Gail Omvedt Raka Ray and Tanika Sarkar In Search of Sustainable Water Management Douglas S. Kenney, 2006-01-01 This edited volume adeptly analyzes some of the most salient challenges that face water managers and policy makers balancing private and public sector roles in water allocation protecting environmental values and indigenous rights to water avoiding transboundary water conflicts and integrating the concept of sustainable development within water policies the chapters in this book are comprehensive and well balanced Kenney and his colleagues have put forth an important contribution to western water policy scholarship They offer concrete ideas for sustainable water management in the western US informed by international cases while acknowledging the West's unique political and social context Tanya Heikkila Journal of the American Water Resources Association Collectively the papers provide concise insightful coverage of critical water problems in the US and carefully integrate relevant lessons from international water management into these discussions Highly recommended B F Hope Choice Water issues in the American West share many similarities with those seen elsewhere in the world as population growth exacerbates longstanding problems of inappropriate water use and management The

contributors to this timely volume examine the universal challenge of sustainable water management to improve the use of water resources already developed and find ways to moderate our growing collective thirst The volume begins with an exploration of the opportunities arguments and mechanisms for transferring lessons between the American West and foreign nations Succeeding chapters cover individual issues such as water allocation and the relationship between market mechanisms and government based approaches the challenge of environmental protection the protection of cultural values with a focus on indigenous water rights the significance of international and interstate rivers in promoting regional conflict and cooperation and the role of water management in sustainable development A comprehensive look at one of our most pressing issues In Search of Sustainable Water Management will be of great interest to scholars and practitioners in the areas of water management law policy studies economics planning and public administration Search for New Genes Benjamin Peary Pal, 2007 Contributed papers presented at the Symposium festschrift for Benjamin Peary Pal 1906 1989 Indian agricultural scientist The Ex Situ Conservation of Plant Genetic Resources J.G. Hawkes, Nigel Maxted, B.V. Ford-Lloyd, 2012-12-06 It is a distressing truism that the human race during the last millennium has caused the exponential loss of plant genetic diversity throughout the world This has had direct and negative economic political and social consequences for the human race which at the same time has failed to exploit fully the positive benefits that might result from conserving and exploiting the world's plant genetic resources. However a strong movement to halt this loss of plant diversity and enhance its utilisation for the benefit of all humanity has been underway since the 1960 s Frankel and Bennett 1970 Frankel and Hawkes 1975 This initiative was taken up by the Convention on Biological Diversity CBD 1992 that not only expounds the need to conserve biological diversity but links conservation to exploitation and development for the benefit of all Article 8 of the Convention clearly states the need to develop more effective and efficient guidelines to conserve biological diversity while Article 9 along with the FAO International Undertaking on Plant Genetic Resources promotes the adoption of a complementary approach to conservation that incorporates both ex situ and in situ techniques **Efficient Conservation Of Crop Genetic Diversity** Detlef Virchow, 2013-03-09 The book reflects the work in progress regarding the analysis of the costs of crop genetic resources conservation that has been conducted at various research institutes over the last couple of years including research conducted at ZEF and asso ciated institutes In addition contributions in this publication were presented at a special session during the Global Dialogue The Role of the Village in the 2 1 Century Crops Jobs and Livelihood in Hannover Germany at the World Exposition in Au gust 2000 The purpose of the publication is to make a general contribution to the ongoing discussion about the conservation of crop genetic resources as part of the global strategy to secure increasing food production in a sustainable way Specifically it discusses the costs of the worldwide efforts to conserve crop genetic resources on the basis of theoretical and applied studies It aims to serve decision makers at different levels with information on the costs involved in the conservation of genetic resources and hence to increase the awareness of the

importance of improving the cost effectiveness of different conservation methods in order to optimize the sus tainability of conservation The quoted Leipzig Declaration which was adopted at the Fourth International Technical Conference on Plant Genetic Resources in Leipzig in June 1996 dem onstrates the close linkage of the contributions to the ongoing discussion about the implementation of the Global Plan of Actionfor the Conservation and Sustainable Utili zation of Plant Genetic Resources for Food and Agriculture Managing Natural Wealth Jeffrey R. Vincent, Rozali Mohamed Ali, 2010-09-30 The remarkably rich natural environment of Malaysia attracts the interest of both industry and the environmental community Managing Natural Wealth analyzes major natural resource and environmental policy issues in the country during the 1970s and 1980s a period of profound socioeconomic change rapid depletion of natural resources and the emergence of serious problems with pollution Managing Natural Wealth is an important up date to Environment and Development in a Resource Rich Economy Malaysia under the New Economic Policy First published in hardcover in 1997 this pathbreaking book emphasized economics as a source for analyzing the issues involved in environmental and natural resource management in developing countries The access that Jeffrey Vincent and Rozali Mohamed Ali and the contributing authors had to unpublished data and key decisionmakers made their account an essential reference for policymakers and researchers in Malaysia and throughout the globe Managing Natural Wealth includes a review of key developments since the 1990s by S Robert Aiken and Colin H Leigh two geographers with a long standing interest in environmental change in Malaysia and an understanding of the institutional context of its environmental policy that is unmatched in the scholarly community

Community Resources Johanna Gibson,2016-12-05 Protection of traditional knowledge and resources is of critical concern not only to the groups involved but also to the international trading community for which these resources are of increasing economic importance This work examines the concept of community intellectual property models and additional sources for protection at international law including environmental and human rights frameworks Intellectual property law is critiqued as an inadequate framework to address the fundamental object of protection for the communities themselves the management of traditional use as well as the biological and cultural sustainability of this use The work sets out an international framework based on the concept of community resources recognizing the unique claims embodied in traditional knowledge incorporating customary law and facilitating community management of resources International in perspective and scope the book will be a valuable resource for academics and researchers in law international relations and cultural studies \*\*General Technical Report PNW-GTR\*\*, 2006\*\* The SAGE Handbook of Environment and Society Jules\*\* Pretty, Andy Ball, Ted Benton, Julia Guivant, David R Lee, David Orr, Max Pfeffer, Professor Hugh Ward, 2007-10-30 A monumental and timely contribution to scholarship on society and environments The handbook makes it easy and compelling for anyone to learn about that scholarship in its full manifestations and as represented by some of the most highly respected researchers and thinkers in the English speaking world It is wide reaching in scope and far reaching in its implications for
