Momber, 2003-12-18 KEY FEATURES This technique is

growing in importance The first comprehensive book in this subject A practical and comprehensive account of the technology and applications of hydroblasting a technique used more and more in the preparation of steel and other surfaces Steel surfaces will corrode unless they are properly prepared and coated Such corrosion can have disastrous effects eg bridge collapse therefore the preparation of the surface is of major importance Due to environmental pressure to move away from grit blasting high pressure water can now be used to prepare surfaces with few environmental costs This book systematically and critically reviews the state of current hydroblasting technology and its applications The book is essentially practical in nature and is written by an expert in the field *Handbook of Corrosion Data* Bruce D. Craig, David S. Anderson, 1994-12-31

This book makes it easy for you to find what effect environment has on the corrosion of metals and alloys However this volume offers information on additional environments including concrete soil groundwater distilled water sodium acetate and more ThereAs also updated and expanded coverage of previously discussed environments as well as information on environments which deal with the dairy food brewing aerospace petrochemical and building industries The environments are listed alphabetically Each listing includes a general description of the conditions a comment on the corrosion characteristics of various alloys in such a situation a bibliography of recent articles specific to the environment tables consolidating and comparing corrosion rates at various temperatures and concentrations for various alloys and graphical information Also included are summaries on the general corrosion characteristics of major metals and alloys **Paint and Coating Testing**
