Protocol Specification, Testing and Verification XV Piotr Dembinski, Marek Sredniawa, 2016-01-09 This volume presents the latest research worldwide on communications protocols emphasizing specification and compliance testing It presents the complete proceedings of the fifteenth meeting on Protocol Specification Testing and Verification arranged by the International Federation for Information Processing Protocol Specification, Testing, and Verification, VI Concordia University, Université de Montréal, 1987 Protocol Specification, Testing, and Verification, XII R. J. Linn, M. Ü Uyar, 1992 For more than a decade researchers and engineers have been addressing the problem of the application of formal description techniques to protocol specification implementation testing and verification This book identifies the many successes that have been achieved within the industrial framework and the difficulties encountered in applying theoretical methods to practical situations Issues discussed include testing and certification verification validation environments and automated tools formal specifications protocol conversion implementation specification languages and models Consideration is also given to the concerns surrounding education available to students and the need to upgrade and develop this through sponsorship of a study of an appropriate curriculum at both undergraduate and graduate levels It is hoped this publication will stimulate such support and inspire further research in this important arena *Protocol Specification, Testing and Verification XIV* S.T. Vuong, Samuel T. Chanson, 2013-11-11 This PSTV 94 Symposium is the fourteenth of a series of annual meetings organized under the auspices of IFIP W G 6 1 a Working Group dedicated to Architectures and Protocols for Computer Networks This is the oldest and most established symposium in the emerging field of protocol engineering which has spawn many international conferences including FORTE International Conference on Formal Description Tech niques IWPTS International Workshop on Protocol Test Systems ICNP Interna tional Conference on Network Protocols and CAY Conference on Computer Aided Verification The main objective of this PSTV symposium is to provide a forum for researchers and practitioners in industry and academia interested in advances in using formal methods and methodologies to specify develop test and verify communication protocols and distributed systems This year s PSTV symposium enjoys a nice mixture of formal methods and practical issues in network protocols through the invited addresses of three outstanding speakers Ed Brinksma University of Twente Raj Jain Ohio State University and David Tennenhouse MIT as well as 5 tutorials in addition to 9 techni cal sessions and two practical panel sessions The 5 tutorials are offered on the first day in two parallel tracks for intensive exposure on hot topics of current interest This year out of 51 submissions the Program Committee selected 18 regular papers with an allotment of 16 pages in the Proceedings and 9 mini papers of 8 pages **Formal Description Techniques and Protocol Specification, Testing and Verification** Atsushi Togashi, Tadanori Mizuno, Norio Shiratori, Teruo Higashino, 2013-06-05 FORTE PSTV 97 addresses Formal Description Techniques FDTs applicable to Distributed Systems and Communication Protocols such as Estelle LOTOS SDL ASN 1 TTCN Z Automata Process Algebra

Logic The conference is a forum for presentation of the state of the art in theory application tools and industrialization of FDTs and provides an excellent orientation for newcomers Electronic Chips & Systems Design Languages Jean Mermet, 2013-03-09 Electronic Chips Systems Design Languages outlines and describes the latest advances in design languages The challenge of System on a Chip SOC design requires designers to work in a multi lingual environment which is becoming increasingly difficult to master It is therefore crucial for them to learn almost in real time from the experiences of their colleagues in the use of design languages and how these languages have become more advanced to cope with system design System designers as well as students willing to become system designers often do not have the time to attend all scientific events where they could learn the necessary information This book will bring them a selected digest of the best contributions and industry strength case studies All the levels of abstraction that are relevant from the informal user requirements down to the implementation specifications are addressed by different contributors The author together with colleague authors who provide valuable additional experience presents examples of actual industrial world applications Furthermore the academic concepts presented in this book provide excellent theories to student readers and the concepts described are up to date and in so doing provide most suitable root information for Ph D postgraduates **Protocol Specification, Testing and Verification XV** Piotr Dembinski, Marek Sredniawa, 1995-11-30 This volume presents the latest research worldwide on communications protocols emphasizing specification and compliance testing It presents the complete proceedings of the fifteenth meeting on Protocol Specification Testing and Verification arranged by the International Federation for Information Processing *Protocol Test Systems VIII* Ana Cavalli, Stan Budkowski, 2013-03-09 IWPTS 95 International Workshop on Protocol Test Systems is being held this year at NT Institut National des Telecommunications Evry France from 4 to 6 September 1995 IWPTS 95 is the eighth of a series of annual meetings sponsored by the IFIP Working Group WG6 1 dedicated to Architecture and Protocols for Computer Networks The seven previous workshops were held in Vancouver Canada 1988 Berlin Germany 1989 Mclean USA 1990 Leidschendam The Netherlands 1991 Montreal Canada 1992 Pau France 1993 and Tokyo Japan 1994 The workshop is a meeting place where both research and industry theory and practice come together By bringing both researchers and practitioners together IWPTS opens up the communication between these groups This helps keep the research vital and improves the state of the practitioner s art Forty eight papers have been submitted to IWPTS 95 and all of them have been reviewed by the members of the Program Committee and additional reviewers The completed reviewers list is included in this Proceedings Based on these reviews the Program Committee selected 26 for oral presentation and 4 to be presented as posters Two specially invited papers complete the Workshop Program which is composed of ten sessions Testing Methods Session 1 Test Environments Session 2 Theoretical Framework Session 3 Algorithms and Languages Session 4 Test Generation 1 Session 5 Testability Session 6 Test Generation 2 Session 7 Industrial Applications Session 8 Distributed Testing and performance Session 9 and Test

Distributed Applications and Interoperable Systems II Lea Kutvonen, Hartmut König, Martti Tienari, 2013-03-09. Mastering interoperability in a computing environment consisting of different operating systems and hardware architectures is a key requirement which faces system engineers building distributed information systems. Distributed applications are a necessity in most central application sectors of the contemporary computerized society, for instance in office automation, banking, manufacturing, telecommunication and transportation. This book focuses on the techniques available or under development with the goal of easing the burden of constructing reliable and maintainable interoperable information systems. The topics covered in this book include: Management of distributed systems; Frameworks and construction tools; Open architectures and interoperability techniques; Experience with platforms like CORBA and RMI; Language interoperability, e.g. Java; Agents and mobility; Quality of service and fault tolerance; Workflow and object modelling issues; and Electronic commerce. The book contains the proceedings of the International Working Conference on Distributed Applications and Interoperable Systems II (DAIS 99) which was held June 28/July 1, 1999, in Helsinki, Finland. It was sponsored by the International Federation of Information Processing (IFIP). The conference program presents the state of the art in research concerning distributed and interoperable systems.
