## **Protocols For High Speed Networks V:**

**Protocols for High-Speed Networks V** Walid Dabbous, Christophe Diot, 2013-06-05 We are happy to welcome you to the IFIP Protocols for High Speed Networks 96 workshop hosted by INRIA Sophia Antipolis This is the fifth event in a series initiated in Zurich in 1989 followed by Palo Alto 1990 Stockholm 1993 and Vancouver 1994 This workshop provides an international forum for the exchange of information on protocols for high speed networks The workshop focus on problems related to the efficient transmission of multimedia application data using high speed networks and internetworks Protocol for High Speed Networks is a working conference That explains we have privileged high quality papers describing on going research and novel ideas The number of selected papers was kept low in order to leave room for discussion on each paper Together with the technical sessions working sessions were organized on hot topics We would like to thank all the authors for their interest We also thank the Program Committee members for the level of effort in the reviewing process and in the workshop technical program organization We finally thank INRIA and DRET for their financial support to the organization of the workshop

**Protocols for High-Speed Networks VI** Joseph D. Touch, James P.G. Sterbenz, 2013-03-14 1 This year marks the 10 h anniversary of the IFIP International Workshop on Protocols for High Speed Networks PfHSN It began in May 1989 on a hillside overlooking Lake Zurich in Switzerland and arrives now in Salem Massachusetts 6 000 kilometers away and 10 years later in its sixth incarnation but still with a waterfront view the Atlantic Ocean In between it has visited some picturesque views of other lakes and bays of the world Palo Alto 1990 San Francisco Bay Stockholm 1993 Baltic Sea Vancouver 1994 the Strait of Georgia and the Pacific Ocean and Sophia Antipolis I Nice 1996 the Mediterranean Sea PfHSN is a workshop providing an international forum for the exchange of information on high speed networks It is a relatively small workshop limited to 80 participants or less to encourage lively discussion and the active participation of all attendees A significant component of the workshop is interactive in nature with a long history of significant time reserved for discussions This was enhanced in 1996 by Christophe Diot and Walid Dabbous with the institution of Working Sessions chaired by an animator who is a distinguished researcher focusing on topical issues of the day These sessions are an audience participation event and are one of the things that makes PfHSN a true working conference

Protocols for High Speed Networks IV G. Neufeld, M. Ito, 2013-11-11 Welcome to the fourth IFIP workshop on protocols for high speed networks in Vancouver This workshop follows three very successful workshops held in Zurich 1989 Palo Alto 1990 and Stockholm 1993 respectively We received a large number of papers in response to our call for contributions This year forty papers were received of which sixteen were presented as full papers and four were presented as poster papers Although we received many excellent papers the program committee decided to keep the number of full presentations low in order to accommodate more discussion in keeping with the format of a workshop Many people have contributed to the success of this workshop including the members of the program committee who with the additional reviewers helped make the selection of the papers We are thankful to all

the authors of the papers that were submitted We also thank several organizations which have contributed financially to this workshop specially NSERC ASI CICSU UBC MPR Teltech and Newbridge Networks

**Protocols for High Speed Networks** Georg Carle,Martina Zitterbart,2003-08-01 This workshop on Protocols for High Speed Networks is the seventh in a successful series of international workshops well known for their small and focused target audience that provide a sound basis for intensive discussions of high quality and timely research work The location of the workshop has alternated between Europe and the United States at venues not only worth visiting for the workshop but also for the distinct impressions they leave on the participants The first workshop was held in 1989 in Zurich Subsequently the workshop was moved to Palo Alto 1990 Stockholm 1993 Vancouver 1994 Sophia Antipolis Nice 1996 and Salem 1999 In 2002 the workshop was hosted in Berlin the capital of Germany PfHSN is a workshop providing an international forum that focuses on issues related to high speed networking such as protocols implementation techniques router design network processors and the like Although the topics have shifted during the last couple of years for example from parallel protocol implementations to network processors it could be observed that high speed remains a very important issue with respect to future networking Traditionally PfHSN is a relatively focused and small workshop with an audience of about 60 participants

Protocols for High-Speed Networks V Walid Dabbous,Christophe Diot,2014-01-15 This book presents a state of the art view of transmission control for multimedia applications and new communication system architectures It focuses on the problems of achieving efficient transmission of multimedia time constrained application data using high speed networks and internetworks Key areas include protocol development quality of service issues protocol analysis high performance architectures implementation of high speed protocols experimental studies application oriented issues application controlled communication systems protocols for distributed multimedia applications protocol implementation tools

**Architecture and Protocols for High-Speed Networks** Otto Spaniol,André Danthine,Wolfgang Effelsberg,2013-06-29 Multimedia data streams will form a major part of the new generation of applications in high speed networks Continuous media streams however require transmission with guaranteed performance In addition many multimedia applications will require peer to multipeer communication Guaranteed performance can only be provided with resource reservation in the network and efficient multipeer communication must be based on multicast support in the lower layers of the network Architecture and Protocols for High Speed Networks focuses on techniques for building the networks that will meet the needs of these multimedia applications In particular two areas of current research interest in such communication systems are covered in depth These are the protocol related aspects such as switched networks ATM MAC layer network and transport layer and the services and applications Architecture and Protocols for High Speed Networks contains contributions from leading world experts giving the most up to date research available It is an essential reference for all professionals engineers and researchers working in the area of high speed networks

**High-Speed Networking** James P. G. Sterbenz,Joseph D. Touch,2002-02-28 Leading authorities deliver the

commandments for designing high speed networks There are no end of books touting the virtues of one or another high speed networking technology but until now there were none offering networking professionals a framework for choosing and integrating the best ones for their organization s networking needs Written by two world renowned experts in the field of high speed network design this book outlines a total strategy for designing high bandwidth low latency systems Using real world implementation examples to illustrate their points the authors cover all aspects of network design including network components network architectures topologies protocols application interactions and more     *Protocols for High-speed Networks V* Walid Dabbous,Christophe Diot,1997     Methodologies for High Speed Networks Raif O.
