decision From there the photographer can begin to use light to sculpt the subject's features minimizing problem areas or accentuating the subject's best features through the selection of light modifiers and the positioning of the lights themselves Moving to the technical side outdoor lighting presents particular challenges but also some significant advantages Outdoors photographers shoot at least partially with natural light While this is most of the day an abundant light source it is largely out of the control of the photographer The light can change from moment to moment as clouds pass between the earth and sun It also changes continually throughout the day as the sun moves across the sky Since he can't completely control the light the photographer must be prepared to adapt his subject's pose and position to create flattering results with the light as is Alternately the photographer can tweak the lighting by augmenting the sunlight with flash or reflectors or even softening it using scrim or other diffusers Of course this leaves another major concern the background Even if the light on the subject can be perfected rarely can the photographer also control the light on an area as large as the background making it a major concern in the process of posing and lighting So given all this why would any photographer choose to make portraits outside One advantage is that the lighting and scenes are free making outdoor photography a great starting point for those entering the field Even established studios however have found that clients simply like the natural timeless look of outdoor portraits This makes them strong sellers Additionally most portrait subjects are more at ease in natural light than when seated in front of bright noisy studio flash units and relaxed subjects translate into better expressions and better overall portraits In this book Smith takes you through the process of lighting outdoor portraits from start to finish covering both the artistic and technical aspects of achieving success Short one or two page lessons are amply illustrated to guide the reader through each phase In many cases before and after images or image sequences showing variations and alternative approaches are presented to facilitate learning Readers are encouraged to have this book with them during practice sessions and work on replicating or refining the provided examples creating a self study course in the art of lighting for outdoor portrait photography

Photographer author and educator Roberto Valenzuela has a proven track record for teaching and explaining difficult concepts to photographers of all skill levels His remarkable ability to break down complicated ideas into understandable approachable elements that photographers can truly grasp and then use their newfound knowledge to improve their photography made his first book Picture Perfect Practice a breakout success In Picture Perfect Posing Roberto takes on the art of posing For many photographers after learning to compose an image and even light it properly a portrait can still easily be a failure if the pose is not natural elegant and serving the needs of both the subject and the photographer Instead of just showing page after page of poses like most posing books on the market Roberto actually breaks down the concept of posing by examining the anatomy starting with the core foundation the spinal chord and neck Building from there Roberto discusses every component of what makes poses work as well as fail How should the model hold her hands Bend her elbows Position her fingers Should the model look toward or away from the camera and why It all depends on what the photographer wants for the shot and Roberto discusses the entire process from the intent of the photographer through the execution of the pose For those who have been discouraged by an inability to pose their subjects or who have simply not known where to start in order to figure it out Picture Perfect Posing is the essential resource they need to learn how posing truly works and how they can learn to direct the exact pose they need for the shot they want *Portraiture and Photography in Africa* John Peffer, Elisabeth L.
