

Proxy Means Tests for Targeting Social Programs

Introduction:

- The section addresses the challenge of targeting benefits to the poor, emphasizing the complexities and tradeoffs involved in achieving precise targeting.
- It mentions the difficulties in defining a target group and the technical and financial challenges of identifying individuals or households within that group.
- The concept of "proxy means tests" is introduced as a mechanism that utilizes household or individual characteristics as a substitute for a direct means test, aiming to overcome challenges associated with reported income.

Comparison of Targeting Mechanisms:

- A comparative study in Latin America suggests that among various targeting mechanisms, proxy means tests yield the best incidence outcomes, highlighting their effectiveness.
- Proxy means tests are preferred due to their ability to avoid the problems related to relying solely on reported income.

Empirical Exploration:

- The paper outlines its empirical exploration of proxy means tests through simulation experiments using household-level data from Jamaica, Bolivia, and Peru.
- The focus is on evaluating two programs in Chile and Costa Rica that employ proxy means tests as their targeting mechanism.

Means Tests - In Theory and Practice:

- Means tests, theoretically the best method for determining eligibility, face challenges in practice, such as applicants understating welfare levels and difficulties in verification, especially in developing countries.
- The limitations of income as a measure of welfare are highlighted, including its exclusion of certain factors like imputed value of housing and seasonal income variations.
- Rigorous means tests are primarily reserved for industrialized economies, while simple means tests are performed in developing countries, often with subjective evaluations.

Proxy Means Tests for Targeting Social Programs Margaret E. Grosh, Judy L. Baker, 1995-01-01 **Improving the targeting of fertilizer subsidy programs in Africa south of the Sahara: Perspectives from the Ghanaian experience** Houssou, Nazaire, Asante-Addo, Collins, Andam, Kwaw S., 2017-03-17 This paper assesses whether fertilizer subsidy programs can be better targeted to resource poor farmers using the case of Ghana and proxy means test approaches Past fertilizer subsidy programs in the country have not been particularly targeted to the poor even as targeting poor and smallholder farmers has become key in the program implementation guidelines As a result many poor farmers have not benefited from past programs Our results show that targeting approaches based on proxy means tests that use the correlates of poverty to select beneficiary farmers can potentially improve the poverty outreach and cost effectiveness of Ghana's fertilizer subsidy programs Therefore we propose that the proxy means test approach should be considered for implementing Ghana's fertilizer subsidy programs first in a pilot project involving a few communities and later if found successful in a full scale program

Poverty and Social Impact Analysis of Reforms Aline Coudouel, Anis A. Dani, Stefano Paternostro, 2006-01-01 Poverty and Social Impact Analysis PSIA is an approach used increasingly by governments civil society organizations the World Bank and other development partners to examine the distributional impacts of policy reforms on the well being of different stakeholders groups particularly the poor and vulnerable PSIA has an important role in the elaboration and implementation of poverty reduction strategies in developing countries because it promotes evidence based policy choices and fosters debate on policy reform options Poverty and Social Impact Analysis of Reforms presents a collection of case studies that illustrate the spectrum of sectors and policy reforms to which PSIA can be applied it also elaborates on the broad range of analytical tools and techniques that can be used for PSIA The case studies provide examples of the impact that PSIA can have on the design of policy reforms and draw operational lessons for PSIA implementation The case studies deal largely with policy reforms in a single sector such as agriculture crop marketing boards in Malawi and Tanzania and cotton privatization in Tajikistan energy mining sector in Romania and oil subsidies in Ghana utilities power sector reform in Ghana Rwanda and transition economies and water sector reform in Albania social sectors education reform in Mozambique and social welfare reform in Sri Lanka taxation reform Nicaragua as well as macroeconomic modeling Burkina Faso Geographical Targeting for Poverty Alleviation David Bigman, Hippolyte Fofack, 2000-01-01 in many developing countries there are large differences in economic conditions and the standard of living between regions and even between communities within the same region In many countries poverty has a clear geographic dimension since the poor are often concentrated in pockets of poverty Therefore the design of poverty alleviation policies must also have a significant spatial component Although development

projects are carefully designed and meticulously evaluated for cost effectiveness and benefits too many of them are not sufficiently targeted geographically The growing availability and use of spatial data organized in a computer system such as a geographical information system GIS makes it more feasible to analyze the impact of projects in specific locales and to achieve more effective targeting Geographical Targeting for Poverty Alleviation introduces the basic concepts of a GIS It also demonstrates how to organize geographic and nongeographic data In addition it presents different methods for using the data of the Household Income and Expenditure Survey together with other surveys and the population census to provide estimates for the standard of living and the incidence of poverty incidence in different geographical areas of a country Ultimately these estimates should be used to establish guidelines for targeting poverty alleviation projects This publication illustrates different GIS applications for identifying the project s target population determining the project s spatial sphere of influence or deciding where to locate public facilities This publication is of interest to task managers economists development researchers and geographers

Continuous Improvement Tinatin Baum, Anastasia Mshvidobadze, Josefine Posadas, 2016-08-25 Targeted Social Assistance of Georgia is a last resort social program that is considered a best practice among programs based on proxy means testing PMT It achieves high targeting accuracy for a relatively high level of poverty incidence In 2013 the government of Georgia embarked on the revision of this program to ensure its continued effectiveness and to revise some of the parameters of the eligibility formula that could be subject to manipulation In particular the government was concerned about the subjective evaluation of social agents and about concealable goods giving room to abuses in terms of program eligibility Continuous Improvement Strengthening Georgia s Targeted Social Assistance Program assesses the technical work and the policy actions taken by the Georgian government during 2014 and 2015 It covers the full cycle of the reform of a social assistance program from establishing the objectives to the design of compensation measures that minimize the number of newly ineligible beneficiaries In particular it describes the revision of the PMT formula the introduction of a scheme of benefits that decreases with the score and an associated assistance program for children the pretesting of the new formula and the design of compensation measures The report also includes a chapter with specific recommendations for Georgia to consider in its efforts to improve its system of social protection and labor

Les filets sociaux en Afrique Carlo Del Ninno, Bradford Mills, 2015-06-25 The need for safety nets in Sub Saharan Africa is vast In addition to being the world s poorest region Sub Saharan Africa is also one of the most unequal In this context redistribution must be seen as a legitimate way to fight poverty and ensure shared prosperity and all the more so in countries where growth is driven by extractive industries that are not labor intensive and often employ very few poor people Given that most African countries face difficult decisions about how to allocate limited resources among a number of social programs evidence is important Do Safety Net programs actually benefit the poorest people This book demonstrates with empirical evidence that it is possible to reach the poorest and most vulnerable people with safety net programs and provides lessons

for the effective use of targeting methods to achieve this outcome in the region *Measuring Health Equity in Small Areas: Findings from Demographic Surveillance Systems* INDEPTH Network, 2018-01-08 Over the past decade several initiatives have been launched to address the major health problems affecting the world's poorest countries including global efforts to combat HIV/AIDS/TB and malaria. More recently a millennial challenge has been laid down to root out and confront the links between poverty and health. Using demographic surveillance systems the INDEPTH researchers aim to contribute both to the empirical knowledge about health equity in developing countries and to report on the application of and innovation in tools and methods. Illustrated with case studies from Africa and Asia this book puts forward a comprehensive view of the INDEPTH methodologies and findings. It develops and measures concepts and constructs of poverty and equity and relates these to health status. While tools and concepts for measuring health status are more developed this volume contributes by grappling with new concepts and tools to measure changes in deprivation and disadvantage adding to this intense theoretical and methodological debate. Model Living Standards Measurement Study Survey Questionnaire for the Countries of the Former Soviet Union Raylynn Oliver, 1997-01-01 Living Standards Measurement Survey Working Paper No 130 This document presents a set of Living Standards Measurement Study (LSMS) questionnaires that have been developed for use in the Russian speaking countries of the former Soviet Union. The questionnaires are available in English and Russian as well as in an electronic format. The document describes in detail how to modify the questionnaires for use in any specific country. The author guides the questionnaire writer through the modification process illustrating the important aspects of LSMS surveys: the translation and field testing procedures and a section by section description of the types of modification that are likely to be required to suit particular goals and circumstances. Development and Deprivation in the Indian Sub-continent Utpal De, Manoranjan Pal, 2019-06-14 The volume covers issues related to poverty, inequality, inclusiveness, development, role of institutions and socio-political perspectives on development in India with a special focus on North East India. Please note: Taylor Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka. **Are You Being Served?** Samia Amin, Jishnu Das, Markus Goldstein, 2007-12-28 This publication presents tools and techniques for measuring service delivery in health and education and people's experiences from the field in deploying these methods. It begins by providing an introduction to the different methodological tools available for evaluating the performance of the health and education sectors. Country-specific experiences are then explored to highlight lessons on the challenges, advantages and disadvantages of using different techniques to measure quality in a variety of different contexts and of using the resulting data to affect change. This book is a valuable resource for those who seek to enhance capacity for the effective measurement of service delivery in order to improve accountability and governance and enhance the quality of service delivery in developing countries.
