Hamelman,Dennis Martin,1985-04-01 German Assault Troops of the First World War Stephen Bull,2014-09-01 To many it
would later seem as if the rule book of war had been torn up and thrown away The First World War is usually characterised
as a static war of attrition but by the end of the war a new doctrine of fire and movement emerged with the squad as the key
tactical unit marking a fundamental shift in methods of warfare in the twentieth century As late as March 1918 assault
detachments used these tactics to destroy the British 5th Army and take 50 000 prisoners Stephen Bull traces the
development of German storm tactics in the context of trench warfare waged with new technology improved machine guns
and machine gun tactics super heavy artillery flamethrowers and gas The legend of German stormtroopers has proved
powerful and enduring They were central to Blitzkrieg and Hitler styled them as elite soldiers living examples of Nietzschean
supermen However as Bull demonstrates these tactics did not appear out of nowhere they represented a general shift in
tactical thought during the First World War Drawing upon German French and British tactical manuals German Assault

Worldwide Army Medals of World War I - A Personal Collection, 2018-03-07 I started the medal collection for A Selection of Global War Crosses and Medals for Bravery Merit and Service for World War 1 in August 2017 when I purchased my first war cross the 3rd French Republic Croix de Guerre It took me a further five months to complete the collection as seen I had just completed a twenty or so years family history project researching although not all that time spent researching my paternal Great Uncles three of which had sadly been killed in action during WW1 I was in the process

of having their medals and uniform items framed when I started to research their war medals and this collection just led on from there. The collection is not complete but provides a very good representation many original some very rare with a few Reproductions due to cost and or scarcity of many of the army military bravery and merit awards that covers every location world country that participated in WW1. I also decided where appropriate to include a few campaign medals and a few naval medals. I researched the information for each award as I was unable to find a book or an individual article that provided all the information in one document. The collection continues to grow and I intend to include a selection of WW1 Campaign and Army Regimental Medals in the 2nd Edition. It is my wish that it will provide a global perspective of the enormity of the reach of WW1 many of the awards mentioned being issued posthumously IN MEMORY OF MY 3 GREAT UNCLES William James and George Smallshaw. Royal Prussian Jagdgeschwader Nr III was the third of Germany's vaunted fighter wings to be formed during World War 1. Commanded by the Pour le Mérite winner and well respected ace Hauptmann Bruno Loerzer for its entire existence it was composed of the celebrated Jasta Boelcke along with Jagdstaffeln 26, 27 and 36. Equipped largely with the new Fokker triplane these four units would play an important role in the Kaiserschlacht as part of the 17 Armee. As Germany's fortunes waned in the summer of 1918 the aces of JG III nonetheless did their best to stem the tides of British, French and later American aircraft they encountered. Aces such as Carl Bolle, Paul Bumer, Heinrich Bongartz, Hermann Frommherz, Rudolf Klimke and the infamous Hermann Göring all carved their names in the record books flying in this formidable formation. This book examines the tactics, achievements and personalities of one of the deadliest of Germany's aerial units. **The Scholar and the State: In Search of Van der Waerden** Alexander Soifer, 2014-11-12. Bartel Leendert van der Waerden made major contributions to algebraic geometry, abstract algebra, quantum mechanics and other fields. He liberally published on the history of mathematics. His 2 volume work *Modern Algebra* is one of the most influential and popular mathematical books ever written. It is therefore surprising that no monograph has been dedicated to his life and work. Van der Waerden's record is complex. In attempting to understand his life the author assembled thousands of documents from numerous archives in Germany, the Netherlands, Switzerland and the United States which revealed fascinating and often surprising new information about van der Waerden. Soifer traces Van der Waerden's early years in a family of great Dutch public servants, his life as professor in Leipzig during the entire Nazi period and his personal and professional friendship with one of the great physicists, Werner Heisenberg. We encounter heroes and villains and a much more numerous group in between these two extremes. One of them is the subject of this book. Soifer's journey through a long

list of archives combined with an intensive correspondence had uncovered numerous details of Van der Waerden's German intermezzo that raised serious questions and reproaches Dirk van Dalen Philosophy Utrecht University Professor Soifer's book implicates the anthropologists and culture historians' core interest in the evolution of culture and in the progress of human evolution itself on this small contested planet James W Fernandez Anthropology University of Chicago The book is fascinating Professor Soifer has done a great service to the discipline of history as well as deepening our understanding of the 20th century Peter D Johnson Jr Mathematics Auburn University This book is an important contribution to the history of the twentieth century and reads like a novel with an ever fascinating cast of characters Harold W Kuhn Mathematics Princeton University This is a most impressive and important book It is written in an engaging very personal style and challenges the reader's ability of moral and historical judgment While it is not always written in the style of objective professional historiography it satisfies very high standards of scholarly documentation Indeed the book contains a wealth of source material that allows the reader to form a highly detailed picture of the events and personalities discussed in the book As an exemplar of historical writing in a broader sense it can compete with any other historical book Moritz Epple History of Mathematics Frankfurt University
