Finson,Barbara S. Spector,2015-08-01 Who were the pioneers in science education and what motivated them to do what they
did This book is the second volume of an attempt to capture and record some of the answers to these questions either from
the pioneers themselves or from those persons who worked most closely with them As with the first volume we have
attempted to include as many pioneers as possible but we know that there are still many that are not included in this or the
previous volume As we have posed questions rummaged through files and oft neglected books and probed the memories of
many individuals we have come to realize our list of true pioneers is ever growing As we consider our list of pioneers we
know that there are names on the list that most of us readily recognize We also fully realize that there are names of whom
few of us have heard yet who were significant in their roles as mentors or idea development and teaching We continue to be
impressed with our science education family tree ever branching out to more individuals and connections The stories in this
volume continue to demonstrate how vital this network was in supporting the individual pioneers during their journey in
difficult times and continues to be for those of us today in our own enterprise The Realisms of Berenice Abbott Terri
Weissman,2011-01-10 The Realisms of Berenice Abbott provides the first in depth consideration of the work of photographer
Berenice Abbott Though best known for her 1930s documentary images of New York City this book examines a broad range
of Abbott s work including portraits from the 1920s little known and uncompleted projects from the 1930s and experimental
science photography from the 1950s It argues that Abbott consistently relied on realism as the theoretical armature for her
work even as her understanding of that term changed over time and in relation to specific historical circumstances But as
Weissman demonstrates Abbott s unflinching commitment to realist aesthetics led her to develop a critical theory of
documentary that recognizes the complexity of representation without excluding or obscuring a connection between art and
engagement in the political public sphere In telling Abbott s story The Realisms of Berenice Abbott reveals insights into the
politics and social context of documentary production and presents a thoughtful analysis of why documentary remains a
compelling artistic strategy today How Knowledge Moves John Krige,2019-01-25 Knowledge matters and states have a

stake in managing its movement to protect a variety of local and national interests The view that knowledge circulates by itself in a flat world unimpeded by national boundaries is a myth The transnational movement of knowledge is a social accomplishment requiring negotiation accommodation and adaptation to the specificities of local contexts This volume of essays by historians of science and technology breaks the national framework in which histories are often written Instead How Knowledge Moves takes knowledge as its central object with the goal of unraveling the relationships among people ideas and things that arise when they cross national borders This specialized knowledge is located at multiple sites and moves across borders via a dazzling array of channels embedded in heads and hands in artifacts and in texts In the United States it shapes policies for visas export controls and nuclear weapons proliferation in Algeria it enhances the production of oranges by colonial settlers in Vietnam it facilitates the exploitation of a river delta In India it transforms modes of agricultural production It implants American values in Latin America By concentrating on the conditions that allow for knowledge movement these essays explore travel and exchange in face to face encounters and show how border crossings mobilize extensive bureaucratic technologies
