The Tibetan Book of the Dead W. Y. Evans-Wentz, 2000-09-28 The Tibetan Book of the Dead is one of the texts that according to legend Padma Sambhava was compelled to hide during his visit to Tibet in the late 8th century The guru hid his books in stones lakes and pillars because the Tibetans of that day and age were somehow unprepared for their teachings Now in the form of the ever popular Tibetan Book of the Dead these teachings are constantly being discovered and rediscovered by Western readers of many different backgrounds a phenomenon which began in 1927 with Oxford's first edition of Dr Evans Wentz's landmark volume While it is traditionally used as a mortuary text to be read or recited in the presence of a dead or dying person this book which relates the whole experience of death and rebirth in three intermediate states of being was originally understood as a guide not only for the dead but also for the living As a contribution to the science of death and dying not to mention the belief in life after death or the belief in rebirth The Tibetan Book of the Dead is unique among the sacred texts of the world for its socio cultural influence in this regard is without comparison This fourth edition features a new foreword afterword and suggested further reading list by Donald S Lopez author of Prisoners of Shangri La Tibetan Buddhism and the West Lopez traces the whole history of the late Evans Wentz's three earlier editions of this book fully considering the work of contributors to previous editions C G Jung among them the sections that were added by Evans Wentz along the way the questions surrounding the book's translation and finally the volume's profound importance in engendering both popular and academic interest in the religion and culture of Tibet Another key theme that Lopez addresses is the changing nature of this book's audience from the prewar theosophists to the beat poets to the hippies to contemporary exponents of the hospice movement and what these audiences have found or sought in its very old pages

[What Is it Like to Be Dead?](#) Jens Schlieter, 2018-08-06 Studies of near death experiences show that such experiences not only provide a new certainty of post mortem survival but often function as a call for fundamental change in the present Reported aftereffects encompass changes in attitudes beliefs and life orientation It is said that experiencers have lost their fear of death found their purpose in life or

become more spiritual The experience often declared to be indescribable inexplicable or ineffable is held by many to be the most important of their lives and moreover the best proof available for matters transcendent In What Is It Like To Be Dead Jens Schlieter argues that to understand recent testimonies of near death experiences we need to be aware of the history of innumerable reports of earlier near death experiences that were communicated and handed down in scores of newspapers journals and books Collections of such testimonies have been published for more than 150 years accompanied by attempts to classify and interpret them Schlieter analyzes the religious relevance of near death experiences for the experiencers themselves but also for the growing audience attracted by these testimonies Near death experiences bear ontological epistemic intersubjective and moral significance ranging from reassurance that religious experience is still possible to claims that they initiate a new spiritual orientation in life or offer evidence for the transcultural validity of afterlife beliefs This study is the first to document and analyze four centuries of near death testimonies before the codification of the genre in the 1970s offering the first full account of the modern genealogy of near death experiences

Tryptamine Palace James Oroc, 2009-05-21 A journey from Burning Man to the Akashic Field that suggest how 5 MeO DMT triggers the human capacity for higher knowledge through direct contact with the zero point field Examines Bufo alvarius toad venom which contains the potent natural psychedelic 5 MeO DMT and explores its entheogenic use Proposes a new connection between the findings of modern physics and the knowledge held by shamans and religious sages for millennia The venom from Bufo alvarius an unusual toad found in the Sonoran desert contains 5 MeO DMT a potent natural chemical similar in effect to the more common entheogen DMT The venom can be dried into a powder which some researchers speculate was used ceremonially by Amerindian shamans When smoked it prompts an instantaneous break with the physical world that causes out of body experiences completely removed from the conventional dimensions of reality In Tryptamine Palace James Oroc shares his personal experiences with 5 MeODMT which led to a complete transformation of his understanding of himself and of the very fabric of reality Driven to comprehend the transformational properties of this substance Oroc combined extensive studies of physics and philosophy with the epiphanies he gained from his time at Burning Man He discovered that ingesting tryptamines unlocked a fundamental human capacity for higher knowledge through direct contact with the zero point field of modern physics known to the ancients as the Akashic Field In the quantum world of nonlocal interactions the line between the physical and the mental dissolves 5 MeO DMT Oroc argues can act as a means to awaken the remarkable capacities of the human soul as well as restore experiential mystical spirituality to Western civilization

Acute Religious Experiences Richard Saville-Smith, 2023-02-09 This book engages the problem of how in the 21st century we are to speak about experiences of the extraordinary anomalous extreme which occur on a transhistorical and transcultural basis Critical re readings of seminal texts show how 20th century theoreticians in the humanities sought to erase madness from their irrational subjects This propensity to sanitize madness in the study of religions was mirrored by the instinct of psychiatrists to degrade religious experiences by reducing mad consciousness to psychosis or dissociation Richard Saville Smith introduces explanatory pluralism as a way of recognizing these disciplinary biases and mad studies as a way of negotiating this understanding The disproportionate significance of madness in shaping the fabric of the human story can then be recovered from both erasure and dismissal to be given the recognition previously denied as acute religious experiences

Acute Religious Experiences divides into three sections beginning with re readings of William James's pathological programme Rudolf Otto's numinous T K Oesterreich's possession Mircea Eliade's shamanism Walter Stace's mysticism Walter Pahnke's psychedelic experience and Abraham Maslow's peak experiences These ideas are shown to constitute the beginnings of a fractured discourse on the irrational In part two contemporary psychiatry's Diagnostic and Statistical Manual DSM and Foucault's History of Madness are re read to reposition madness as not necessarily pathological This opens the way for the identification of acute religious experiences as a new holistic and post colonial approach through which religious data can be organized and addressed on a comparative basis In part three The Gospel of Mark is re read as a case study to demonstrate the novel insights which flow from the identification of acute religious experiences Richard Saville Smith draws on his own experiences of madness and his PhD from the School of Divinity at The University of Edinburgh to elucidate his research
