Concern	Nursing Diagnosis (NANDA Diagnostic Statement) <i>Analysis of Cause</i>	Nursing Interventions (Strategies/Actions) <i>Take Action</i>	Rationale for Intervention (Include Source and Page Number)
1.) Safety of patient and others (visitors, staff, other patients)	1.) Risk for Violence Towards Self or Others related to post-partum depression.	1.) Decrease environmental stimuli by having a quiet place for the patient to go when they experience distress and be ready to intervene at first sign of agitation. 2.) Provide frequent rest and solitary activities when necessary. Search rooms for unsafe objects and monitor the patient for unsafe thoughts and behaviors.	1.) Helps decrease symptoms of anxiety and mania. Allows the patient time to think before acting and to learn to calm themselves at home. Intervening prevents the patient from getting too excited and harming or escalating others. 2.) Allows the client the time that they need to decompress to decrease anxiety and agitation. Searching for unsafe objects and behaviors allows the nurse to prevent and be more prepared for potentially unsafe situations. Citation: Martin, P. B. (2019, April 11). <i>6 Bipolar Disorders Nursing Care Plans</i> . Nurseslabs. https://nurseslabs.com/bipolar-disorders-nursing-care-plans/2/
2.) Patient Hygiene and self-care	2.) Risk for self care deficit related to chronic depression and bipolar disorder.	1.) Monitor intake and output. Encourage the patient to eat and drink as appropriate. Encourage healthy lifestyle as much as possible. Monitor weight. 2.) Encourage Hygiene routines and encourage the patient to stay out of bed during the day. Provide positive reinforcement when the patient initiates these things on their own.	1.) As the Nurse it is important to ensure that the patient is getting the right nutrition. Often when people are dealing with mental health issues they forget to eat and drink and take care of themselves. Monitoring this will help to identify any issues. 2.) Being cleaned and well groomed can help with mood and self esteem. Helping the patient to find a morning routine is something that they can do themselves at home that will help them feel better.
