Apesoa-Varano, Charles S. Varano, 2021-04-30 Anyone who has spent time in a hospital as a patient or family member of a patient hopes that those who attend to us or our loved ones are at their professional best and that they care for us in ways that console us and preserve our dignity This book takes an intimate look at how health care practitioners struggle to live up to their professional and caring ideals through or during twelve hour shifts on the hospital floor From 3 200 hours of participant observation and 500 hours of follow up interviews with twenty one doctors thirty registered nurses twenty one respiratory therapists twenty medical social workers and eighteen occupational physical and speech therapists the authors create a complex picture of the workplace conflicts that different types of health care practitioners face Though all these groups espouse caring ideals professional interests and a curative orientation dominate in patient care and interoccupational relations Because emotive caring is not supported by the organization of health care in the hospital it becomes an individual virtue that overworked staff find hard to perform and it takes on an ideological form that obscures the status hierarchy among practitioners Conflicts between practitioners rest upon the ranking of each group s knowledge base They manifest in efforts to work as a team or set limits on practitioner responsibilities and in differing views on unionization [A History of Self-Harm in Britain](#) Chris Millard, 2015-07-31 This book is open access under a CC BY license and charts the rise and fall of various self harming behaviours in twentieth century Britain It puts self cutting and overdosing into historical perspective linking them to the huge changes that occur in mental and physical healthcare social work and wider politics

Insuring Inequality Jerry R. Cates, 2025-10-01 The establishment of the Social Security Board in 1935 confronted administrators and policy makers with basic value decisions Should the system serve to raise the incomes of America s neediest citizens Or did that aim smack too much of the ideology of redistribution of wealth Would it rob workers of incentives to provide for their own futures and reward idleness The conflict of values was played out on a political stage marked by infighting deception and short sighted compromise The result is the social security system we know today one that benefits those who need it least and one that is in a perpetual state of financial difficulty *Insuring Inequality* is a penetrating analysis and indictment of that bureaucracy which felt the welfare of America s aged was an acceptable price to pay for the preservation of an ideologically correct social insurance system a system that would not seriously challenge income inequality in America Previously unresearched documents not only reveal that social insurance discriminates against the poor and this was a foreseen intended consequence but they also reveal that the leaders predicted a financially troubled system and did little to prevent it

Time for Dying Graham McAleer,2017-09-29 This book has been written for those who must work with and give care to the dying Our discussion is not simple narrative or description it is a rendition of reality informed by a rather densely woven and fairly abstract theoretical scheme This scheme evolved gradually during the course of our research The second audience for this

volume is social scientists who are less interested in dying than they are in useful substantive theory Our central concern is with the temporal aspects of work The theory presented here may be useful to social scientists interested in areas far removed from health medicine or hospitals The training of physicians and nurses equips them for the technical aspects of dealing with illness Medical students learn not to kill patients through error and to save lives through diagnosis and treatment But their teachers put little or no emphasis on how to talk with dying patients how or whether to disclose an impending death or even how to approach the subject with the wives husbands children and parents of the dying Students of nursing are taught how to give nursing care to terminal patients as well as how to give post mortem care But the psychological aspects of dealing with the dying and their families are virtually absent from training Although physicians and nurses are highly skilled at handling the bodies of terminal patients their behavior to them otherwise is actually outside the province of professional standards Much if not most nontechnical conduct toward and in the presence of dying patients and their families is profoundly influenced by common sense assumptions essentially untouched by professional or even rational considerations or by current advancement in social psychological knowledge The process of dying in hospitals is much affected by professional training and codes and by the particular conditions of work generated by hospitals as places of work A third important consideration in int
