## *A view from the Chair*

### *Highs and lows of 2005*

*Professor Gregory O'Brien*

*Professor Gregory O'Brien*

The turn of 2005/2006 has been an interesting time in the national media. All authorities – including the Queen – have been commenting upon the extent to which 2005 was a year of highs and lows; national and international disasters alternating with good news such as major positive

breakthroughs in international initiatives. Writing at the beginning of January 2006, and still in a New Year sort of mood, it is worth considering the highs and lows the last year has brought to us in the faculty and our wider work.

One of the most striking initiatives, and one which I am sure is going to have very far-reaching consequences, is the extent to which the Healthcare Commission has turned its attention towards learning disability. I think there are real possibilities here, for the more the Commission considers our services and the situation of our service users, the more opportunity there is for investment at a time when there are significant concerns that there has been disinvestment in some parts of the country. There are already signs that the Commission is highlighting some problem areas in our services. None the less, some see the Commission's close scrutiny of our services as threatening and I understand why. I am sure most would agree, however, that the Healthcare Commission turning its attention towards learning disability is definitely more of a high than a low.

The Commission, of course, does not hold sway throughout the British Isles. Looking north of the border as an expatriot Scot, I have seen highs and lows in the news concerning the imple-

mentation of new legislation in Scotland over the past year. In England we have been particularly impressed by the spirit of the wording of the new legislation, seeing this is as a high ideal at which to aim. There have also been some 'lows' in the implementation, though, and I do know that there are real challenges here. Certainly, there are lessons to be learned for the rest of the UK as we work on our new legislation.

Many initiatives of the faculty over the past year have definitely been highs:

- We have been making good progress in working in partnership with the British Psychological Society, including a joint report on challenging behaviour – and here Roger Banks' energetic contributions have been pivotal.
- National concern regarding 'out of area' treatments remains high profile – consequently the paper that has just been prepared by John Morgan and his group is going to be of great interest to the faculty and beyond.

## **Psychiatry In Learning Disability:**

**The Psychiatry of Intellectual Disability** Ashok Roy, Meera Roy, David Clarke, 2016-07-12 Comprehensive concise and easily accessible this is the first health economics dictionary of its kind and is an essential reference tool for everyone involved or interested in healthcare The modern terminology of health economics and relevant terms used by economists working in the fields of epidemiology public health decision management and policy studies are all clearly explained Combined with hundreds of key terms the skilful use of examples figures tables and a simple cross referencing system between definitions allows the often complex language of health economics to be demystified Learning Disabilities Laurence L. Greenhill, 2008-11-01 There is an increased awareness that learning disorders affect many areas of both child and adult functioning It is of utmost importance therefore that professionals have the most up to date Learning Disabilities Implications for Psychiatric Treatment information on how learning disabilities are being identified the effectiveness of current treatments and their long term outlook Although more people have been identified as having a learning disabilities in the past 20 years there is no agreement as to how widespread the disorders actually are This is due to the fact that there is still no agreed on definition of learning disabilities or objective criteria with which to identify them The contributors to Learning Disabilities Implications for Psychiatric Treatment all experts in the field go a long way toward mapping out the current terrain The authors highlight the shortcomings of certain definitions of learning disability they illuminate the connections between disorders they point out the suspected biological underpinnings and they direct our attention to some of the most significant studies on the long term consequences of these disabilities With all of the chapters extensively referenced this book serves as an important resource for those interested in exploring in greater depth this critical subject The contributors present clear and irrefutable evidence as to the role learning disabilities play in the lives of people who have been diagnosed with them Over and over again we are shown the importance of early identification and intervention in preventing long term failure and demoralization that can be associated with these disorders Edited by Laurence L Greenhill M D a distinguished authority in the field Learning Disabilities Implications for Psychiatric Treatment will prove useful to professionals of many backgrounds and provides practical guidance to psychiatrists psychologists students and residents and to individuals and families whose lives have been touched by the presence of these disabilities **Seminars in the Psychiatry of Learning Disabilities** William Fraser, William Irvine Fraser, Michael Kerr, 2003-08 An informative and accessible text providing a comprehensive overview of the field This second edition contains several new chapters including accounts of psychological treatment of behavioural problems causes of learning disability physical health needs and the organisation of comprehensive health care **Intellectual Disability Psychiatry** Angela Hassiotis, Diana Andrea Barron, Ian Hall, 2013-03-13 Intellectual Disability Psychiatry is a comprehensive and accessible guide to the management of mental health problems in people with intellectual disabilities A clear and user friendly handbook it will help busy healthcare

professionals develop their understanding of the mental health problems of service users with intellectual disabilities. Most importantly, it will help them make an accurate diagnostic assessment and develop and implement an holistic person-centred evidence-based management plan. Topics covered include the classification of mental disorders in intellectual disability, the clinical assessment of specific disorders, psychological, psychopharmacological, and social interventions, and the practical, legal, and social aspects of supporting service users with intellectual disability who have mental health problems. **Developing**

**Mental Health Services for Children and Adolescents with Learning Disabilities** Sarah Bernard, Jeremy Turk, 2009-03. A practical and concise guide aimed to help CMHS staff feel more confident in assessing and managing the needs of children with a learning disability who have mental health problems. *Textbook of Psychiatry for Intellectual Disability and Autism Spectrum Disorder* Marco O. Bertelli, Shoumitro (Shoumi) Deb, Kerim Munir, Angela Hassiotis, Luis

Salvador-Carulla, 2022-05-11. This textbook provides a state-of-the-art of the knowledge on the prevalence, risk, and etiological factors, clinical features, assessment procedures, and tools, diagnostic criteria, treatment, and prognosis of the psychiatric disorders encountered in people with intellectual disability (ID) and low-functioning autism spectrum disorder (ASD). ID and ASD represent two meta-syndromic groups of several different conditions, each with particular cognitive and communication features. People with ID/ASD display an increased prevalence of a variety of psychiatric disorders, including psychotic disorders, mood disorders, anxiety and stress-related disorders, somatoform disorders, and obsessive-compulsive disorder, as well as behavioral syndromes, personality disorders, and disorders due to psychoactive substance use. This book will enable readers to understand the specificities of psychiatric disorders in the context of ID/ASD. It explains clearly how diagnostic criteria and assessment procedures for psychiatric disorders that were created for the general population have to be modified for use with ID/ASD. Above all, it will enable clinicians to overcome difficulties in diagnosis and to deliver more effective care that meets the particular needs of patients with ID/ASD. *The Psychiatry of Intellectual Disability* Dr. David Clarke, 2006. Comprehensive, concise, and easily accessible, this is the first health economics dictionary of its kind and is an essential reference tool for everyone involved or interested in healthcare. The modern terminology of health economics and relevant terms used by economists working in the fields of epidemiology, public health, decision management, and policy studies are all clearly explained. Combined with hundreds of key terms, the skilful use of examples, figures, tables, and a simple cross-referencing system between definitions allows the often complex language of health economics to be demystified.
