There are however significant variations in the patterns of suicide across cultures gender age geographic locations and personal history due to the complex relationship of how these factors converge. One thing that remains consistent is that every death is a tragedy for family friends and all colleagues. Traditions of suicidal behaviour are deeply rooted in any given culture and so examining the cultural influences can be of paramount importance in the understanding and assessment of a suicidal crisis. Suicide Across Cultures offers the opportunity to expand knowledge beyond majority groups and to look further than the dominant paradigm in suicide research treatment and prevention. With the majority of global suicides taking place in non Western societies minority groups are an essential area in suicide research. Written by experts from around the world this fascinating textbook includes topics and regions that are not usually covered in texts on suicide and self harm. It provides a unique and important insight for academics and students in psychiatry as well as anyone from the wider public with an interest in the psychiatry of suicide across cultures.
