**My Incredible Paranormal, Spiritual, and Out of the Box Experiences** Martin K. Ettington, Many of my friends who know me well and know some of my experiences insist I should write an autobiography because many people will find my stories fascinating My life has been about my spiritual and paranormal explorations of the world and studies of our universe These views are discussed in over one hundred books which is detailed near the end of this autobiography These stories include a spirit attacking me many prophecies of mine some of which saved my life Also a fight with a bear in the wilderness and many other strange experiences which includes a spiritual enlightenment event and specific memories from before my birth during and just after it My education as an engineer at a top school has also led me to an analytical point of view about the world but I've also remained open to new and impossible experiences without denying that they really happened This has led me to a pretty unique point of view as a writer about many out of the box subjects which some professionals condemn as illusionary but many individuals really experience The experiences of my life in this book should also give you a good idea of the circumstances which created the person I am today and why I write the books that I do I've grouped my major life experiences mostly sequentially but some things which took place over longer periods of time are grouped together So there is some overlap in different chapters of my life But you can see how all these topics blend together

**Star Pyramid** Ian Stewart, 2025-07-11 The pyramids of ancient Egypt were colossal machines intended to carry powerful rulers to the stars The modern one was the same In the mid 2100s Earth is in decline Colonies and mining around distant stars are needed to deal with resource shortages and population growth But those require faster than light travel A Nobel winning physicist and a maverick mathematician have argued that FTL travel is a theoretical possibility but only by using the mysterious superheavy element 126 mahabhavium It is being created atom by atom in vast accelerators but not in useful quantities Everything changes when mahabhavium is discovered spectroscopically in gas clouds surrounding a neutron star 400 light years away The Star Pyramid project is born A pyramid shaped starship travelling just below the speed of light Star Pyramid can reach the gas clouds in around 400 years 98 years from the perspective of the crew who will spend most of the trip in suspended animation anyway It will harvest mahabhavium and use a small fraction to return to Earth immediately A massive concerted global effort provides the resources needed for Star Pyramid to launch in 2169 but not without critics on Earth and potential saboteurs on board What could possibly go wrong Another thought provoking science fiction tour de force from Ian Stewart
