Decades of conflict and war have forced millions of men, women, and children to flee from their homes and seek refuge in other parts of the country or in foreign lands. Afghanistan is one such country. This book is a study of the displaced Afghan migrant population in India, in particular the persecuted Sikhs and Hindus who are religious minorities in Afghanistan and make up a majority of Afghan migrants in India. It explores the relationship between acculturation and identity development. By focusing on the interactions between the Afghan immigrant population and the Indian society, the author analyses how the community negotiates identity and marginality in a country that does not recognize them as refugees. The author explains how the Afghan migrant population manages and negotiates various identities bestowed upon them by the societies in their home and host countries in their day-to-day existence in India. An important study of acculturation and adaptation issues of migrant groups in the setting of a developing country, this book will be of interest to academics in the field of refugee and migration studies, ethnography of ethnic identity, and Middle East and South Asian Studies. Refugee Management Sumita Das, 2005-01-01. Tribals and Their Culture Das Kornel, 2006. Study on Koya tribe of Malkangiri District in Orissa State, India. **Globalization and the National Security State** Norrin M. Ripsman, T.V. Paul, 2010-03-18. In the past two decades, many have posited a correlation between the spread of globalization and the decline of the nation state. Moreover, such scholars have maintained that the increasing interdependence between countries means that nations are no longer the sole providers of their territorial security. They point to the increasing role of transnational institutions, NGOs, and regional security agreements in national defense. In *Globalization and the National Security State*, T.V. Paul and Norrin Ripsman argue that this thesis has not been borne out by events. Despite the effects of globalization, weak and powerful states have continued to pursue traditional nation state security strategies. South Asian Security Sagarika Dutt, Alok Bansal, 2013-06-17. The South Asian security complex refers to security interdependencies between the states in the region and also includes the effect that powerful external actors such as China, the US, and Russia, and geopolitical interests have on regional dynamics. This book focuses on the national securities of a number of South Asian countries in order to discuss a range of issues related to South Asian security. The book makes a distinction between traditional and non-traditional security. While state-centric approaches such as bilateral relations between India and Pakistan are considered to be traditional realist approaches to security, the promotion of economic, environmental, and human security reflect global concerns, liberal theories, and cosmopolitan values. The book goes beyond traditional security issues to reflect the changing security agenda in South Asia in the twenty-first century and is a useful contribution to studies on South Asian Politics and Security Studies.

*Building a People-Oriented Security Community the ASEAN way* Alan Collins, 2013-05-07 ASEAN has declared its intention to create a security community in Southeast Asia that is people orientated This book evaluates ASEAN's progress and in doing so examines three matters of concern The book firstly looks at the importance of constitutive norms to the workings of security communities by identifying ASEAN's constitutive norms and the extent to which they act as a help or hindrance in establishing a security community It then moves on to how ASEAN has interpreted people orientated as empowering civil society organisations to be community stakeholders The book discusses the uncertainty between how ASEAN envisages their role and the role they themselves expect to have Civil society actors are seeking to influence what sort of community evolves and their ability to interact with the state elite is evaluated to determine what interpretation of people oriented is likely to emerge Thirdly in order to make progress ASEAN has sought to achieve cooperation among its member states in functional areas The book examines this interest in functional cooperation through case studies on human rights HIV AIDS and disaster management By discussing the notion of ASEAN being people orientated and how it engages with the people the book provides important insights into what type of community ASEAN is building as well as furthering our understanding on security communities more broadly
