Rudolf Kronprinz Und Rebell:

Kaiser Wilhelm II New Interpretations John C. G. Röhl, Nicolaus Sombart, 2005-09-15 As assessment of the Kaiser's character and its implications on Imperial German history

The Last Hope of the Habsburgs: Crown Prince Rudolf's Journey Ferdinand von Arx, 2025-03-17 Crown Prince Rudolf of Habsburg was destined to rule one of Europe's most powerful empires. As the only son of Emperor Franz Joseph I and Empress Elisabeth, he was the great hope of a dynasty struggling to maintain its influence in a rapidly changing world. A brilliant mind and a progressive thinker, Rudolf sought to modernize the Austro-Hungarian Empire, embracing liberal ideals that often put him at odds with the rigid traditions of the imperial court. Yet behind the grandeur of royal life, Rudolf wrestled with deep personal conflicts. Trapped between duty and his own convictions, isolated from both his father's authority and his mother's affections, he found solace in intellectual pursuits, political discourse, and forbidden love. His tragic fate at Mayerling remains one of history's great mysteries: was it despair, conspiracy, or something even darker?

In *The Last Hope of the Habsburgs*, Ferdinand von Arx paints a vivid portrait of a prince who dared to challenge his destiny. This compelling biography offers fresh insights into Rudolf's struggles, ambitions, and the turbulent forces that shaped his life and his tragic end. An enthralling story of power, idealism, and the weight of a fading empire.

Carl Menger's Lectures to Crown Prince Rudolf of Austria Carl Menger, Rudolf (Crown Prince of Austria), 1994-01-01 This book will be of interest on a number of different levels. Most simply, it is a fascinating historical record of a pedagogical experience. The Notebooks present the historian of economic thought and those interested in the Austrian school in particular with a number of intriguing, even frustrating puzzles. Peter Lewin, *History of Economic Ideas*, in all this volume provides a useful addition to our understanding of Carl Menger. The translation is very readable and the index is good. The Streisslers are to be commended for performing a real service to the scholarly community in editing and publishing this book.

Karen I. Vaughn, *Journal of the History of Economic Thought*. In 1876, Carl Menger, then a young professor at the University of Vienna, was asked to teach the principles of political economy to Crown Prince Rudolf of Austria, the 17-year-old only son of Emperor Francis Joseph, who was to die tragically before he could inherit the throne. Rudolf's recently discovered Notebooks of these lectures, corrected by Menger, are a fascinating record of what the founder of the Austrian marginalist school thought worth teaching to the heir presumptive of a great power. Without referring to his own theories, Menger delivered a course on the economics of Adam Smith as presented in the mainstream German textbooks of the time in such a way that the Notebooks can be viewed as a key document on classical economic liberalism, pure and unadulterated. They cast new light on Menger's own theoretical discoveries, his view of government, and his interpretation of classical economics. In this important volume, Rudolf's Notebooks are published for the first time, both in German and an English translation. The editor's detailed introduction provides the historical and intellectual background to the Notebooks, as well as a thorough analysis of classical economics and its treatment by Menger. The text is fully annotated in German and English.

Schiffman, 2021-08-23 This volume traces the history of antisemitism from antiquity through contemporary manifestations of the discrimination of Jews It documents the religious sociological political and economic contexts in which antisemitism thrived and thrives and shows how such circumstances served as support and reinforcement for a curtailment of the Jews' social status The volume sheds light on historical processes of discrimination and identifies them as a key factor in the contemporary and future fight against antisemitism Teaching the Empire Scott O. Moore, 2020-05-15 *Teaching the Empire* explores how Habsburg Austria utilized education to cultivate the patriotism of its people Public schools have been a tool for patriotic development in Europe and the United States since their creation in the nineteenth century On a basic level this civic education taught children about their state while also articulating the common myths heroes and ideas that could bind society together For the most part historians have focused on the development of civic education in nation states like Germany France and the United Kingdom There has been an assumption that the multinational Habsburg Monarchy did not or could not use their public schools for this purpose *Teaching the Empire* proves this was not the case Through a robust examination of the civic education curriculum used in the schools of Habsburg from 1867-1914 Moore demonstrates that Austrian authorities attempted to forge a layered identity rooted in loyalties to an individual's home province national group and the empire itself Far from seeing nationalism as a zero sum game where increased nationalism decreased loyalty to the state officials felt that patriotism could only be strong if regional and national identities were equally strong The hope was that this layered identity would create a shared sense of belonging among populations that may not share the same cultural or linguistic background Austrian civic education was part of every aspect of school life from classroom lessons to school events This research revises long standing historical notions regarding civic education within Habsburg and exposes the complexity of Austrian identity and civil society deservedly integrating the Habsburg Monarchy into the broader discussion of the role of education in

The Habsburg Empire 1700-1918 Jean Berenger, C.A. Simpson, 2014-09-19 This is the eagerly awaited second volume of Jean Berenger's history of the Habsburgs It covers the last two centuries of their rule and provides a compelling account of the fluctuations of Habsburg dynastic power and its disintegration after World War One Berenger gives a rich portrait of Habsburg greatness under Maria Theresa and Joseph II and shows how their successors proved more adroit at riding the tide of nationalism in their multi ethnic empire than is often recognised

Saving and Investment in the Twenty-First Century Carl Christian von Weizsäcker, Hagen M. Krämer, 2021-06-29 The economy of the 21st century in the OECD countries and in China is characterized by a new phenomenon the structural surplus of private savings in relation to private investment This is true even in a situation of prosperity and very low interest rates On the one hand this excess saving is due to people's increasing inclination to save in light of rising life expectancy driven by the desire to have sufficient assets in old age On the other hand the demand for capital is not increasing to the same extent so that investment is not keeping pace with the rising desire to save The resulting gap between the private desire for wealth and private investment can only be closed by increasing public debt This open access book offers a new capital theoretical perspective on the macroeconomic relationship between desired wealth and investment and it presents new empirical data on private wealth and its composition in the OECD plus China area The authors argue that a free economic and social order can only be stabilized if the wealth aspirations of individuals are met under conditions of price stability This is not possible without substantial net public debt A new way of thinking about the economy as a whole is required By way of an in depth theoretical and empirical analysis the book demonstrates this new way of thinking and describes the current challenges facing economic policy It will appeal to economists and students of economics who are interested in macroeconomic theory and its economic policy implications An impressive and convincing theoretical dive into the fundamentals behind secular stagnation with very strong implications for actual debt policy Public debt may be needed to improve welfare Olivier Blanchard Senior Fellow at the Peterson Institute for International Economics and Professor of Economics Emeritus at Massachusetts Institute of Technology MIT Chief Economist at the International Monetary Fund from 2008 to 2015 *Saving and Investment in the Twenty First Century* gives a wholly new perspective on macroeconomics Weizsäcker and Krämer describe a simple practical solution to the underemployment that has plagued Southern Europe for more than a decade George Akerlof Nobel Laureate in Economics 2001 Professor at the McCourt School of Public Policy at Georgetown University and Professor of Economics Emeritus at the University of California Berkeley This is a profound and original contribution that can help us to understand and act on the great issues of our times Nicholas Stern Grantham Research Institute on Climate Change and the Environment at the London School of Economics Author of the Stern Review Report on the Economics of Climate Change Chief Economist at the World Bank from
